The Human Thinking System User's Manual Feb 08 2021 Building on the time-tested, reality-based discipline of general semantics, Olek Netzer provides a guide for clear and critical thinking, a guide for the perplexed that steers individuals in the direction of enhanced rationality and improved evaluation of our experiences, environments, and ourselves. His concern is with both our psychological well being and our societal health, as he addresses interpersonal relations as well as political persuasion and propaganda, drawing on some of the most important thinkers of the past century Lance Strate, President of the Institute of General Semantics, Professor of Communication and Media Studies at Fordham University.

Visual Information For Everyday Use Apr 10 2021 Creating graphical communication for public use represents both a large industry and a fertile area for thoughtful and innovative research and development. In this collection some of the world's figures within the interdisciplinary field of public graphics have been brought together to share their wisdom and present a look at this exciting world. This text is divided into a number of sections representing the rich diversity of concerns embraced by visual information designers. The first section is devoted to these foundational issues before moving on to particular domains of interest within public graphics: user instructions; warnings; forms; tables and graphs; maps and plans; way-finding information; and graphic symbols. This book is designed as a companion for anyone concerned with visual information design, particularly in the context of everyday use. Contributions are included from ergonomists, psychologists, commercial designers and health and safety professionals. The audience reflects these contributions and is pitched at a level which allows it to provide both practical guidelines and a rigorous academic understanding of the field.

Scientific and Technical Aerospace Reports Feb 26 2020

Quality of technical documentation Sep 15 2021 User manuals, reference guides, project documentation, equipment specifications and other technical documents are increasingly subjected to high quality standards. However, it is not clear whether research efforts are keeping pace with this increasing importance of documentation quality. This volume includes studies from researchers as well as practitioners, exemplifying three approaches towards document quality:• Product-orientation, with an eye for usability in various manifestations such as tutorials, concept definitions, tools for users of documentation to find information, methods of eliciting user feedback, and cultural differences;• Process-orientation, in which the quality of technical documentation is regarded as an outgrowth of a process involving sub-steps such as storyboarding, pre-testing and use of automation tools in writing and producing documents;• Professional orientation, in which attention is focused on those who create technical documentation.The volume will be of interest to a broad audience of writers, managers and trainers with technical and non-technical backgrounds, such as: quality managers; communication managers; technical communicators; trainers in computer usage; teachers, researchers and students of (technical) communication.

Guidelines for Reporting Health Research Mar 29 2020 Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear, transparent, and useful reports. This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting, the characteristics of good guidelines, and how to use reporting guidelines effectively in reporting health research. This hands-on manual also describes over a dozen internationally recognised published guidelines such as CONSORT, STROBE, PRISMA and STARD in a clear and easy to understand format. It aims to help researchers choose and use the correct guidelines for reporting their research, and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading. Written by the authors of health research reporting guidelines, in association with the EQUATOR (Enhancing the QUAlity and Transparency Of health Research) Network, Guidelines for Reporting Health Research is a helpful guide to producing publishable research. It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers.

Design, User Experience, and Usability: Web, Mobile, and Product Design Dec 26 2019 The four-volume set LNCS 8012, 8013, 8014 and 8015 constitutes the proceedings of the Second International Conference on Design, User Experience, and Usability, DUXU 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 83 papers included in this volume are organized in the following topical sections: DUXU in business and the enterprise, designing for the Web experience; product design; information and knowledge design and visualisation; and mobile applications and services.

The OpenVMS User's Guide Sep 03 2020 Completely updated and revised, The OpenVMS User's Guide continues to be the prime resource for new and non-technical users on how to use OpenVMS and customize it to their working environment. For more proficient users, the book serves as a quick look-up reference. The book begins with an introduction to the OpenVMS operating system and its built-in functions, and then provides a thorough explanation of OpenVMS files and directories, use of DCL, and how to edit files using EVE and EDT. It also discusses how to create command procedures and the Mail and Phone utilities. New to this edition are additional insights into application development and sending e-mail to remote notes via the Internet, remote logins and file transfers. Each chapter is liberally sprinkled with learning aids including summaries and tables of commands, exercises, and review quizzes. Completely covers the OpenVMS operating system - from logging in to creating command procedures, with thorough discussions of files and directories Covers both EVE and EDT editors in detail Shows how to customize your working environment

