Kriegsmarine Coastal Forces Dec 07 2020 Although often overlooked in favour of the U-boats or battleships, the vast majority of the Kriegsmarine was formed of the smaller vessels of the coastal forces. These ships and boats, which included minesweepers, torpedo boats, patrol boats, and blockade breakers, gave crucial service to Germany during the war, and many continued serving for decades after the surrender in such tasks as clearing minefields. Also included in these forces was Hitler's yacht, the Ostwind. This book reveals the history of the vessels that formed the backbone of the Kriegsmarine, and combines fascinating anecdotes, detailed technical information, and full-colour artwork.

There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles.
