**Pseudomonas** Nov 11 2020 The first three volumes of the Pseudomonas series covered the biology of pseudomonas in a wide context, including the niches they inhabit, the taxonomic relations among members of this group, the molecular biology of gene expression in different niches and under different environmental conditions, the analysis of virulence traits in plants, animals and human pathogens as well as the determinants that make some strains useful for biotechnological applications and promotion of plant growth. Pseudomonas volume 4 is intended to collect some of the most relevant new emerging issues in the field of Pseudomonas that were not assembled in the three previous volumes. This fourth volume covers the following topics: Virulence and Pathogens Genomics and Proteomics Physiology, Metabolism and Biotechnology. Pseudomonas volume 4 will be of use to researchers working on these bacteria, particularly those studying virulence,

genomics, physiology, biotechnology, etc. Advanced students in biology, medicine and agronomy will also find this volume a valuable reference during their studies.

Transitive Nouns and Adjectives Jul 20 2021 This book explores the wealth of evidence from early Indo-Aryan for the existence of transitive nouns and adjectives, a rare linguistic phenomenon which, according to some categorizations of word classes, should not occur. John Lowe shows that most transitive nouns and adjectives attested in early Indo-Aryan cannot be analysed as a type of non-finite verb category, but must be acknowledged as a distinct constructional type. The volume provides a detailed introduction to transitivity (verbal and adpositional), the categories of agent and action noun, and to early Indo-Aryan. Four periods of early Indo-Aryan are selected for study: Rigvedic Sanskrit, the earliest Indo-Aryan; Vedic Prose, a slightly later form of Sanskrit; Epic Sanskrit, a form of Sanskrit close to the standardized 'Classical' Sanskrit; and Pali, the early Middle Indo-Aryan language of the Buddhist scriptures. John Lowe shows that while each linguistic stage is different, there are shared features of transitive nouns and adjectives which apply throughout the history of early Indo-Aryan. The data is set in the wider historical context, from Proto-Indo-European to Modern Indo-Aryan, and a formal linguistic analysis of transitive nouns and adjectives is provided in the framework of Lexical-Functional Grammar.

early years in this “compelling...unvarnished, resonant” (BookPage) story of a childhood spent torn between two parents and two countries. As her parents make the dangerous trek across the Mexican border to “El Otro Lado” (The Other Side) in pursuit of the American dream, Reyna and her siblings are forced into the already overburdened household of their stern grandmother. When their mother at last returns, Reyna prepares for her own journey to “El Otro Lado” to live with the man who has haunted her imagination for years, her long-absent father. Funny, heartbreaking, and lyrical, *The Distance Between Us* poignantly captures the confusion and contradictions of childhood, reminding us that the joys and sorrows we experience are imprinted on the heart forever, calling out to us of those places we first called home. Also available in Spanish as *La distancia entre nosotros*.

**Valentin de Boulogne** Mar 04 2020 Following Caravaggio's death in 1610, the French artist Valentin de Boulogne (1591-1632) emerged as one of the great champions of naturalistic painting. The eminent art historian Roberto Longhi honored him as "the most energetic and passionate of Caravaggio's naturalist followers." In Rome, Valentin—who loved the tavern as much as the painter's palette—fell in with a rowdy confederation of artists but eventually received commissions from some of the city's most prominent patrons. It was in this artistically rich but violent metropolis that Valentin created such masterworks as a major altarpiece in Saint Peter's Basilica and superb renderings of biblical and secular subjects—until his tragic death at the age of forty-one cut short

his ascendant career. With discussions of nearly fifty works, representing practically all of his painted oeuvre, *Valentin de Boulogne: Beyond Caravaggio* explores both the the artist's superlative depictions of daily life and the tumultuous context in which they were produced. Essays by a team of international scholars consider his key attributions to European painting, his devotion to everyday objects and models from life, his technique of staging pictures with the immediacy of unfolding drama, and his place in the pantheon of French artists. An extensive chronology surveys the rare extant documents that chronicle his biography, while individual entries help situate his works in the contexts of his times. Rich with incident and insight, and beautifully illustrated in Valentin's complex, suggestive paintings, *Valentin de Boulogne: Beyond Caravaggio* reveals a seminal artist, a practitioner of realism in the seventeenth century who prefigured the naturalistic modernism of Gustave Courbet and Edouard Manet two centuries later.

**Electoral Survey Methodology** Sep 02 2022

While it has been some time since computer technologies were first introduced to social surveys, their methodological advantages, as well as potential limitations, are not yet fully appreciated by the relevant communities of scholars, mass media and governmental organizations. What can computer-assisted surveys do which ordinary paper and pencil interviews (PAPI) can never do? How does the usage of computer technology affect the quality of survey process and of collected data? More generally, what are the issues pertinent to the methodology of public opinion inquiry that are now revealed by the availability of computer-assisted surveying technique? The book seeks to address these questions systematically, with each individual chapter providing a well-focused analysis and ample evidence from Japan. As the

computer-assisted survey is bound to be more dominant in the coming years, this book provides an important foundation for future academic studies as well as their practical applications in the field.

**Cystic Fibrosis in the 21st Century** May 06

2020 Cystic fibrosis used to be thought of as a respiratory and digestive disease, with a uniformly and rapidly fatal outcome. The spectrum of the disease has broadened into the mild atypical case, presenting in middle age, with the potential for complications in virtually every system of the body. In the past few years there has been an explosion of knowledge of the basic science of the defect. The editors have therefore invited the leading scientists and clinicians in the field of cystic fibrosis to describe the recent advances in this disease. Although there are many 'Recent Advances' texts, previous books have been selective in their choice of topics. This book is the first to cover the entire field of this complex disease, and encompasses the rapidly moving topics of the basic molecular and cellular biology as well as the recent multi-system, multi-disciplinary advances in the clinical care of patients. The authors have been charged with writing only about new developments and not to rehash old literature. The bulk of the references is therefore less than five years old. This book addresses all professionals who treat cystic fibrosis and want to have an up-date of new findings in the field, particularly of those outside their immediate specialisation. It will also be useful for basic researchers interested in related scientific areas and the clinical context of their work.
