A Holy Nothingness Feb 02 2020 A Holy Nothingness details the remarkable odyssey

of traveling the inner terrain through the use of creativity and the imagination. By engaging in a practice she now calls Creative Tantra, the author slowly dissolved the threshold between the unconscious and the conscious mind. As a result, the life-giving waters of the unconscious rushed in with a collection of personal and universal images. These images were so brilliant and captivating that her awareness sank deeper and deeper into the boundless unconscious of the psyche. The deeper awareness went, the more she dissolved the boundaries within until she became witness to and united with a holy nothingness, that sacred emptiness from which this One Life flows. Dissolving the boundaries within meant deepening into the cradle of creativity, discovering the deepest part of her being, and crossing a different kind of ocean - the inner one. In an age where meditation, yoga, and other inward searching practices have become popular, anyone who also has a regular practice of creativity such as writing, painting, sculpting, or dancing might experience the powerful forces of the unconscious and find guidance, insight, and support in this book.

**Temporal and Spatial Patterns in Carbonate Platforms** Sep 30 2019 Combining field research of outcrop geology and investigating the recent formation of carbonate rocks in coastal environments the author gives an introduction in sequence stratigraphy. Using computer simulations the book focuses on four questions, regarding the geometry of carbonate wedges, sequences comparable with geotectonic cycles, their influence by geoidal pulses and the determination of these geoidal pulse distribution in geological time. Examples from the Alps and Florida show that ramps and divergent patterns, megabreccias, drowning of carbonate platforms etc. are results of global short-term sea level falls, interpreted as geoidal eustasy. This volume will be a fruitful supplement for the interpretation and understanding of sequence stratigraphic sections not only for scientists and students but also for researchers in the oil and gas industry.

Metacognition and Successful Learning Strategies in Higher Education May 07 2020

Metacognition plays an important role in numerous aspects of higher educational learning strategies. When properly integrated in the educational system, schools are better equipped to build more efficient and successful learning strategies for students in higher education. *Metacognition and Successful Learning Strategies in Higher*

Education is a detailed resource of scholarly perspectives that discusses current trends in learning assessments. Featuring extensive coverage on topics such as spiritual intelligence strategies, literacy development, and ubiquitous learning, this is an ideal reference source for academicians, graduate students, practitioners, and researchers who want to improve their learning strategies using metacognition studies.

Towards Equity in Global Communication Aug 22 2021 This collection focuses on the issues of equity and equality in communication on the international or global level. It includes an evaluation of the recommendations of the MacBride Report in terms of their significance for the contemporary world.

**Towards Holistic Management** Sep 10 2020 Many in management circles today are looking towards a deeper and higher vision of business, some openly talking about spirituality in business. These quotes from Sri Aurobindo and the Mother's numerous works deal with the hard bottomline factors like materials and money, as well as soft factors like people, vision and values.

**Beyond CLIL** Jan 15 2021 If education is to prepare learners for lifelong learning, there needs to be a shift towards deeper learning: a focus on transferable knowledge and problem-solving skills alongside the development of a positive or growth mindset. In this book, a follow up to CLIL, the authors review new developments in the

understanding of the interface between language and learning, and propose an original new 'pluriliteracies' approach which refines and develops current thinking in CLIL. It aims to facilitate deeper learning through an explicit focus on disciplinary literacies, guiding learners towards textual fluency, encouraging successful communication across cultures, and providing a key stepping-stone towards becoming responsible global citizens. It both provides strong theoretical grounding, and shows how to put that understanding into practise. Engaging and practical, this book will be invaluable to both academics and education practitioners, and will enable conventional classrooms to be transformed into deeper learning ecologies.

