Global Advertising Practice in a Borderless World Jun 29 2022 Cultural and regional differences in creating and managing advertising require unique responses to a dynamic, rapidly globalising business environment. To be global in advertising is no longer to be homogenised or standardised, it is to be at the leading edge of social and cultural trends that are changing the world as we know it. Global Advertising Practice in a Borderless World covers a wide range of adaptive advertising practices, from major and emerging markets, in mainstream and digital advertising. It focuses on understanding how the globalisation of advertising works in practice, explored in three sections: globalising advertising in a media and communications context; advertising in a global world; and global advertising in a digital world. Covering past, present and potential futures, through an impressive ensemble of global advertising practitioners and academics, the book combines academic rigour with practical insights to provide a comprehensive analysis of the changing dynamics between advertising and globalisation. It will be of great interest to researchers, educators and advanced students in advertising, global branding, international marketing, international business media, communication and cultural studies.

Household Sustainability Feb 23 2022 *“The question Chris Gibson and his colleagues answer in this book is simple: ‘Why is it not easy being green?’ In 20 concise, focused and accessible chapters – from birthing to dying, from toilets to Christmas – they unveil the ambiguities, instabilities and paradoxes of affluent household living in the 21st century. In so doing, they temper the easy rhetoric of sustainable lifestyles with some authentic realities drawn from the affluent world. Earth system science is showing us the deep complexity of our material planet. This book brilliantly reflects back to us the complex materiality of our cultural lives.”* – Mike Hulme, University of East Anglia, UK Contrary to the common rhetoric that being green is ‘easy’, household sustainability is rife with contradiction and uncertainty. Households attempting to respond to the challenge to become more sustainable in everyday life face dilemmas on a daily basis when trying to make sustainable decisions. Various aspects of life such as cars, computers, food, phones and even birth and death, may all provoke uncertainty regarding the most sustainable course of action. Drawing on international scientific and cultural research, as well as innovative ethnographies, this timely book probes these wide-ranging sustainability dilemmas, assessing the avenues open to households trying to improve their sustainability. The authors engage critically, and constructively, with the proposition that households are a key scale of action on climate change. They confront dilemmas of practice and circumstance, and cultural norms of lifestyle and consumerism that are linked to troublesome environmental problems – and question whether they can be easily unsettled. The work also illuminates the informal and often unheralded work by households – frequently the poorest – in reducing their environmental burden. This important book is critical to understanding both the barriers to household sustainability and the ‘unsung’ sustainability work carried out by householders. Containing a unique combination of science and cultural research, this fascinating book will appeal to researchers and students of environmental science, environmental studies, sustainability studies, climate change adaptation, geography, sociology, cultural studies, science and technology studies, as well as energy studies and housing research. Policy-makers in various levels of government working through sustainability problems, environmental educators, social planners and sustainability officers working for governments, will also find much to interest them in this unique book.

Beaut Utes 4 Nov 10 2020 'There's a lot you can do with utes . . .' You can use them on the farm and they're great at a B & S. You can take them across the Outback – they'll never let you down . . . well, maybe. There's room for all your gear in the back, as well as your dog. Utes and mates go together, too: there's always a mate to tow you out when you get bogged . . . you hope! Allan M. Nixon, Australia's 'Uteman', has been out on the road again and brings you some great new ute stories. Meet the down-to-earth people from Gundagai to Wilpena Pound and beyond who share his passion: legendary country singer Lee Kernaghan and his Landcruiser; Mark and

Karen who got married on the back of their Holden; Great-grandmother Beryl who loves her 1950s Bradford; Steve who has a fridge and a bed in the back of his Hilux. Of course there are other great Aussies like 'Chips', 'Outback Seaman', 'Frog', 'Macca' and 'Darkie' - and the 'Toyman'. From the Outback feral utes to the best-in-show utes they're all here, just like their owners - young and old.

Environmental Taxation in China and Asia-Pacific Nov 03 2022 'Environmental Taxation in China and Asia-Pacific contains a rich collection of papers addressing issues of vital importance to policy formulation in a spectrum of environmental areas. While not everyone would agree to all that is said in each of the papers, the book will certainly trigger fruitful debates. It is also a great source of information on environmental policy developments in major economies that will need to play an increasing role in addressing major issues such as climate change mitigation.' Nils Axel Braathen, Principal Administrator OECD, Environment Directorate 'Another outstanding volume on environmental taxation, this time with focus on China and the Asia-Pacific. Legal, economic and policy contributions offer great insight in the present situation and future developments in this fascinating part of the world.' Kurt Deketelaere, K.U. Leuven, Belgium, University of Dundee, UK and University of Qatar 'Environmental Taxation in China and Asia-Pacific contains an integrated set of detailed chapters providing insights and analysis on how fiscal policy can be used to achieve environmental sustainability. Highly topical chapters include energy tax policy in China, environmental fiscal reform, carbon tax policy in northeast Asia and environmental taxation strategies in China, Asia and Australia, as well as many other relevant topics. Written by distinguished environmental taxation scholars from around the world, the emphasis of this book is on finding solutions to environmental problems which merit serious consideration by policy makers as well as academics in environmental law and other academic disciplines.'

