**Medieval Combat Jun 19 2019 "[A] remarkable how-to . . . offers freeze-frame instructions on medieval martial arts using swords, shields, poleaxes, daggers and wrestling" (Publishers Weekly). Written by German fencing master Hans Talhoffer in 1467, this book illustrates the intricacies of the medieval art of fighting, covering both the "judicial duel" (an officially sanctioned fight to resolve a legal dispute) and personal combat. Combatants in the Middle Ages used footwork, avoidance, and the ability to judge and manipulate timing and distance to exploit and enhance the sword's inherent cutting and thrusting capabilities. These skills were supplemented with techniques for grappling, wrestling, kicking and throwing the opponent, as well as disarming him by seizing his weapon. Every attack contained a defense and every defense a counterattack. Talhoffer reveals the techniques for wrestling, unarmored fighting with the long sword, poleaxe, dagger, sword and buckler, and mounted combat. This unparalleled guide to medieval combat, illustrated with 268 contemporary images, provides a glimpse of real people fighting with skill, sophistication and ruthlessness. This is one of the most popular and influential manuals of its kind. "This superb treatise, amply illustrated, provides valuable insight into the real world of medieval**

**Automated Physical Database Design and Tuning Jun 12 2021 Due to the increasing complexity in application workloads and query engines, database administrators are turning to automated tuning tools that systematically explore the space of physical design alternatives. A critical element of such tuning is physical database design since the choice of physical structures has a significant impact on the performance of the database system. Automated Physical Database Design and Tuning presents a detailed overview of the fundamental ideas and algorithms for automatically recommending changes to the physical design of a database system. The first part of the book introduces the necessary technical background. The author explains SQL, the space of execution plans for answering SQL queries, query optimization, how the choice of access paths (e.g., indexes) is crucial to performance, and the complexity of the physical design problem. The second part extensively discusses automated physical design techniques, covering fundamental research ideas in the last 15 years that have resulted in a new generation of tuning tools. The text focuses on the search space of alternatives, the necessity of a cost model to compare such alternatives, different mechanisms to traverse and enumerate the search space, and practical aspects in real-world tuning tools. In the third part, the author explores new advances in automated physical design. He applies previous approaches to other physical structures, such as materialized views, partitioning, and multidimensional clustering. He also analyzes workload models for new types of applications, generalizes the optimizing function of current physical design tools to cope with other application scenarios, and examines open-ended challenges in physical database design. This book offers valuable insights on well-established principles and cutting-edge research results in automated physical design. It helps readers gain a deeper understanding of how automated tuning tools work in database installations as well as the challenges and opportunities involved in designing next-generation tuning tools.**

**Jock Lewes: Co-founder of the SAS Oct 28 2022 Jock Lewes was a dashing**

young Welsh Guards officer who created a new approach to modern warfare in the SAS with less than two year's experience as a soldier. By the age of twenty-seven Jock co-founded the SAS with David Stirling. Jock was in reality the trainer and 'brains' behind this now legendary fighting force and this stunning biography describes the extent of his contribution. Jock was brought up in Australia during the Depression and later educated at Oxford. Life was rarely dull and he packed it with action and achievement. His Presidency of the Oxford University Boat Club saw Oxford breaking Cambridge University's succession of thirteen wins. Preparing for a job at the Foreign Office, Jock spent several seasons in Berlin. The record of his passion for two women, one a Nazi, the other a young linguist at Somerville College, Oxford, are part of a teeming richness of writing which he left in letters, journals and poems. His death was no less dramatic than his life: after successful raids on enemy aerodromes with his invention of Lewes Bombs, he was hunted down by a Messerschmitt 110 fighter. A highly important addition to ever popular SAS literature. Jock Lewes was the brain behind the formation of the Special Air Service.

*Radiation Detection and Measurement Aug 22 2019* This is the resource that engineers turn to in the study of radiation detection. The fourth edition takes into account the technical developments that continue to enhance the instruments and techniques available for the detection and spectroscopy of ionizing radiation. New coverage is presented on ROC curves, micropattern gas detectors, new sensors for scintillation light, and the excess noise factor. Revised discussions are also included on TLDs and cryogenic spectrometers, radiation backgrounds, and the VME standard. Engineers will gain a strong understanding of the field with this updated book.

*Family Businesses' Growth Mar 09 2021* Growth is one of the central strategic topics in management science. A growing enterprise embodies success and growth supports the longevity of the business. In her book Laura Seibold provides an overview of the literature on general growth components and different theoretical growth models with a special focus on family enterprises. The author formulates a comprehensive model of how growth can be achieved in family firms. This derived model combines the insights from general growth theory, family specific literature and the insights of top family firm leaders.

*Dopamine Receptors and Transporters Oct 16 2021* "Details the function, characterization, and physiology of various dopamine receptor/transporter systems and explores their role in etiology, diagnosis, and disease management."

*Tissue Engineering Feb 20 2022* This special issue of the *Advances in Experimental Medicine and Biology* presents much of the research described at the recent 2nd International Tissue Engineering Conference held in Crete in May 2005. The conference brought together over 150 researchers from around the world to examine the emerging and most advanced aspects of their particular field. The chapters reflect a diverse group of authors, including both clinicians and academicians.

