[Selected Scientific Works of Hans Christian Ørsted](#) Mar 24 2022 Hans Christian Ørsted (1777-1851) was one of the leading scientists of the nineteenth century, having played a crucial role in founding electromagnetism. Unfortunately for the English-speaking world, almost all of his research was published in other languages, particularly his native Danish. This book will help to elevate Ørsted to his rightful place in the history of science by finally making his most important scientific works available in English. The book includes, for example, Ørsted's account of his revolutionary experiments in electromagnetism. In 1820, he discovered that a compass needle deflects from magnetic north when an electric current is switched on or off in a nearby wire. This showed that electricity and magnetism were related phenomena, a finding that laid the foundation for the theory of electromagnetism and for research that later created such technologies as radio, television, and fiber optics. The unit of magnetic field strength was named the Ørsted in his honor. Selections here also show the extraordinary breadth of Ørsted's interests, which range through a long and prolific career from the study of plant alkaloids and the compression of fluids to the nature of light and the "natural science" of beauty. The writings are taken from scientific papers, Ørsted's correspondence, and reports of the Royal Danish Academy of Sciences and Letters. The book will not only draw long overdue attention to Ørsted's own work but will also shed new light on the nature of scientific study in the nineteenth century. Originally published in 1998. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Eighteenth-century Fiction and the Reinvention of Wonder Dec 21 2021 A footprint materializes mysteriously on a deserted shore; a giant helmet falls from the sky; a traveler awakens to find his horse dangling from a church steeple. Eighteenth-century British fiction brims with moments such as these, in which the prosaic rubs up against the marvelous. While it is a truism that the period's literature is distinguished by its realism and air of probability, *Eighteenth-Century Fiction and the Reinvention of Wonder* argues that wonder is integral to--rather than antithetical to--the developing techniques of novelistic fiction. Positioning its reader on the cusp between recognition and estrangement, between faith and doubt, modern fiction hinges upon wonder. *Eighteenth-Century Fiction and the Reinvention of Wonder's* chapters unfold its new account of British fiction's rise through surprising new readings of classic early novels--from Daniel Defoe's *Robinson Crusoe* to Jane Austen's *Northanger Abbey*--as well as bringing to attention lesser known works, most notably Rudolf Raspe's *Baron Munchausen's Narrative of His Marvellous Travels*. In this bold new account, the eighteenth century bears witness not to the world's disenchantment but rather to wonder's re-location from the supernatural realm to the empirical world, providing a re-evaluation not only of how we look back at the Enlightenment, but also of how we read today.

Understanding Power Feb 29 2020 'Arguably the most important intellectual alive' *New York Times* An indispensable collection of Noam Chomsky's talks on the past, present and future of the politics of power Noam Chomsky is universally accepted as one of the world's leading intellectuals of the modern era. Now, for the first time, Peter R. Mitchell and John Schoeffel have assembled the best of Chomsky's talks on the politics of power. With an eye to political activism and the media's role in popular struggle, as well as US foreign and domestic policy, Chomsky reinterprets the events of the past three decades, from foreign policy during the Vietnam War to the decline of welfare under the Clinton administration. Highlighting America's myriad of social inequalities and political issues while offering timely advice for much needed change, *Understanding Power* is definitive Chomsky. Light on the Path Dec 09 2020 Social history of the native peoples of the American South, bridging prehistory and history The past 20 years have witnessed a change in the study of the prehistory and history of the native peoples of the American South. This paradigm shift is the bridging of prehistory and history to fashion a seamless social history that includes not only the 16th-century Late Mississippian period and the 18th-century colonial period but also the largely forgotten--and critically important--century in between. The shift is in part methodological, for it involves combining methods from anthropology, history, and archaeology. It is also conceptual and theoretical, employing historical and archaeological data to reconstruct broad patterns of history--not just political history with Native Americans as a backdrop, nor simply an archaeology with added historical specificity, but a true social history of the Southeastern Indians, spanning their entire existence in the American South. The scholarship underlying this shift comes from many directions, but much of the groundwork can be attributed to Charles Hudson. The papers in this volume were contributed by Hudson's colleagues and former students (many now leading scholars themselves) in his honor. The assumption links these papers is that of a historical transformation between Mississippian societies and the Indian societies of the historic era that requires explanation and critical analysis. In all of the chapters, the legacy of Hudson's work is evident. Anthropologists, archaeologists, and historians are storming the bridge that connects prehistory and history in a manner unimaginable 20 years ago. While there remains much work to do on the path toward understanding this transformation and constructing a complete social history of the Southeastern Indians, the work of Charles Hudson and his colleagues have shown the way.