### **eThekwini's Green and Ecological Infrastructure Policy Landscape Jul 01 2022**

This book offers the reader a deeper understanding of the eThekwini Metropolitan Municipality's green and ecological infrastructure policy landscape. The author utilises the PULSE3 analytical framework to conduct an in-depth examination and to show how experts frame and implement the municipality's green and ecological infrastructure strategies and projects. Although the initial purpose of this book was to investigate the role of green and ecological infrastructures in eThekwini's water security aspirations, the author realised that climate change adaptation and mitigation play a more central role in motivating the municipality to develop and implement such science-driven

projects. To be sure, science that is informed by a positivist paradigm, guides how, where and when the municipality should develop green and ecological infrastructures. Furthermore, a positivistic stance is generated in this policy landscape, where science and politics meet at a local government level, and the book offers an insight into the science-policy interface, as well as the normative and value orientations that positivism often ignores. The book also shows the usefulness of the PULSE3 framework and how it can assist scientists in all fields to gain a deeper understanding of the complications that are faced by humankind. This book fills a market gap by providing a view of how scientists think about problems and how to solve them by using established paradigms and theories.

**Deep-sea Corehead Camera Photography and Piston Coring** Jun 27 2019 Cameras were mounted in a newly designed corehead of a piston corer and used to photograph coring operations during 36 stations on CHAIN cruise 75 and 28 stations on ATLANTIS II cruise 42. Through the analysis of these photographs, the deep-water operation of a piston corer during its descent, tripping, impact with the bottom, and ascent has been studied, providing information on the corer's stability, effectiveness in obtaining a bottom sample, and influence on the nearby sea-floor. Accurate determinations of the amount of penetration were possible, allowing comparisons to be

made with the more indirect methods of determining penetration and with the length of core recovered. Sediment clouds produced by bottom currents were noticed in many of the bottom photographs. A number of suggestions are made for future piston coring operations. (Author).

*Abstracts of Manuscripts Submitted in 1989 for Publication* Jan 03 2020 This volume contains the abstracts of manuscripts submitted for publication during calendar year 1989 by the staff and students of the Woods Hole Oceanographic Institution. We identify the journal of those manuscripts which are in press or have been published. The volume is intended to be informative, but not a bibliography. The abstracts are listed by title in the Table of Contents and are grouped into one of our five departments, marine policy, or the student category. An author index is presented in the back to facilitate locating specific papers.

**In Quest of the Deeper Self** Sep 22 2021 "What doesn't kill me only makes me stronger." A Joyous Adventure. We are all on a sacred journey of life. Appreciation of its beauty becomes a natural consequence to the dive towards the Deeper Self in us. This book deals with both the esoteric and practical aspects of our venerable journey. It puts forth pensive pointers for reflection and self-awareness. Human beings are externalized - hooked on to the outer aspects of life such as material possessions, fame,

identification with a nation, religion or the like, and so on. This is creating a lot of unhappiness to the individual and, therefore, to humanity as a whole. Those who realize this begin to turn inward and indulge in "Athma Vichara" - the Soul Search. "In Quest of The Deeper Self" functions as a wayside companion to them. The noisy mind and its obstruction to the inner dive are brought out clearly. Movement towards the inner silence is portrayed as the essential feature in the quest for the Deeper Self. In the process of this movement, a pervasive background serenity is discovered. To lead one's daily life from that serenity somehow makes it all very meaningful. A number of cryptic paradigms are given to highlight the key aspects of the inward journey. Personal and planetary transformations are looked into as also the deceptive pursuit of individual salvation. While presenting issues for serious reflection, this book puts forth a rather uncommon pointer that frivolity and light-hearted attitudes play a healthy role in the movement towards the Deeper Self. Such legendary figures as Sherlock Holmes and Tarzan too perform their little dances in this presentation. Enjoy the book and the journey towards the Self!