Optimum Cooling of Data Centers Jul 07 2020 This book describes the use of free air cooling to improve the efficiency of, and cooling of, equipment for use in telecom infrastructures. Discussed at length is the cooling of communication installation rooms such as data centers or base stations, and this is intended as a valuable tool for the people designing and manufacturing key parts of communication networks. This book provides an introduction to current cooling methods used for energy reduction, and also compares present cooling methods in use in the field. The qualification methods and standard reliability assessments are reviewed, and their inability to assess the risks of free air cooling is discussed. The method of identifying the risks associated with free air cooling on equipment performance and reliability is introduced. A novel method of assessment for free air cooling is also proposed that utilizes prognostics and health management (PHM). This book also: Describes how the implementation of free air cooling can save energy for cooling within the telecommunications infrastructure. Analyzes the potential risks and failures of mechanisms possible in the implementation of free air cooling, which benefits manufacturers and equipment designers. Presents prognostics-based assessments to identify and mitigate the risks of telecommunications equipment under free air cooling conditions, which can provide the early warning of equipment failures at operation stage without disturbing the data centers' service. Optimum Cooling for Data Centers is an ideal book for researchers and engineers interested in designing and manufacturing equipment for use in telecom infrastructures.

Fuoristrada Sep 01 2022 La guida di un veicolo fuoristrada, non differisce sostanzialmente da quella di una normale autovettura: è l'esperienza, abbinata a una buona dose di buonsenso, a dettare le principali norme di comportamento. Esistono tuttavia situazioni peculiari di guida, specie in condizioni avverse, che in certo qual modo sono specifiche di un veicolo a quattro ruote motrici. Scopo di questo volume è appunto quello di fornire un quadro esauriente e completo sul fuoristrada e sulle caratteristiche di guida attraverso l'analisi delle varie tecniche. A una prima parte prettamente manualistica (corredata anche da utili schede dei fuoristrada attualmente sul mercato) segue un'ampia sezione finale dedicata al Camel Trophy, arricchita da immagini originali e uniche nel loro genere, scattate dall'autore nel corso dei numerosi raid a cui ha preso parte come concorrente e organizzatore.

Falling Off Air Oct 29 2019 From the warmth of her living room, her one-year-old twins safely tucked up in bed and a storm raging outside, Robin Ballantyne is horrified to witness the suicide of Paula Carmichael, prominent social activist and highly respected community figure.

Code-switching Between Structural and Sociolinguistic Perspectives Jun 05 2020 The study of code-switching has been carried out from linguistic, psycholinguistic, and sociolinguistic perspectives, largely in isolation from each other. This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence, forms, and outcomes of code-switching. The contributions in this volume are divided into three parts: "code-switching between cognition and socio-pragmatics", "multilingual interaction and identity", and "code-switching and social structure". The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations. They are predictive and descriptive in their research goals and rely on experimental or naturalistic data. But they share the common goal of seeking to explain how social structures, ideologies, and identity impact on the grammatical and conversational features of code-switching and language mixing, and on the emergence of mixed languages. Given its scope, this volume is a significant addition to the empirical and theoretical foundations of the study of code-switching. It is also of relevance to the general debate on the inter-relationships between language and society.

Cells at Work: Bacteria! 7 Mar 15 2021 This is the final volume of the official "Cells at Work!" spin-off! The brave and adorable bacteria in your body are what allow you to stay healthy and beautiful! The host has a bout of diarrhea due to unknown causes, and the Clostridium Perfringens and Bifidum bacteria are locked in battle. Suddenly, a rain of arrows descends upon them. These arrows... are antibiotics!! This will be a decisive battle, where many good and bad bacteria will perish! Who will emerge victorious and rule the intestines?! Don't miss the emotional finale of the manga about anthropomorphized bacteria!

Assessment of Fuel Economy Technologies for Light-Duty Vehicles Nov 30 2019 Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety. Assessment of

*Technologies for Improving Light Duty Vehicle Fuel Economy* estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29 percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per vehicle. The book focuses on fuel consumption—the amount of fuel consumed in a given driving distance—because energy savings are directly related to the amount of fuel used. In contrast, fuel economy measures how far a vehicle will travel with a gallon of fuel. Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions, the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information.