[The Tangled Ways of Zeus](#) Jun 14 2021 *The Tangled Ways of Zeus* is a collection of studies written over the last twenty years by the distinguished classicist Alan Sommerstein about various aspects of ancient Greek tragedy (and, in some cases, other related genres). It complements his recent collection of studies in Greek comedy, *Talking about Laughter* (OUP, 2009). Some of the essays have not been published previously, others have appeared in books or journals hard to find outside major academic libraries. Each chapter deals with its own topic, but between them they build up a multifaceted picture of the dramatists (especially Aeschylus and Sophocles), the genre, and its interactions with the society, culture, and religion of classical Athens.

Commentaries on Galatians--Philemon Apr 12 2021 This ACT volume is the second of two volumes that will offer a first English translation of the anonymous fourth-century commentary on the thirteen letters of Paul. Widely viewed as one of the finest pre-Reformation commentaries on the Pauline Epistles, this commentary, until the

time of Erasmus, was attributed to Ambrose. The name Ambrosiaster ("Star of Ambrose") seems to have been given to the anonymous author of the work by its Benedictine editors (1686- 1690).

Traductio Jul 16 2021 Nothing like wordplay can make difference between languages look so uncompromising, can give such a sharp edge to the dilemma between forms and effects, can so blur the line between translation and adaptation, or can cast such harsh light on our illusion of complete semantic stability. In the pun the whole language system may resonate, and so may literary traditions and ideological discourses. It follows that the pun does not only put translators to the test, it also poses a challenge to the views and concepts of those who study translation. This book brings together experts on translation and the pun, as well as researchers representing a variety of other relevant disciplines and schools of thought, ranging from theology to deconstruction and from contrastive linguistics to feminism. It can be read as a companion volume to *Wordplay and Translation*, a special issue of *The Translator* (Volume 2, Number 2, 1996), also edited by Dirk Delabastita

Comparative Children's Literature Oct 26 2019 WINNER OF THE 2007 CHLA BOOK AWARD! Children's literature has transcended linguistic and cultural borders since books and magazines for young readers were first produced, with popular books translated throughout the world. Emer O'Sullivan traces the history of comparative children's literature studies, from the enthusiastic internationalism of the post-war period – which set out from the idea of a supra-national world republic of childhood – to modern comparative criticism. Drawing on the scholarship and children's literature of many cultures and languages, she outlines the constituent areas that structure the field, including contact and transfer studies, intertextuality studies, intermediality studies and image studies. In doing so, she provides the first comprehensive overview of this exciting new research area. *Comparative Children's Literature* also links the fields of narratology and translation studies, to develop an original and highly valuable communicative model of translation. Taking in issues of children's 'classics', the canon and world literature for children, *Comparative Children's Literature* reveals that this branch of literature is not as genuinely international as it is often fondly assumed to be and is essential reading for those interested in the consequences of globalization on children's literature and culture.

Central Banking Legislation Volume 2 Jun 22 2019 This paper discusses the central banking, monetary, and banking laws for 17 countries in Europe, an area where many of the techniques that are now universally used in regulating or controlling the supply of money and credit were developed. The complete text of the basic central bank law of each country is given, as well as the by-laws of the central bank where they supplement major provisions of the basic law, and subsidiary legislation where pertinent. General banking laws are in most instances presented in summary form.

Romanising Oriental Gods Aug 05 2020 The traditional grand narrative correlating the decline of Graeco-Roman religion with the rise of Christianity has been under pressure for three decades. This book argues that the alternative accounts now emerging significantly underestimate the role of three major cults, of Cybele and Attis, Isis and Serapis, and Mithras. Although their differences are plain, these cults present sufficient common features to justify their being taken typologically as a group. All were selective adaptations of much older cults of the Fertile Crescent. It was their relative sophistication, their combination of the imaginative power of unfamiliar myth with distinctive ritual performance and ethical seriousness, that enabled them both to focus and to articulate a sense of the autonomy of religion from the socio-political order, a sense they shared with Early Christianity. The notion of 'mystery' was central to their ability to navigate the Weberian shift from ritualist to ethical salvation.

God and the History of the Universe Sep 25 2019 The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong. Some Christian understandings of reality do conflict with some scientific understandings. But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the "facts" founded on them. This book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God's role in the origin and history of the universe. At the center of this integrated narrative is the view that God, who is pure, unbounded Love, is Creator: the zest for life in the universe comes from God, and God is the source of Truth, Beauty, and Goodness in the universe. God is amazed and delighted at what God-and-the-world has created; God is saddened by ways creatures have fallen short of pure, unbounded Love, Truth, Beauty, and Goodness; and God's pure, unbounded Love keeps on trying to persuade all creatures toward Truth, Beauty, and Goodness.
