The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. **Blitzoid** Mar 29 2020 Blitzoid is a playful term, for how one feels when turning, or having turned. Wasted would be the same thing. It's that envious, coveted state of mind one hopes to reach by turning. There is a level of ThC buildup in the bloodstream, in which short term memory cells function at that final time, but are wiped clean of recall later. Alcohol achieves a similar effect on memory, at certain blood levels. Another suspect of memory disfunction, would be Post Traumatic Stress Disorder, and frontal lobe epilepsy. "We're burning braincells, man," would have been a good joke to laugh at, if it weren't so accurate, at certain blood levels in the brain, so far as is undefined. The pot of gold we were all seeking in the 60s and 70s, was that awareness of the sanctity of all things, either living or inanimate.