**Algorithms - ESA 2009 Mar 21 2022** This volume contains the papers presented at **ESA 2009: The 17th Annual - ropean Symposium on Algorithms, September 7–9, 2009**. ESA has been held annually since 1993, and seeks to cover both theoretical and engineering aspects of algorithms. The authors were asked to classify their paper under one or more categories as described in Fig. 1. Since 2001, ESA has been the core of the larger ALGO conference, which typically includes several satellite conferences. ALGO 2009 was held at the IT University of Copenhagen, Denmark. The ?ve members of the ALGO 2009 - ganizing Committee were chaired by Thore Husfeldt. The ESA submission deadline was April 12, Easter Sunday. This was clearly an error and we o?er profuse apologies for this mistake. Albeit no excuse, the hard constraints we faced were (a) ICALP noti?cation, April 6, and (b) ESA in Copenhagen, September 7. Between these two endpoints we needed to design a schedule that allowed modifying ICALP rejections for resubmission (1 week), Program Committee deliberations (7 weeks), preparing ?nal versions (4 weeks), and, to prepare, publish, and transport the proceedings (9 weeks). ESA 2009 had 272 submissions of which 14 were withdrawn overtime. Of the remaining 222 submissions to Track A (Design and Analysis), 56 were accepted. Of the remaining 36 submissions to Track B (Engineering and Applications), 10 were accepted. This gives an acceptance rate of slightly under 25%.

**Lemon-Aid Used Cars and Trucks 2009-2010 Jan 19 2022** For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

**The Journal of the Acoustical Society of America Sep 03 2020**

**Your Country Needs You Jul 21 2019** Taking the politics of Field Marshal Lord Kitchener's appointment as War Minister as his starting point, the author describes in his lively and authoritative style the dramatic events and dynamic personalities key to the ever-deepening British commitment. The reader is skilfully guided through the early mobilisation, dispatch of the British Expedition Force, withdrawal of overseas garrisons and the response from the Territorial Army. At the same time, Kitchener's now legendary appeal to the civilian population produced 'The New Army'.

**Unlocking Land Law Dec 06 2020** Unlocking Land Law will help you grasp the main concepts of the subject with ease. Containing accessible explanations in clear and precise terms that are easy to understand, it provides an excellent foundation for learning and revising Land Law. The information is clearly presented in a logical structure and the following features support learning helping you to advance with confidence: Clear learning outcomes at the beginning of each chapter set out the skills and knowledge you will need to get to grips with the subject Key Facts summaries throughout each chapter allow you to progressively build and consolidate your understanding End-of-chapter summaries provide a useful check-list for each topic Cases and judgments are highlighted to help you find them and add them to your notes quickly Frequent activities and self-test questions are included so you can put your knowledge into practice Sample essay questions with annotated answers prepare you for assessment Glossary of legal terms clarifies important definitions This edition has been extensively rewritten and

updated to include discussion of recent changes and developments within the module, including the issues arising from the decisions in *Swift v 1st Ltd v Chief Land Registrar* and *Scott v Southern Pacific Mortgages Ltd* and their implications in registered land cases. It also reviews the law of implied trusts post *Stack v Dowden* and *Jones v Kernott*. The books in the *Unlocking the Law Series* get straight to the point and offer clear and concise coverage of the law, broken-down into bite-size sections with regular recaps to boost your confidence. They provide complete coverage of both core and popular optional law modules, presented in an innovative, visual format. Visit [www.unlockingthelaw.co.uk](http://www.unlockingthelaw.co.uk) for access to free study resources, including multiple choice questions, key questions and answers, revision mp3s and cases and materials exercises.

*The Max Planck Encyclopedia of Public International Law* Aug 14 2021 This index to the definitive reference work on international law contains detailed references to over 1,600 articles covering the full history and breadth of public international law, as well as other information to facilitate its use, such as tables and citation lists.

*Integrative Medicine for Children* Aug 26 2022 "Fifty-five common pediatric conditions are comprehensively discussed, with diagnostic and evidence-based treatment information, followed by authoritative information on the major CAM therapies available for treatment of the condition. Whenever possible, an integrative approach that combines conventional and alternative approaches is presented."--BOOK JACKET.

*Neurology Secrets E-Book* Apr 22 2022 Part of the bestselling *Secrets Series*, the updated sixth edition of *Neurology Secrets* continues to provide an up-to-date, concise overview of the most important topics in neurology today. It serves as a comprehensive introduction for medical students, physician assistants, and nurse practitioners, and is also a handy reference and refresher for residents and practitioners. Lists, tables, and clear illustrations throughout expedite review, while the engaging *Secrets Series* format makes the text both enjoyable and readable. New lead editors, Drs. Kass and Mizrahi, join this publication from a leading neurology program to lend a fresh perspective and expert knowledge. Expedites reference and review with a question-and-answer format, bulleted lists, and practical tips from the authors. Covers the full range of essential topics in understanding the practice of neurology. Features "Key Points" boxes to further enhance your reference power. Presents a chapter containing "Top 100 Secrets" for an overview of essential material for last-minute study or self-assessment. Fits comfortably in the pocket of your lab coat to allow quick access to essential information. Completely revised content covers all of today's most common neurologic conditions and their treatments. New lead editors offer a fresh perspective and expert knowledge.

*Algorithms in Computational Molecular Biology* Sep 15 2021 This book represents the most comprehensive and up-to-date collection of information on the topic of computational molecular biology. Bringing the most recent

research into the forefront of discussion, *Algorithms in Computational Molecular Biology* studies the most important and useful algorithms currently being used in the field, and provides related problems. It also succeeds where other titles have failed, in offering a wide range of information from the introductory fundamentals right up to the latest, most advanced levels of study.
