**Voice and Vision** Jan 01 2020 Voice & Vision is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools, techniques, and processes of narrative film in order to achieve their artistic vision. This book includes essential and detailed information on relevant film and digital video tools, a thorough overview of the filmmaking stages, and the aesthetic considerations for telling a visual story. The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it. Unlike many books that privilege raw technical information or the line-producing aspects of production, Voice & Vision places creativity, visual expression, and cinematic ideas front and center. After all, every practical decision a filmmaker makes, like choosing a location, an actor, a film stock, a focal length, a lighting set-up, an edit point, or a sound effect is also an expressive one and should serve the filmmaker's vision. Every decision, from the largest conceptual choices to the smallest practical solutions, has a profound impact on what appears on the screen and how it moves an audience. "In Practice" sidebars throughout connect conceptual, aesthetic and technical issues to their application in the real world. Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual, narrative, or aesthetic choice. Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges.

**Corpora in Translator Education** Jul 19 2021 The use of language corpora as a resource in linguistics and language-related disciplines is now well-established. One of the many fields where the impact of corpora has been growing in recent years is translation, both at a descriptive and a practical level. The papers in this volume, which grew out of presentations at the conference Cult2k (Bertinoro, Italy, 2000), the second in the series Corpus Use and Learning to Translate, are principally concerned with the use of corpora as resources for the translator and as teaching and learning aids in the context of the translation classroom. This book offers a cross-section of research by some leading scholars in the field, who offer accounts of first-hand experience and theoretical insights into the various ways of building and using appropriate corpora in translation teaching, for the benefit of teachers and learners alike. The various contributions provide a rich source of inspiration for other researchers and practitioners concerned with 'corpora in translator education'. Contributors include Stig Johansson, Tony McEnery, Kirsten Malmkjær, Jennifer Pearson, Lynne Bowker, Krista Varantola, Belinda Maia and a number of other scholars.
