**Critical Curriculum Leadership** Nov 10 2020 Although traditional curriculum and instructional leadership frameworks have dominated educational administration training for almost thirty years, it has become increasingly clear that even the most recent frameworks have failed today's leaders who struggle with the politics of curriculum decisions on a daily basis. Critical Curriculum Leadership is an examination of curriculum leadership in the wake of U.S. testing mandates and school reforms, all of which seem to support a particular set of conservative ideologies. Drawing from her own longitudinal ethnographic study and from existing literature and research in the field, Ylimaki explores the formation of curriculum leadership in relation to broader cultural and political shifts. She shows how traditional leadership frameworks have come up short, and makes the case for an alternative leadership theory at the intersection of educational leadership and curriculum studies. She provides analytical tools that inspire progressive education and offers critical theories, strategies, research examples, problem-posing cases, and research ideas essential for curriculum leadership in the present conservative era. Critical Curriculum Leadership will appeal to the many educational leadership scholars and practitioners who are interested in developing effective and socially just curricula in their schools and districts as well as curriculum scholars who are interested in leadership issues.

**Minding the Achievement Gap One Classroom at a Time** May 29 2022 The achievement gap is a persistent and perplexing challenge for educators. While school- and system-level reforms continue to be discussed in statehouses and district offices, individual teachers are challenged to do something now to help students who are falling short of standards, including students who are English language learners and receiving special education services. A companion to the ASCD best-seller *Improving Student Learning One Teacher at a Time*, this book identifies small, specific adjustments to planning, teaching, and assessment practices that will support more effective learning in every student, every day, and help close the achievement gap on a classroom-by-classroom basis. Here, you'll learn how to \* Use readily available tools--curriculum documents, a plan book, and a grade book--to improve all students' access to, interaction with, and mastery of lesson content. \* Design daily lessons that clarify learning goals and require students to use high-yield learning strategies, seek feedback, and reflect on their progress. \* Promote the progress of English language learners through coordinated pursuit of content and language goals, and synchronize instruction to improve the performance of special education students in both co-teaching and resource environments. This book also features the voices of working educators who share how "minding the gap" has helped them engage academically at-risk students, ELLs, and special education students; improve students' test scores; and sustain these gains over time. If you are a classroom teacher or specialist committed to helping all your students become more successful learners and unwilling to wait for high-level solutions or even the results of another "data retreat," then this is just the resource you need.