**Destined for Growth** May 31 2022

**Enlightening Of Perspectives - (A Deep Check Towards Reality)** Dec 26 2021 Most of us might have suffered a lot in silence. Sometimes we must have also misunderstood

people, places, circumstances, and even destiny as well. “Pessimistic thoughts are devilish whereas an optimistic mindset is the real intrinsic asset behind a fruitful outcome.” Problems, obstacles, and the agony a person has can be of many reasons. The Mindful fact that one has to recognize the consequences and must be aware of real life glorifies a person’s living by application of his/her broadened intellect. Life is not just about being professional or just being personal. It is a combination of both. You will endure and learn in every aspect. In fact, without learning and without having visionary perception there will be something that seems to be missing or empty in life. Keeping in mind everyone and every single thing, Author Asra Noorin has written this book in a very simplified language with the usage of clear vocabulary that it should be very easier for her readers to understand. Asra has specifically added her impact of words in everything she has written in connection to the reality everybody faces. This book is going to connect you with emotions, motivation, and guidance throughout. The reality is going to hit you deep and you will be certainly moved by the way the author has depicted it. Asra has also written 10pages of this book in Telugu and Hindi language trying to make her words reach effectively into the hearts of people.

**Towards a Deeper Understanding of Consciousness** Aug 02 2022 In the World Library of Psychologists series, international experts themselves present career-long

collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major practical theoretical contributions. In this volume Max Velmans reflects on his long-spanning and varied career, considers the highs and lows in a brand new introduction and offers reactions to those who have responded to his published work over the years. This book offers a unique and compelling collection of the best publications in consciousness studies from one of the few psychologists to treat the topic systematically and seriously. Velmans approach is multi-faceted and represents a convergence of numerous fields of study culminating in fascinating insights that are of interest to philosopher, psychologist and neuroscientist alike. With continuing contemporary relevance, and significant historical impact, this collection of works is an essential resource for all those engaged or interested in the field of consciousness studies and the philosophy of the mind. "

*Pursuit* Nov 12 2020 Oh, that God would show us the emptiness and vanity of this present world! We still have eternity to come face-to-face with God's judgment-judgment that will bring into account every secret thing we have done. How can we be so deceived, so lost, and so focused on our short time here on earth? My desire is for us to live this life in a way that we invest in eternity. In *Pursuit*, author Ruth Conlon urges her readers to pursue a passionate and active relationship with God. The book will draw

believers into a deeper, more intimate relationship with God. Ruth sheds biblical light on topics such as obedience, prayer, and legalism that will spur readers to run after God in a fervent and determined way. Pursuit will inspire readers to dig deep into God's Word and fervently pursue Him in prayer and fasting. In Pursuit students of the Bible will have the tools to develop the kind of relationship that will enable them to keep their lamps filled with oil so they will be ready when the Bridegroom comes again. Anyone who longs for a profound relationship with Jesus will be well equipped to do so after reading Pursuit.

**Towards Deeper Understanding of Al-Quran** Aug 29 2019

**Smithsonian Contributions to Knowledge** Oct 31 2019

**Desiring God** Apr 17 2021 Insightful and heart-warming, this classic book is written for those who seek to know God better. It unfolds life-impacting, biblical truths and has been called a "soul-stirring celebration of the pleasures of knowing God."

**Five Points** Nov 24 2021 Grace is the heart of God to do you good when you deserve it least. But do we really know how deeply we don't deserve it? Only God can reveal that to us. He does it through the Bible. And when he does, the wonders of his grace explode with brightness as never before. These Five Points are about how Christians come into being, and how we are kept forever. It reaches back into times past when we

were freely chosen. It reaches forward into the future when we will be safe and happy forever. It reaches down into the mysteries of the work of Christ, purchasing the gift of faith for all God's children. And it reaches into the human soul, glimpsing the mysteries of the Spirit's work as he conquers all our rebellion and makes us willing captives of King Jesus. Piper believes that our experience of grace grows with our grasp of God's gracious work. He invites us to come with him on this quest.

**Beyond CLIL** Jul 21 2021 Offers an innovative, holistic and evidence-based pedagogic approach to deeper learning for all subjects of schooling.

