**Running the Room** Aug 26 2019 Good behaviour is the beginning of great learning. All children deserve classrooms that are calm, safe spaces where everyone is treated with dignity. Creating that space is one of the most important things a teacher needs to be able to do. But all too often teachers begin their careers with the bare minimum of training - or worse, none. How students behave, socially and academically, dictates whether or not they will succeed or struggle in school. Every child comes to the classroom with different skills, habits, values and expectations of what to do. There's no point just telling a child to behave; behaviour must be taught. Behaviour is a curriculum. This simple truth is the beginning of creating a classroom culture where everyone flourishes, pupils and staff. Running the Room is the teacher's guide to behaviour. Practical, evidence informed, and based on the expertise of great teachers from around the world, it addresses the things teachers really need to know to build the classrooms children need. Bursting with strategies, tips and solid advice, it brings together the best of what we know and saves teachers, new or old, from reinventing the wheels of the classroom. It's the book teachers have been waiting for.

**Getting Science** Oct 28 2019 Science is rightly a fundamental part of primary school education, but that doesn't make it easy to teach - especially for teachers without a science background. This straight talking book from an experienced science writer and communicator looks at how to make the most of it and give primary school children a good grounding in the topic. Getting Science sets out to engage the sense of wonder. The science in this book is not for the children, but for the adults who have to explain it. Starting with a whirlwind tour of the great milestones of modern science, Getting Science goes on to take each of the main curriculum topics and give it a new twist. It provides the information needed to understand the key topics better and be able to put them across with enthusiasm and energy. This book will help teachers to get children excited by science, to understand science rather than just answer questions. Getting Science makes science fun, approachable and comprehensible to those who just don't get it.

effective teaching practices, and created by a team of mastery experts led by Series Editor Tony Staneff, Power Maths is designed to make the whole-class mastery teaching approach work for you, your children and your school. The Practice Books provide just the right amount of intelligent practice for children to complete independently in the final section of the lesson. The practice questions are for everyone - each question varies one small element to move children on in their thinking. All practice questions are carefully developed to reveal misconceptions. 'Reflect' questions help children to reason and show how deep their understanding is before moving on. Power Maths characters encourage and challenge children to develop growth mindsets and work flexibly. Calculations are connected so that children think about the underlying concept.
