The Camera Dec 11 2020 Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. The Camera--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, The Camera covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters. Beautifully illustrated with photographs as well as instructive line drawings, this classic manual belongs on every serious photographer's bookshelf. "Adams is a clear-thinking writer whose concepts cannot but help the serious photographer." - New York Times "A master-class kind of guide from an undisputed master." - Publishers Weekly Over 1 million copies sold. Publisher's Note: This ebook of The Camera works best as a digital companion to the print edition. The ebook was produced by electronically scanning and digitizing a print edition, and as a result, your reading device may display images with halftone or moiré patterns.

Muslims, Trust and Multiculturalism Apr 14 2021 This book critically engages with the contemporary breakdown of trust between Muslim and non-Muslim communities in the West. It argues that a crisis of trust currently hampers intercultural relations and obstructs full participation in citizenship and civil society for those who fall prey to the suspicions of the state and their fellow citizens. This crisis of trust presents a challenge to the plurality of modern societies where religious identities have come to demand an equal recognition and political accommodation which is not consistently awarded across Europe, especially in nations which view themselves as secular, or where Islamic culture is seen as alien. This volume of interdisciplinary essays by leading scholars explores the theme of trust and multiculturalism across a range of perspectives, employing insights from political science, sociology, literature, ethnography and cultural studies. It provides an urgent critical response to the challenging contexts of multiculturalism for Muslims in both Europe and the USA. Taken together, the contributions suggest that the institutionalisation of multiculturalism as a state-led vehicle for tolerance and integration requires a certain type of trustworthy 'performance' from minority groups, particularly Muslims. Even when this performance is forthcoming, existing discourses of integration and underlying patterns of mistrust can contribute to Muslim alienation on the one hand, and rising Islamophobia on the other.
