They're wrong. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

The Global Findex Database 2017 Oct 01 2020 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

Core Concepts of Personal Finance Nov 21 2019 * Focus on practical approach to financial planning. Text discusses the real personal finance decisions students face and innovatively relies on web resources to provide students with the tools, information and skills to make these decisions. * Emphasis on Decision Making. Instead of the use of traditional subtitles in each chapter (e.g., alternative forms of housing,, performing home affordability analysis), the text uses questions as the lead-in for each topic (e.g., should I rent or buy?, how do I bid on the property?) * An entire chapter is devoted to the critical topic of time value of money (TVM) and it is integrated into later chapters where appropriate. The solutions to many problems (i.e. How much Life Insurance Should You Have?) are presented through calculators that incorporate time value of money into the computations. Thus, students who have a general concept of what time value of money means but have difficulty doing TVM problems are still able to get through the material deal effectively with the impact of TVM. * Text is brief and applied. Instead of long narratives discussing terms and definitions, the text focuses on decisions that the student will be making during his or her lifetime, beginning with graduation and the selection of the first job. Each chapter has a theme of a person or couple needing to make decisions in that topic area. Key material is emphasized by its inclusion in the sample problems and the solutions to the sample problems.
