Debt of Honor Jul 26 2019 Don't Miss the Original Series Tom Clancy's Jack Ryan Starring John Krasinski! THE #1 NEW YORK TIMES BESTSELLING JACK RYAN NOVEL "A harrowing tale...Clancy keeps you riveted with political intrigue and military maneuvering [and] sends you rushing headlong to the book's stunning conclusion."—USA Today Bestselling author Tom Clancy takes a bold, incisive look at what our nation's leaders are calling "the new world order." The time and place: a world at peace, where yesterday's enemies are tomorrow's allies. The players: Jack Ryan as the new U.S. President's National Security Advisor, and his CIA colleagues, John Clark and Domingo Chavez. The crisis: a shocking chain of events in which the wages of peace are as fully complex—and devastating—as those of war. "[Debt of Honor] traces the financial, political, military, and personal machinations that drive America into the next major global war...A SHOCKER."—Entertainment Weekly

Advances in Security, Networks, and Internet of Things Sep 27 2019 The book presents the proceedings of four conferences: The 19th International Conference on Security & Management (SAM'20), The 19th International Conference on Wireless Networks (ICWN'20), The 21st International Conference on Internet Computing & Internet of Things (ICOMP'20), and The 18th International Conference on Embedded Systems, Cyber-physical Systems (ESCS'20). The conferences took place in Las Vegas, NV, USA, July 27-30, 2020. The conferences are part of the larger 2020 World Congress in Computer Science, Computer Engineering, & Applied Computing (CSCE'20), which features 20 major tracks. Authors include academics, researchers, professionals, and students. Presents the proceedings of four conferences as part of the 2020 World Congress in Computer Science, Computer Engineering, & Applied Computing (CSCE'20); Includes the tracks on security & management, wireless networks, internet computing and IoT, and embedded systems as well as cyber-physical systems; Features papers from SAM'20, ICWN'20, ICOMP'20 and ESCS'20.

Jim Murray's Whisky Bible 2021 Aug 31 2022 This is the most comprehensive and thoroughly researched guide to the world's whiskies ever produced. Honest, forthright and proudly independent, Jim Murray has, for this 18th edition, tasted and rated over 4,500 whiskies, shedding light on more than 1,800 Scottish single malts, nearly 400 blended Scotches and in excess of 900 American whiskies. Jim Murray's Whisky Bible provides an unrivalled and invaluable source of reference to the consumer, the whisky industry and the drinks trade alike. In terms of whisky, this is the gospel!

California, Nevada Tourbook Jul 30 2022

Fibula, Fabula, Fact May 04 2020 Were there Vikings in Finland? Fibula, Fabula, Fact - The Viking Age in Finland is intended to provide essential foundations for approaching the Viking Age in Finland. The volume consists of a general introduction followed by nineteen chapters and a closing discussion. The nineteen chapters are oriented to provide introductions to the sources, methods and perspectives of diverse disciplines. Discussions are presented from fields including archaeology, folklore studies, genetics, geopolitics, historiography, language history, linguistics, palaeobotany, semiotics and toponymy. Each chapter is intended to help open the resources and the history of discourse of the particular discipline in a way that will be accessible to specialists from other fields, specialists from outside Finland, and also to non-specialist readers and students who may be more generally interested in the topic.

Pentagon 9/11 Oct 09 2020 The response and subsequent performance of federal, state, and especially local agencies, in particular their coordination and cooperation with each other and with Pentagon authorities, provide lessons for dealing with other large-scale emergencies in the future. Material used in this study was distilled from more than 1,300 interviews, relying on the corroborative testimony of two or more witnesses wherever possible.

Soft Computing for Problem Solving Nov 29 2019 This two-volume book provides an insight into the 10th International Conference on Soft Computing for Problem Solving (SocProS 2020). This international conference is a joint technical collaboration of Soft Computing Research Society and Indian Institute of Technology Indore. The book presents the latest achievements and innovations in the interdisciplinary areas of soft computing. It brings together the researchers, engineers and practitioners to discuss thought-provoking developments and challenges, in order to select potential future directions. It covers original research papers in the areas including but not limited to algorithms (artificial immune system, artificial neural network, genetic algorithm, genetic programming and particle swarm optimization) and applications (control systems, data mining and clustering, finance, weather forecasting, game theory, business and forecasting applications). The book will be beneficial for young as well as experienced researchers dealing across complex and intricate real-world problems for which finding a solution by traditional methods is a difficult task.

