**Potentiating Health and the Crisis of the Immune System** Dec 25 2021 With all the enormous resources that are invested in medicine, it is sometimes a mystery why there is so much sickness still in evidence. Our life span, though higher than at any time in history, has now leveled off and has not significantly increased in the last two generations. There is a one-third increase in long-term illness in the last 20 years and a 44% increase in cancer incidence, which are not related to demographic issues. In some modern countries, the level of morbidity (defined as days off work because of sickness) has increased by two thirds in this time. Despite \$1 trillion spent on cancer research in 20 years, the "War On Cancer" has recently been pronounced a complete failure by the u. s. President's Cancer Panel. Evidently we still have a long way to go. The goal of "Health for All by the Year 2000" as the World Health Organization has put it, is another forgotten dream. As ever, the answer will be found in breaking out of the old philosophical patterns and discovering the new, as yet unacceptable concepts. The problems of medicine today require a Kuhnian breakthrough into new paradigms, and new ways of thinking. And these new ways will not be mere variations of the old, but radical departures. This book, and the conference upon which it was based, is part of a search for these new pathways.

**55 Corrective Exercises for Horses** Apr 04 2020 A highly illustrated guide to simple yet effective methods for keeping horses sound, healthy, and performing their best. Over time, horses (like people) acquire postural habits, compensate for soreness and injury, and develop poor movement patterns. Jec Aristotle Ballou has made a name for herself advocating for the horse and providing sensible instruction in his schooling, conditioning, and care. Her bestselling books and popular clinics are designed to enable any horse person to correctly apply proven principles that bring measurable progress while avoiding boredom and confusion. In her latest collection of mounted and unmounted corrective exercises, Ballou demonstrates how we can actively work to improve the horse's posture and movement, whether he is: An active performance or pleasure mount. An aging or older horse that benefits from gentle exercise. A horse being rehabilitated following injury, illness, or lack of conditioning. Ballou's positive cross-training techniques are free of shortcuts, and her guidelines for analyzing the horse's posture and way of going help readers gain a new awareness of the equine body. Applicable for all disciplines and full of quality color photographs to explain the exercises, this is an integral collection that optimizes how the horse uses his body and helps ensure he stays sounder and healthier for more years of his life.
