Calculus for the Managerial, Life, and Social Sciences Feb 10 2021 Author Soo Tang Tan knows that students majoring in business, management, economics, and the social and life sciences appreciate understanding how the math they are learning relates to their future careers. So Tan has filled this Fourth Edition of Calculus for the Managerial, Life and Social Sciences with a wealth of new applications and examples drawn from newspapers and magazines. It is this real-life, problem-solving approach that makes calculus easier to

understand. Tan's concise, inviting writing style and the wide variety of helpful in-text learning features augments this text's user-friendly feel. Wherever possible the author uses an intuitive approach to present new mathematical concepts. Results are often presented informally--without compromising the mathematical content and accuracy--to help students understand new material.

Cochrane Handbook for Systematic Reviews of Interventions Feb 22 2022 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Research Design Aug 19 2021 With a new chapter on the literature review, this accessible step-by-step guide to using the five major approaches to research design is now in a thoroughly revised second edition. The prior edition's user-friendly features are augmented by a new companion website with worksheets keyed to each chapter. For each approach, the text presents a template for a research proposal and explains how to conceptualize and fill in every section. Interdisciplinary research examples draw on current events and social justice issues. Unique coverage includes hot topics--replication studies, data sharing, and preregistration; tailoring proposals to different audiences; and more. Terminology commonly used in each approach is identified and key moments of ethical decision making are flagged. The book includes a general introduction to social research, an in-depth discussion of ethics, and a chapter on how to begin a research study. New to This Edition *New or expanded discussions of theory and literature in quantitative research, replication studies, preregistration of research, the critical paradigm in qualitative research, mixed methods research, approaching different kinds of organizations in community-based participatory research, and more. *Chapter on the literature review, including the ethics of citational practices. *Companion website with worksheets to aid in learning and practicing each chapter's key concepts. *Updated examples, references, and recommended readings throughout. Pedagogical Features *Multiple "Review Stops" in each chapter--quick quizzes with answer keys. *End-of-chapter writing exercises, research activities, and suggested resources. *Bolded key terms and an end-of-book glossary. *Boxed tips from experts in the respective approaches. *Pointers to downloadable worksheets throughout the chapters. *Author-created PowerPoints and chapter tests with answer keys available to instructors using the book in a course.
