*The Big Hurt* Aug 28 2019 This complex memoir shows what it was like growing up in the shadow of a literary father and a neglectful mother, getting thrown out of boarding school after being seduced by a teacher, and all of the later-life consequences that ensue. In 1982, Erika Schickel was expelled from her East Coast prep school for sleeping with a teacher. She was that girl—rebellious, precocious, and macking for love. Seduced, caught, and then whisked away in the night to avoid scandal, Schickel's provocative, searing, and darkly funny memoir, *The Big Hurt*, explores the question, How did that girl turn out? Schickel came of age in the 1970s, the progeny of two writers: Richard Schickel, the prominent film critic for TIME magazine, and Julia Whedon, a melancholy mid-list novelist. In the wake of her parents' ugly divorce, Erika was packed off to a bohemian boarding school in the Berkshires. The Big

Hurt tells two coming-of-age stories: one of a lost girl in a predatory world, and the other of that girl grown up, who in reckoning with her past ends up recreating it with a notorious LA crime novelist, blowing up her marriage and casting herself into the second exile of her life. The Big Hurt looks at a legacy of shame handed down through a maternal bloodline and the cost of epigenetic trauma. It shines a light on the haute culture of 1970s Manhattan that made girls grow up too fast. It looks at the long shadow cast by great, monstrously self-absorbed literary lives and the ways in which women pin themselves like beautiful butterflies to the spreading board of male ego.

*Paris Under the Occupation* Jul 28 2019 As Hitler armed in the mid-1930s, Europe prepared for war. With its sophisticated series of fortifications called the Maginot Line, France expected to thwart any

rapid German advance from the east so that, with England, the countries could fight an updated version of their World War I experience. But Hitler's blitzkrieg ("lightning war") tactics, based upon rapid tank and troop movements, overran the powerful French army. In 1940 France fell in just six weeks. Churchill's anticipated bulwark against Nazi aggression on the continent disappeared as Hitler marched into Paris, the city

largely intact. For more than four years, France lived under a German occupation that reinforced its shame and sapped its energies. Afterward, the renowned French philosopher Jean-Paul Sartre attempted to explain France's experience under the occupation and repair the nation's now tarnished reputation.
