Frequent Flyer Humor and One-Upmanship Jul 06 2020 On a nice little De Havilland twin prop, Toronto to Baltimore: "Okay, so we have fifteen of you today. Anyone not flown before? Good. No virgins. Then I'll do the short version. Exits over the wings, life jackets beneath the seats, oxygen masks drop out of the ceiling, put them on in the usual fashion. Seats up. Belts on. Read the cards. Enjoy your flight. Questions?" You're traveling too much when you see the same flight attendant twice in the same day. Tower: "Cleared to land; winds 270 at 21, gusting 29, heavy rain, severe turbulence below 300, RVR (runway visual range) 2,000 feet." Pilot: "Roger. Cleared to land; and Oh, let us know if it gets any worse." Tower: "Worse?" Jet Lag: "Wallet in refrigerator. Where's the milk?" "Delta Airlines is pleased to have some of the best flight attendants in the industry. Unfortunately, none of them are on this flight." "We're ready to begin boarding Flight 1234 with service from Miami to Atlanta. Due to a weight problem with the aircraft, we are going to limit you to one piece of carry-on luggage. Any additional items will have to be checked." After a real crusher of a landing in Phoenix, the flight attendant came on with: "Ladies and Gentlemen, please remain in your seats until Captain Crash has brought the aircraft to a screeching halt against the gate. Once the tire smoke has cleared and the warning bells are silenced, we'll open the door and you can pick your way through the wreckage to the terminal." Two airline mechanics were working on a 747 when lunchtime came. Rather than leave what they were doing, they just took their lunch break while sitting in the cockpit. As they were eating lunch, one mechanic bet the other that the landing gear wouldn't retract if he pulled the gear lever up. He lost. Near the conclusion of an extremely turbulent American Airlines flight, a cabin attendant finished his "stowed-tray-table-and-upright-seat" speech with a cheerful, "We'd like to thank you for flying American Airlines. But if you were displeased with the flight, thank you for flying United."

Why Planes Crash Case Files: 2003 Oct 09 2020 It shouldn't be possible to lose a Boeing 727. Why Planes Crash Case Files: 2003 follows eleven aircraft disasters from 2003, detailing how the accidents happened and how they might have been avoided. This "CSI for aviation enthusiasts" series examines both the history and the current climate of aviation to unravel the instigating events which led to these catastrophes. No one believed that a modern commercial flight could run out of fuel at 18,000 feet. The incidents include the mystery of Air Midwest 5481 made unflyable by maintenance shortcuts, the DHL crew whose wing was shot off and an inexplicable aerobatic crash solved by DNA testing. The windshield exploded into the cockpit. Every chapter features a detailed walk-through of a real-life air emergency. The author combines

official investigation reports and modern media coverage as well as cockpit and ATC transcripts to take the reader through these accidents and near-misses. Why Planes Crash offers an exciting and compelling look at the critical moments which define an aviation accident, explaining both the how and the why of catastrophic accidents in modern times. Each book in the Why Planes Crash series features detailed walk-throughs of real-life emergencies. The author offers compelling insight into the critical moments which define an aviation accident.