*Deep Learning to See* Jun 19 2021 The remarkable progress in computer vision over the last few years is, by and large, attributed to deep learning, fueled by the availability of huge sets of labeled data, and paired with the explosive growth of the GPU paradigm. While subscribing to this view, this book criticizes the supposed scientific progress in the field, and proposes the investigation of vision within the framework of information-based laws of nature. Specifically, the present work poses fundamental questions about vision that remain far from understood, leading the reader on a journey populated by novel challenges resonating with the foundations of machine learning. The central thesis is that for a deeper understanding of visual computational processes, it is necessary to look beyond the applications of general purpose machine learning

algorithms, and focus instead on appropriate learning theories that take into account the spatiotemporal nature of the visual signal. Topics and features: Presents a curiosity-driven approach, posing questions to stimulate readers to design novel computational models of vision Offers a rethinking of computer vision, arguing for an approach based on vision in nature, versus regarding visual signals as collections of images Provides an interdisciplinary commentary, aiming to unify computer vision, machine learning, human vision, and computational neuroscience Serving to inspire and stimulate critical reflection and discussion, yet requiring no prior advanced technical knowledge, the text can naturally be paired with classic textbooks on computer vision to better frame the current state of the art, open problems, and novel potential solutions. This unique volume will be of great benefit to graduate and advanced undergraduate students in computer science, computational neuroscience, physics, and other related disciplines.

**Annual Report ...** Aug 10 2020

*Growing Deeper* Dec 14 2020 ARE YOU LOOKING FOR A TOOL TO HELP STRENGTHEN YOUR RELATIONSHIP WITH GOD? Refresh your heart, mind and soul with this daily spiritual journal that helps answer the desire for something to help strengthen your intimacy with God. Discover this inspirational user-friendly devotional to engage your faith on a very personal level. Every day provides a portion of Scripture

to meditate on and a challenge that can be directly applied to your life. Once you've studied God's Word, there are questions and specific actions to help challenge you to put feet to your faith. You'll also be provided ample journaling space to record your thoughts and how God is teaching and drawing your heart into a relationship with Him. This journal is designed to renew your soul, strengthen and develop deep roots in your faith and then take your faith to the streets to apply your faith in the world. So, let's jump in, dive deeper and start living out what you believe.

**Machine Learning Paradigms** Mar 17 2021 At the dawn of the 4th Industrial Revolution, the field of Deep Learning (a sub-field of Artificial Intelligence and Machine Learning) is growing continuously and rapidly, developing both theoretically and towards applications in increasingly many and diverse other disciplines. The book at hand aims at exposing its reader to some of the most significant recent advances in deep learning-based technological applications and consists of an editorial note and an additional fifteen (15) chapters. All chapters in the book were invited from authors who work in the corresponding chapter theme and are recognized for their significant research contributions. In more detail, the chapters in the book are organized into six parts, namely (1) Deep Learning in Sensing, (2) Deep Learning in Social Media and IOT, (3) Deep Learning in the Medical Field, (4) Deep Learning in Systems Control,

(5) Deep Learning in Feature Vector Processing, and (6) Evaluation of Algorithm Performance. This research book is directed towards professors, researchers, scientists, engineers and students in computer science-related disciplines. It is also directed towards readers who come from other disciplines and are interested in becoming versed in some of the most recent deep learning-based technological applications. An extensive list of bibliographic references at the end of each chapter guides the readers to probe deeper into their application areas of interest.

Towards a General Theory of Deep Downturns May 19 2021 Joseph Stiglitz examines the theory behind the economic downturns that have plagued our world in recent times. This fascinating three-part lecture acknowledges the failure of economic models to successfully predict the 2008 crisis and explores alternative models which, if adopted, could potentially restore a stable and prosperous economy.

**Towards a Deeper Understanding of Consciousness** Nov 05 2022 In the World Library of Psychologists series, international experts themselves present career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major practical theoretical contributions. In this volume Max Velmans reflects on his long-spanning and varied career, considers the highs and lows in a brand new introduction and offers reactions to those who have responded to his published work over the years. This book offers a unique and compelling collection of the best publications in consciousness studies from one of the few psychologists to treat the topic systematically and seriously. Velmans' approach is multi-faceted and represents a convergence of numerous fields of study – culminating in fascinating insights that are of interest to philosopher, psychologist and

neuroscientist alike. With continuing contemporary relevance, and significant historical impact, this collection of works is an essential resource for all those engaged or interested in the field of consciousness studies and the philosophy of the mind.

