Transmission Feb 21 2022 The essays in this volume investigate the impact of all media, including the emerging technologies, on the social, cultural, economic and political climate in the context of aesthetic values, and issues of gender, race and class. *Transmission* examines the array of forces moving the contemporary video landscape forward, comparing the past with the present as well as the future as it looks at the impact of video on commercial television, the relationship of media to the social causes it (mis)represents and the effects of new communication tools on participating constituents.

World-Wide-Walks Dec 10 2020 This book presents Peter d'Agostino's World-Wide-Walks project, providing a unique perspective on walking practices across time and place considered through the framework of evolving technologies and changes in climate. Performed on six continents during the past five decades, d'Agostino's work lays a groundwork for considering walks as portals for crossing natural, cultural and virtual frontiers. Broad in scope, it addresses topics ranging from historical concerns including traditional Australian Aboriginal rites of passage and the exploits of explorers such as John Ledyard, to artists' walks and related themes covered in the mass media in recent years. D'Agostino's work shows that the act of walking places the individual within a world of empirical awareness, statistical knowledge, expectation and surprise through phenomena like anticipating unknown encounters around the bend. In mediating the frontiers of human knowledge, walking and other forms of exploration remain a critical means of engaging global challenges, especially notable now as environmental boundaries are undergoing radical and potential cataclysmic change.

Fighting over Words Dec 22 2021 Most people fight over something or other and language is usually at

the very center of the conflict. Often the way we use language is the cause of the battle. There are many areas in which fighting about language can be observed but civil law cases offer the most fertile examples of this warfare over words. What did the contract actually say? Was there deception in the advertising? Was the warning label clear and effective? Did the company evidence race or age discrimination against employees or customers? Was one company's name too similar to that of another company? Did the corporation plagiarize the work of another? Did it fraudulently represent what its work? This book is about the ways linguistic analysis describes, exposes, and aids disputes in 18 civil cases where language framed the battleground. Roger Shuy, a well-known forensic linguist and consultant, shows how the skills of linguistic analysis can help resolve disputed meanings, while also showing how civil cases can prove to be fertile ground for linguistic scholarship. He does this by collecting and analyzing cases involving contracts, trademark disputes, advertisements, product liability, copyright infringement, discrimination, trademark disputes, and fraud controversies. In each case he employs all the tools of formal linguistics to show how it can be as helpful as other physical sciences in resolving legal disagreements. The work will be of interest primarily to linguists -- sociolinguists, forensic linguists, and scholars and students of law and society -- as well as lawyers and law students.