Visual Aircraft Recognition Feb 22 2022 This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

Isotope Effects In Chemistry and Biology Sep 07 2020 The field of isotope effects has expanded exponentially in the last decade, and researchers are finding isotopes increasingly useful in their studies. Bringing literature on the subject up to date, Isotope Effects in Chemistry and Biology covers current principles, methods, and a broad range of applications of isotope effects in the physical, biolo

Harrier II Aug 07 2020 When the first Harrier strike fighter was introduced by the Royal Air Force in the late 1960s, it was hailed as a technological breakthrough with its speed, vertical, short takeoff and landing capability (V/STOL). Today, the Harrier II is one of the top weapons of choice for ground troops in Iraq and Afghanistan who need effective air support. This book chronicles the incredible development of this tactical fixed wing aircraft, a journey that, in the author's opinion, was successful solely because of the unwavering commitment of the U.S. Marine Corps. In tracing the Harrier II's history, Lon Nordeen highlights the teamwork, creativity, and innovation that went into the design, development, fielding, and operation of this unique aircraft. The story begins with the development of the U.S. Marine Corps air-ground team close air support concepts in the 1920s, on the battlefields of the Pacific in the Second World War and the Korean conflict. Later in Vietnam, efforts were directed at improving the aviators' response time to calls for air support. Seeing V/STOL tactical airplanes as the only practical solution to this problem, the Marine Corps received their first AV-8As in 1971 and then set out to improve the Harrier's capability. This is the Harrier II's story, including its near-cancellation in the late 1970s during the Carter Administration, developmental challenges in the early 1980s, international growth path with the addition of night attack capability and radar to its success in the Gulf War, Afghanistan and Operation Iraqi Freedom. This book includes interviews and insights from those involved- from pilots and

military commanders to engineers and production personnel and even to those who opposed the program. It is the first book to be written about the Harrier II from the U.S. Marine Corps perspective that also discusses the selection and operational use of the aircraft by the United Kingdom, Spain and Italy.

Fundamentals of Aircraft and Rocket Propulsion Aug 26 2019 This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engine selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

Introduction to Aircraft Flight Mechanics Jun 28 2022 Suitable for use in undergraduate aeronautical engineering curricula, this title is written for those first encountering the topic by clearly explaining the concepts and derivations of equations involved in aircraft flight mechanics. It also features insights about the A-10 based upon the author's career experience with this aircraft.

F-15C Eagle Units in Combat Jan 30 2020 The F-15A/C is irrefutably the most successful jet fighter of the last 30 years. Serving in the Air Forces of Israel, the United States and Saudi Arabia, it has racked up a kill ratio exceeding 105:0. Despite its age, it remains the leading operational air superiority and intercept platform in service today. The hi-tech wizardry of modern air combat detailed in this book makes for fascinating reading, even to those not immediately familiar with modern airpower, and a huge pool of previously unpublished information on both aircrafts' combat records is uncovered.

Italian Waters Pilot Jan 24 2022 Italian Waters Pilot is the only guide for yachtsmen in English that covers the coasts of the Tyrrhenian Sea, Sardinia, Sicily, the Ionian 'heel' and Malta in one volume. This new tenth edition builds on first-hand research by the authors through the Tuscan islands, along the Tyrrhenian and Ionian coasts, to Sardinia and Sicily, Malta and Gozo. Numerous revisions have been made throughout, with the text, plans and photographs undergoing a complete overhaul. Care has been taken to research the details of marina developments. Where it has been available information is given on proposed changes and extensions to yacht harbours. Marine reserves are now an important feature of the coasts and off-lying islands, particularly in Sardinia and Sicily, and this edition provides updated details of the latest regulations. Climate change and extreme weather events are becoming a major issue and this edition includes a section on the how climate change might affect sailing in the Mediterranean. Italian Waters Pilot is the last word on the area for yachts cruising there and on their way between western and eastern parts of the Mediterranean.

Glimpses of God's Grace Mar 14 2021 Have you ever met or even heard of a Christian fighter pilot? Now you have—I'm one. Come read about how an ordinary kid in a Navy family grew up to marry the toddler two doors down. Read about my teen years in Italy and how I, as a 130 lb. band geek, received a congressional appointment to the USAF Academy. Follow me through life as a cadet. Find out how we made our own fun with coke bottles, Frisbees, lighter fluid, super glue, a condom, a pillow case, and a lot of water. See pilot training from the perspective of the student and the instructor. Once I'm all trained up in the F-15, I'll strap you in with me. (It'll be a tight fit because there's only one seat and it's mine!) Together, we'll take my mission ready check ride and repeatedly spank Maverick and Goose in their F-14. Then we'll scramble to fly into the night sky and fly out over the dark Atlantic to intercept Soviet TU-95 Bear bombers patrolling our east coast during the Cold War. Then we'll join a 4-ship of Eagles to take on an unknown number or type of adversaries. See how our four jets did against six bad guys. During that fight we'll peel off to go 1 v 2 against F-16s. I push as close as I dare against the barriers that would make this book classified. When you see what God enabled that 130 lb. band geek to achieve; you'll get it: With God, nothing is impossible. But more importantly, see God's fingerprints on my life and let me challenge your thinking about His amazing grace.

Aging of U.S. Air Force Aircraft Feb 10 2021 Many of the aircraft that form the backbone of the U.S. Air Force operational fleet are 25 years old or older. A few of these will be replaced with new aircraft, but many are expected to remain in service an additional 25 years or more. This book provides a strategy to address the technical needs and priorities associated with the Air Force's aging airframe structures. It includes a detailed summary of the structural status of the aging force, identification of key technical issues, recommendations for near-term engineering and management actions, and prioritized near-term and long-term research recommendations.