Approved Recurrent and Capital Estimates Dec 12 2020

*Teaching 'proper' Drinking?* Jun 25 2019 In *Teaching 'Proper' Drinking?*, the author brings together three fields of scholarship: socio-historical studies of alcohol, Australian Indigenous policy history and social enterprise studies. The case studies in the book offer the first detailed surveys of efforts to teach responsible drinking practices to Aboriginal people by installing canteens in remote communities, and of the purchase of public hotels by Indigenous groups in attempts both to control sales of alcohol and to create social enterprises by redistributing profits for the community good. Ethnographies of the hotels are examined through the analytical lens of the Swedish 'Gothenburg' system of municipal hotel ownership. The research reveals that the community governance of such social enterprises is not purely a matter of good administration or compliance with the relevant liquor legislation. Their administration is imbued with the additional challenges posed by political contestation, both within and beyond the communities concerned.

NAC News Sep 28 2019

*Climate Change and Multi-Dimensional Sustainability in African Agriculture* Apr 15 2021 This 35-chapter book is based on several oral and poster presentations including both invited and contributory chapters. The book is thematically based on four pillars of sustainability, with focus on sub-Saharan Africa (SSA): Environment, Economic, Social and Institutional. The environmental sustainability, which determines economic and social/institutional sustainability, refers to the rate of use of natural resources (soil, water, landscape, vegetation) which can be continued indefinitely without degrading their quality, productivity and ecosystem services for different ecoregions of SSA. This book will help achieve the Sustainable Development Goals of the U.N. in SSA. Therefore, the book is of interest to agriculturalists, economists, social scientists, policy makers, extension agents, and development/bilateral organizations. Basic principles explained in the book can be pertinent to all development organizations.

Tanzania Oct 10 2020 Whether you need advice on removing ticks, or tips on photographing wildebeest, the sixth edition of this comprehensive guide has the latest information. Tanzania is home to Mount Kilimanjaro, the Serengeti, the Ngorongoro Crater, and lakes Victoria and Tanganyika. Some 25% of the country is protected in national parks and conservation areas. One fifth of Africa's large mammal population and more than a thousand bird species live here. Now fully updated, this guide includes practical information for both independent travelers and those on all-inclusive safaris, recommends the best of the ground tour operators, and gives advice on interaction with the local people. 'Best guidebook' *The Sunday Times (UK)*

Drones and Responsibility Mar 27 2022 How does the use of military drones affect the legal, political, and moral responsibility of different actors involved in their deployment and design? This volume offers a fresh contribution to the ethics of drone warfare by providing, for the first time, a systematic interdisciplinary discussion of different responsibility issues raised by military drones. The book discusses four main sets of questions: First, from a legal point of view, we analyse the ways in which the use of drones makes the attribution of criminal responsibility to individuals for war crimes more complicated and what adjustments may be required in international criminal law and in military practices to avoid 'responsibility gaps' in warfare. From a moral and political perspective, the volume looks at the conditions under which the use of military drones by states is impermissible, permissible, or even obligatory and what the responsibilities of a state in the use of drones towards both its citizens and potential targets are. From a socio-technical perspective, what kind of new human machine interaction might (and should) drones bring and which new kinds of shared agency and responsibility? Finally, we ask how the use of drones changes our conception of agency and responsibility. The book will be of interest to scholars and students in (military) ethics and to those in law, politics and the military involved in the design, deployment and evaluation of military drones.

Kenya Gazette Jul 31 2022 The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Trying to See Round Corners Jan 31 2020 This offers honest and largely unedited glimpses into the world of social work of 40 years or so ago. Illustrated by the professional practice of one Colin Millwood, an enthusiastic but otherwise green social worker, it coincides with the early beginnings of his arrival at his local Social Services Department.

Our Lady of Alice Bhatti Oct 02 2022 The patients of the Sacred Heart Hospital for All Ailments are looking for a miracle, and Alice Bhatti is looking for a job. Alice is a candidate for the position of junior nurse, grade 4. It is only a few weeks since her release from Borstal. She has returned to her childhood home in the French Colony. It seems she has inherited some of her father's gift as a healer. With guidance from the working nurse's manual, and some tricks she picked up in prison, Alice brings succour to the thousands of patients littering the hospital's corridors and concrete courtyard. In the process she attracts the attention of a lovesick patient, Teddy Bunt, apprentice to the nefarious 'Gentleman Squad' of the Karachi police. They fall in love; Teddy with sudden violence, Alice with cautious optimism. Their love is unexpected, but the consequences are not
