**Genetic Entropy & the Mystery of the Genome** Mar 17 2021 Dr. John Sanford, a retired Cornell Professor, shows in *Genetic Entropy and the Mystery of the Genome* that the Primary Axiom is false. The Primary Axiom is the foundational evolutionary premise - that life is merely the result of mutations and natural selection. In addition to showing compelling theoretical evidence that whole genomes can not evolve upward, Dr. Sanford presents strong evidence that higher genomes must in fact degenerate over time. This book strongly refutes the Darwinian concept that man is just the result of a random and pointless natural process.
