*Global Business Regulation* Aug 17 2021 Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a

education constitutes the first in a series of thematic comparative reports bringing together findings from the OECD School Resources Review. School systems have limited financial resources with which to pursue their objectives and the design of school funding policies plays a key role in ensuring that resources are directed to where they can make the most difference. As OECD school systems have become more complex and characterised by multi-level governance, a growing set of actors are increasingly involved in financial decision-making. This requires designing funding allocation models that are aligned to a school system's governance structures, linking budget planning procedures at different levels to shared educational goals and evaluating the use of school funding to hold decision makers accountable and ensure that resources are used effectively and equitably. This report was co-funded by the European Commission. .

'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. ### **The Lightmaker's Manifesto** May 26 2022

Many of us have strong convictions. We want to advocate for causes we care about--but which ones? We want to work for change--but will the emotional toll lead to burn out? Leadership coach, lawyer, photographer, and activist Karen Walrond knows that when you care deeply about the world, light can seem hard to find. But when your activism grows out of your joy--and vice versa--you begin to see light everywhere. In The Lightmaker's Manifesto, Walrond helps us name the skills, values, and actions that bring us joy; identify the causes that spark our empathy and concern; and then put it all together to change

or getting married, our decisions are governed by implicit predictions of how things are likely to turn out. The problem is, we're not very good at it. In a landmark, twenty-year study, Wharton professor Philip Tetlock showed that the average expert was only slightly better at predicting the future than a layperson using random guesswork. Tetlock's latest project - an unprecedented, government-funded forecasting tournament involving over a million individual predictions - has since shown that there are, however, some people with real, demonstrable foresight. These are ordinary people, from former ballroom dancers to retired computer programmers, who have an extraordinary ability to predict the future with a degree of accuracy 60% greater than average. They are superforecasters. In *Superforecasting*, Tetlock and his co-author Dan Gardner offer a fascinating insight into what we can learn from this elite group. They show the methods used by these superforecasters which enable them to

[A Field Guide for Female Interrogators](#) Feb 29 2020 The world was shocked by the images that emerged from Abu Ghraib, the US-controlled prison in Iraq. Lynndie England, the young female army officer shown smiling devilishly as she humiliated male prisoners, became first a scapegoat and then a victim who was "just

following orders." Ignored were the more elemental questions of how women are functioning within conservative power structures of government and the military. Why do the military and the CIA use female sexuality as an interrogation tactic, and why is this tactic downplayed and even ignored in internal investigations of prisoner abuse? Combining an art project with critical commentary, Coco Fusco imaginatively addresses the role of women in the war on terror and explores how female sexuality is being used as a weapon against suspected Islamic terrorists. Using details drawn from actual accounts of detainee treatment in US military prisons, Fusco conceives a field guide of instructional drawings that prompts urgent questions regarding the moral dilemma of torture in general and the use of female sexuality specifically. Fusco assesses what these matters suggest about how the military and the state use sex, sexuality, and originally feminist notions of sexual freedom.

Edible Insects Sep 25 2019 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and

support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.