*Towards a Deeper Understanding of the Photodynamics of UV Filters for Sunscreen Applications, Using Ultrafast Spectroscopy and Complementary Analytical Techniques*  
Jan 27 2022

*A Contribution to American Thalassography* Apr 05 2020

*Towards Deep Understanding Of Elementary School Mathematics: A Brief Companion For Teacher Educators And Others* Feb 25 2022 The book is intended to serve as a brief companion for mathematical educators of elementary teacher candidates who learn mathematics within a college of education both at the undergraduate and graduate levels. Being informed by mathematics teaching and learning standards of the United States, Australia, Canada, Chile, England, Japan, Korea, Singapore, and South Africa, the book can be used internationally. The teaching methods emphasize the power of visualization, the use of physical materials, and support of computer technology including spreadsheet, Wolfram Alpha, and the Geometer's Sketchpad. The basic ideas include the development of the concepts of number, base-ten system, problem solving and posing, the emergence of fractions in the context of simple real-life activities

requiring the extension of whole number arithmetic, decimals, percent, ratio, geoboard geometry, elements of combinatorics, probability and data analysis. The book includes historical aspects of elementary school mathematics. For example, readers would be interested to know that two-sided counters stem from the binary system with its genesis in the 1st millennium BC China of which Leibnitz (17th century) was one of the first notable proponents. The genesis of the base-ten arithmetic is in the Egyptian mathematics of the 4th millennium BC, enriched with the positional notation with the advent of Hindu-Arabic numerals in the 12th century Europe.

Treading the Tightrope Sep 03 2022

*Towards Deep Subjectivity* Jun 07 2020

**The European Union's Common Agricultural Policy Reforms** Oct 12 2020 This book engages in the controversies of the European Union's Common Agricultural Policy (CAP) reforms, demonstrating how these are reiterated by mainstream theoretical approaches in the field. The reforms that the European Union's CAP underwent during the last three decades were intended to make it less trade-distorting, more taxpayer-friendly and more able to meet the new challenges of environmental concerns and rural development/territorial cohesion. The outcome of the reforms has, however, contradicted these objectives, with the controversies being reiterated by the

mainstream theoretical approaches in the field. European Union's Common Agricultural Policy Reforms argues that these controversies are due to reductionist, rationalist and idealist assumptions with regard to the object of inquiry applied by mainstream approaches. It proposes an alternative critical approach that takes into account the role of real material factors. Critical realism is not just an alternative explanation of CAP reforms but an alternative theory of how explanations can be made, which enables readers to reflect upon and endorse the results of existing lines of research in proceeding towards deeper level theory.

A Contribution to American Thalassography: Equipment of the Blake Mar 05 2020

**Deeper City** Dec 02 2019 Deeper City is the first major application of new thinking on 'deeper complexity', applied to grand challenges such as runaway urbanization, climate change and rising inequality. The author provides a new framework for the collective intelligence – the capacity for learning and synergy – in many-layered cities, technologies, economies, ecologies and political systems. The key is in synergistic mapping and design, which can move beyond smart 'winner-takes-all' competition, towards wiser human systems of cooperation where 'winners-are-all'. Forty distinct pathways 'from smart to wise' are mapped in Deeper City and presented for strategic action, ranging from local neighbourhoods to global finance. As an atlas of the future,

and resource library of pathway mappings, this book expands on the author's previous work, *City-Region 2020*. From a decade of development and testing, *Deeper City* combines visual thinking with a narrative style and practical guidance. This book will be indispensable for those seeking a sustainable future – students, politicians, planners, systems designers, activists, engineers and researchers. A new postscript looks at how these methods can work with respect to the 2020 pandemic, and asks, 'How can we turn crisis towards transformation?'