Weaving Self-evidence Jul 21 2019 The development of theorems in logic is generally thought to be a solitary and purely cerebral activity, and therefore unobservable by sociologists. In Weaving Self-Evidence, French sociologist Claude Rosental challenges this notion by tracing the history of one well-known recent example in the field of artificial intelligence--a theorem on the foundations of fuzzy logic. Rosental's analyses disclose the inherently social nature of the process by which propositions in logic are produced, disseminated, and established as truths. Rosental describes the different phases of the emergence of the theorem on fuzzy logic, from its earliest drafts through its publication and diffusion, discussion and reformulation, and eventual acceptance by the scientific community. Through observations made at major universities and scholarly conferences, and in electronic forums, he looks at the ways students are trained in symbolic manipulations and formal languages and examines how researchers work, interact, and debate emerging new ideas. By carefully analyzing the concrete mechanisms that lead to the collective development and corroboration of proofs, Rosental shows how a logical discovery and its recognition within the scholarly community are by no means the product of any one individual working in isolation, but rather a social process that can be observed and studied. Weaving Self-Evidence will interest students and researchers in sociology and the history and philosophy of science and technology, and anyone curious about how scientists work.

Jade Writing Aug 22 2019 The Modern Interpretation of an Ancient Internal Alchemy Manual"Yellow Court Classic" (or "Jade Writing", as the text refers to itself) is one of the core classic manuscripts of the Taoist cannon. Even though this Third Century text has been extensively used in the Alchemy Practice in China (especially in the Highest Purity school) and referenced in many later classics (such as "The Secret of the Golden

Flower", by Lu Dong Bin), the present book presents its first full translation to English. The term "Yellow Court" literary means the central area of the Emperor "s Castle, that is open to the Heaven above and connects the Chambers of different Ministries of the Country. Its multifaceted symbolic meaning indicates, in different contexts, center of the body (Dan Tian), spleen as the center of five main viscera (in Traditional Chinese Medicine), a whole human body, or even the overall potentials of the manifestation of the Individual, that includes his or her field of interaction with an environment. This Manuscript provides detailed meditation and visualization instructions, and should be, according to Taoist lore, recited by a practitioner (original Chinese verses, also provided in the current book, sound very melodic) until understood and integrated thoroughly. An adept practitioner would thus develop deep understanding of the own physical and mental functions and abilities to correct and cultivate them to a higher perfection, or according to text: "Dispense thousand troubles and heal hundred diseases, become immune even to fierceness of a tiger and cruelty of wolves and capable to refuse the aging forever". The translation and commentary of the text, developed for the purpose of personal practice, is very contemporary and concentrated on the philosophical understanding and practical use in modern times (commentaries take into account some latest scientific views of the Universe) rather than religious, historical or aesthetic aspects of the work. As the full Chinese version (along with Pinyin and word-by-word English translation) of the ancient manuscript is provided, every reader should be also able to an independent study and discover the benefits according to the own, unique aspirations.

Encyclopedia of Library and Information Science Oct 04 2020 "The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set---written by 1300 eminent, international experts---offers librarians, information/computer scientists, bibliographers, documentalists, systems analysts, and students, convenient access to the techniques and tools of both library and information science. Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field. The self-contained Supplements (each Supplement contains A-Z coverage) highlight new trends, describe the latest advances, and profile key people making critical contributions to the field. Recent individual Supplements considered topics such as Archival Science to User Needs Concept-Based Indexing and Retrieval of Hypermedia Information to Using Self-Checkout Technology to Increase Productivity and Patron Service in the Library Artificial Intelligence and Machine Learning Approach to Fraud Investigation to Visual Search in Modern Human-Computer Interfaces Supplement Volumes 36-61 are available; additional supplements in preparation."

Micro Saint Sharp User Manual v3_8 Apr 22 2022 Micro Saint Sharp is a general purpose, discrete-event simulation software tool. Micro Saint Sharp's intuitive graphical user interface and flow chart approach to modeling make it a tool that can be used by generalists as well as simulation experts. Micro Saint Sharp has proven to be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry. The user manual has been updated for software version 3.8. Some new features are the ability to add swim lanes to any network background, data exchange capability with the UML/SysML tool MagicDraw, and a updated version of the built-in OptQuest optimization.

Life May 11 2021 In this ingenious book Perec creates an entire microcosm in a Paris apartment block. Serge Valene wants to make an elaborate painting of the building he has made his home for the last sixty years. As he plans his picture, he contemplates the lives of all the people he has ever known there. Chapter by chapter, the narrative moves around the building revealing a marvellously diverse cast of characters in a series of every more unlikely tales, which range from an avenging murderer to an eccentric English millionaire who has devised the ultimate pastime...
