Experimental Studies on Partnership Dissolution, R&D Investment, and Gift Giving Oct 26 2022 In recent years, traditional economic theory has been enriched by behavioral components. There is huge and rapidly growing evidence from empirical and experimental studies that mere

profit maximization is in many cases not a good proxy of real-life decision-making and interaction in economic situations. Yet, although the concept of homo oeconomicus has subsequently been dismissed by many authors, behavior is not random or arbitrary, but follows systematic patterns and rules that researchers in the field of behavioral economics aim at understanding. This thesis adds to the understanding of actual economic decision-making by analyzing behavior in three different economic applications. The first application concerns experimental studies on the performance of partnership dissolution mechanisms. The second application studies the effects of policy instruments on a firm's incentives to invest in R&D. Finally, the third application tests the impact of responsibility for being in a disadvantageous situation through deliberate risk-taking on solidarity behavior of economic agents. Potential readership includes scholars of experimental economics in the fields of mechanism design, industrial organization and social preferences as well as interested students and practitioners involved in these areas.

Small Business Valuation Oct 14 2021 *Small Business Valuation* is a book for someone that is looking to get an understanding of what differentiates some business valuations from others. Business valuation is easy when the business partners agree with each other ("are about to get married"), while business valuation can be complicated when the business partners are having a partnership dissolution, which share many characteristics with marital dissolution, which include but is not limited to predatory business characteristics. This book describes common scenarios, where you as a business partner or potential buyer of a business, can detect the red flags, and make what for you is the right decision. Roughly half of the book focuses on business valuation methodology, and the other half focuses on red flags and predatory characteristics within business valuation.

Modern Partnership Law Apr 27 2020 First published in 1983, *Modern Partnership Law* departs from the traditionally stale treatment of the subject. The amount of effort being made to encourage small businesses has made partnership law particularly relevant. This book contains chapters on partnership finance; employees; partnerships between spouses and legal intervention in partnership law. In an attempt to move away from citing hackneyed nineteenth century English authorities on this subject, greater prominence is given to Commonwealth cases. This book should be a stimulating addition to the list of all law students.

Unincorporated Business Entities Sep 13 2021 The rapid proliferation of unincorporated business forms has moved beyond the scope of traditional Corporations and Agency/Partnership courses and textbooks, which leaves students without the necessary knowledge to competently advise business clients. *Unincorporated Business Entities* was designed to fill that widening gap in the existing curriculum. *Unincorporated Business Entities* is designed for a three-semester-hour course and has the following features: • Like its predecessors, the new edition of *Unincorporated Business Entities* takes a business planning approach to teaching the modern law of partnerships and other unincorporated firms. • The material on LLCs has largely been rewritten, reflecting the rapid development in this form over the last several years. • Each chapter contains new and updated notes and problems that provide a "hands-on" approach to the consequences of, and planning and drafting for, issues in agency, partnership, limited partnerships, LLCs, and limited liability partnerships. • The materials on partners' financial rights now include a short primer on financial accounting. The Teacher's Manual is almost six-fold expanded from previous versions. It contains approaches to organizing classes, synopses of all the cases, lecture outlines, proposed questions and answers, discussions of answers to all the problems, diagrams of the complex cases, and flow charts of complex statutory analysis in areas like partnership dissolution and winding up. The Appendix also contains the partnership, limited partnership, and limited liability company statutes you will need for reference purposes.

When Marriage Ends Mar 19 2022 'This is a double-faced book, which should be read by everybody who is concerned about the societal effects of divorce. It shows that divorce has negative economic and social consequences, not only in the Anglo-Saxon countries, but also in the most generous welfare states of Europe, where divorce is widely accepted. Moreover, these effects are more negative for women than for men, even in the most gender-equalitarian welfare state. But it also shows that social policies can mitigate these negative consequences.' - Jaap Dronkers, European University Institute, Italy
