Making up Numbers: A History of Invention in Mathematics Aug 01 2022 Making up Numbers: A History of Invention in Mathematics offers a detailed but accessible account of a wide range of mathematical ideas. Starting with elementary concepts, it leads the reader towards aspects of current mathematical research. The book explains how conceptual hurdles in the development of numbers and number systems were overcome in the course of history, from Babylon to Classical Greece, from the Middle Ages to the Renaissance, and so to the nineteenth and twentieth centuries. The narrative moves from the Pythagorean

insistence on positive multiples to the gradual acceptance of negative numbers, irrationals and complex numbers as essential tools in quantitative analysis. Within this chronological framework, chapters are organised thematically, covering a variety of topics and contexts: writing and solving equations, geometric construction, coordinates and complex numbers, perceptions of 'infinity' and its permissible uses in mathematics, number systems, and evolving views of the role of axioms. Through this approach, the author demonstrates that changes in our understanding of numbers have often relied on the breaking of long-held conventions to make way for new inventions at once providing greater clarity and widening mathematical horizons. Viewed from this historical perspective, mathematical abstraction emerges

as neither mysterious nor immutable, but as a contingent, developing human activity. Making up Numbers will be of great interest to undergraduate and A-level students of mathematics, as well as secondary school teachers of the subject. In virtue of its detailed treatment of mathematical ideas, it will be of value to anyone seeking to learn more about the development of the subject.

Islam, a Guide for Jews and Christians Feb 24 2022 This timely, exquisitely researched guide to Islam explores the defining characteristics of Islam, comparing Jesus to Muhammad, and covering a wide range of topics, including war, women, mysticism, and martyrdom. (Islam)

Over Bemerton's Sep 09 2020 Over Bemerton's, An Easy-Going Chronicle by Edward Verrall Lucas, first published in 1908, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which

has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

Man'yōshū (Book 5) Dec 25 2021 This is the second volume to be published in the 20-volume set. It includes 114 poems (104 tanka, ten choka), traditionally considered to be the zoka genre, although some of them can be classified as benka, since they deal with death and sorrow. It also contains two poems in Chinese.

Greco-Arab and Islamic Herbal Medicine Jul 20 2021 This book presents a systematic review on traditional Arab herbal medicine including historical background, medical innovations introduced by Arab physicians, common roots of Arab medicine and western medicine, methodology of drug discovery and

therapy in Arabic and Islamic medicine, a state-of-the-art description of traditional Arab herbal medicine, and evidence-based safety and efficacy of Arab and Islamic medicines. The usage of modern cell biological, biochemical, in vitro and in vivo techniques for the evaluation of medicinal plant safety and efficacy is also discussed. The toxicity of herbal formulations safety, quality assurances, and chemical analytical techniques are introduced in this book.

Firearms: An Illustrated History Jan 02 2020

This fascinating visual account of firearms shows everything from the earliest cannons to modern weapons of war. It also highlights how gun technology and military tactics developed in tandem over time. Centuries ago, the Chinese discovered that if they put gunpowder and a projectile into a metal tube and ignited it, they could fire the projectile with enormous force. The first guns were born. *Firearms: An Illustrated History* showcases over 300 firearms including pistols, revolvers, rifles, shotguns, machine-guns, and artillery, each with annotated close-up photographs and details of their origins, barrel, and caliber. It details the use of the firearms, not just in the military but for sport, hunting, and law enforcement. This comprehensive volume traces the history of firearms, highlighting "turning points" such as the rifle with its parallel spiraled grooves that could impart a spin to bullets making them fly straighter. It also showcases iconic firearms such as the Walther PPK self-loading pistol

popularised in James Bond films. With information on the great gunsmiths including Beretta and Kalashnikov and a detailed guide to how guns work, *Firearms: An Illustrated History* is an essential purchase for everyone interested in guns and military history.

Neoclassical Economic Theory, 1870 to 1930

Oct 23 2021 Warren J. Samuels Each book in this series explores the present status of its field in terms of where it is, how it got there, the existing tensions within the field, and something of how the field might develop in the future. Each book presumes that work in each field is neither settled nor unequivocal. Each book attempts to comprehend its field as an evolving, developmental process or set of efforts. This particular book, covering neoclassical economics, is the third of three in the field of the History of Economic Thought. The others are Pre-Classical Economic Thought, edited by S. Todd Lowry, and Classical Political Economy, edited by William O. Thweatt. Each one conducts the same kind of analysis as the others in the series, with the understanding that here we are dealing with the history of interpretation, rather than a substantive body of analysis of a certain aspect of the economy: for example, labor or international trade. (That understanding must be complex and subtle, inasmuch as revision of interpretation of earlier

ideas is part of the process-both cause and consequence-of re-analyzing the economy.) In this group we are interested in how recent and contemporary writers have interpreted the history of economic thought differently, both among themselves and from earlier writers. 1 NEOCLASSICAL ECONOMIC THEORY 2 Several topics must be discussed to place such work in perspective, in part as it is here applied to the history of the interpretation of neoclassical economics.

The Entry of the Slavs Into Christendom

Apr 28 2022 Dr Vlasto reviews the early history of the various Slav peoples (from about AD 500 onwards) and traces their gradual emergence as Christian states within the framework of either West or East European culture. Special attention is paid to the political and cultural rivalry between East and West for the allegiance of certain Slav peoples, and to the degree of cultural exchange within the Slav world, associated in particular with the use of the Slav liturgical language. His examination of all the Slav peoples and extensive use of original source material in many different languages enables Dr Vlasto to give a particularly comprehensive study of the subject.
