Handbook of Research on Modern Educational Technologies, Applications, and Management Nov 06 2020 As technology and technological advancements become a more prevalent and essential aspect of daily and business life, educational institutions must keep pace in order to maintain relevance and retain their ability to adequately prepare students for their lives beyond education. Such institutions and their leaders are seeking relevant strategies for the implementation and effective use of new and upcoming technologies and leadership strategies to best serve students and educators within educational settings. As traditional education methods become more outdated, strategies to supplement and bolster them through technology and effective management become essential to the success of institutions and programs. The Handbook of Research on Modern Educational Technologies, Applications, and Management is an all-encompassing two-volume scholarly reference comprised of 58 original and previously unpublished research articles that provide cutting-edge, multidisciplinary research and expert insights on advancing technologies used in educational settings as well as current strategies for administrative and leadership roles in education. Covering a wide range of topics including but not limited to community engagement, educational games, data management, and mobile learning, this publication provides insights into technological advancements with educational applications and examines forthcoming implementation strategies. These strategies are ideal for teachers, instructional designers, curriculum developers, educational software developers, and information technology specialists looking to promote effective learning in the classroom through cutting-edge learning technologies, new learning theories, and successful leadership tactics. Administrators, educational leaders, educational policymakers, and other education professionals will also benefit from this publication by utilizing the extensive research on managing educational institutions and providing valuable training and professional development initiatives as well as implementing the latest administrative technologies. Additionally, academicians, researchers, and students in areas that include but are not limited to educational technology, academic leadership, mentorship, learning environments, and educational support systems will benefit from the extensive research compiled within this publication.

Reading and Study Skills Apr 23 2022 By focusing on a wide range of reading and study skills required in the academic world, Reading and Study Skills gives instructors the flexibility to address student needs that might otherwise require several texts.

An Independent Study Guide to Reading Latin Jan 08 2021 Reading Latin, first published in 1986, is a bestselling Latin course designed to help mature beginners read classical Latin fluently and intelligently. It does this by combining the understanding of continuous texts with rigorous teaching of grammar; it provides exercises designed to develop the skills of accurate translation; and it integrates the learning of classical Latin with an appreciation of the influence of the Latin language upon English and European culture from antiquity to the present. The Independent Study Guide is intended to help students who are learning Latin on their own or with only limited access to a teacher. It contains notes on the texts that appear in the Text and Vocabulary volume, translations of all the texts, and answers to the exercises in the Grammar and Exercises volume. The book will also be useful to students in schools, universities and summer schools who have to learn Latin rapidly.

The Space and Practice of Reading Mar 22 2022 Mirroring worldwide debates on social class, literacy rates, and social change, this study explores the intersection between reading and social class in Singapore, one of the top scorers on the Programme for International Assessment (PISA) tests, and questions the rhetoric of social change that does not take into account local spaces and practices. This comparative study of reading practices in an elite school and a government school in Singapore draws on practice and spatial perspectives to provide critical insight into how taken-for-granted practices and spaces of reading can be in fact unacknowledged spaces of inequity. Acknowledging the role of social class in shaping reading education is a start to reconfiguring current practices and spaces for more effective and equitable reading practices. This book shows how using localized, contextualized approaches sensitive to the home, school, national and global contexts can lead to more targeted policy and practice transformation in the area of reading instruction and intervention. Chapters in the book include: • Becoming a Reader: Home-School Connections • Singaporean Boys Constructing Global Literate Selves: School-Nation Connections • Levelling the Reading Gap: Socio-Spatial Perspectives The book will be relevant to literacy scholars and educators, library science researchers and sociologists interested in the intersection of class and literacy practices in the 21st century.

How and Why to Read and Create Children's Digital Books Aug 23 2019 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books,

is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

Building Communities of Engaged Readers Jan 20 2022 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. *Building Communities of Engaged Readers* highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

Digital Reading and Writing in Composition Studies Aug 03 2020 As digital reading has become more productive and active, the lines between reading and writing become more blurred. This book offers both an exploration of collaborative reading and pedagogical strategies for teaching reading and writing that reflect the realities of digital literacies. This edited scholarly collection offers strategies for teaching reading and writing that highlight the possibilities, opportunities, and complexities of digital literacies. Part 1 explores reading and writing that happen digitally and offers frameworks for thinking about this process. Part 2 focuses on strategies for the classroom by applying reading theories, design principles, and rhetorical concepts to instruction. Part 3 introduces various disciplinary implications for this blended approach to writing instruction. What is emerging is new theories and practices of reading in both print and digital spaces—theories that account for how diverse student readers encounter and engage digital texts. This collection contributes to this work by offering strategies for sustaining reading and cultivating writing in this landscape of changing digital literacies. The book is essential for the professional development of beginning teachers, who will appreciate the historical and bibliographic overview as well as classroom strategies, and for busy veteran teachers, who will gain updated knowledge and a renewed commitment to teaching an array of literacy skills. It will be ideal for graduate seminars in composition theory and pedagogy, both undergraduate and graduate; and teacher education courses, and will be key reading for scholars in rhetoric and composition interested in composition history, assessment, communication studies, and literature pedagogy.

College Reading and Study Skills Sep 04 2020 "College Reading and Study Skills" teaches reading, critical thinking and study skills for today's diverse students, encouraging them to apply these integrated skill sets to their coursework and future academic success." "Kathleen McWhorter wrote "College Reading and Study Skills," primarily, for courses that are half reading, half study skills. Emphasizing comprehension and metacognition, "College Reading and Study Skills" approaches reading and study skills as essential skills necessary for college success. The text focuses on reading and learning as a cognitive process, encouraging students to approach reading as an active mental process of selecting, processing, and organizing information to be learned.

Reading At University May 24 2022 Reading as a student demands new skills and new disciplines. Students must read. They must read to inform themselves about the subjects they are studying and to allow them to write assignments, reports and dissertations. Though most students can read fairly well, few can make as much or as efficient use as possible of the time they devote to reading for academic purposes. Many guides to study offer a pot pourri of techniques for improving reading skills. None gives as full a treatment of this essential and underpinning area of academic life as *Reading at University*. The authors believe that students must change both the ways in which they read and the ways in which they think about reading. This book offers effective and efficient strategies for fulfilling students' reading and study potential.

Reading Researchers in Search of Common Ground Dec 19 2021 In *Reading Researchers in Search of Common Ground, Second Edition*, Rona F. Flippo revisits her groundbreaking Expert Study, in which she set out to find common ground among experts in the much-fragmented field of reading research. The original edition, featuring contributions from participants in the Expert Study, commentary from additional distinguished literacy scholars with specialized experiences and vantage points from which to view it, and recommendations for use of its findings, was published in 2001 and has become a classic in the field. The Expert Study's findings and discussions related to it remain provocative, viable, and highly relevant. Taking a fresh look at it, and its current implications for literacy education and common ground in light of the newest thinking and research of today, the Second Edition includes four new chapters from leaders in the field who discuss the Study from their unique vantage points (literacy trends, emergent writing development, a comprehensive literacy curriculum, and a comparative analysis of the study's findings and recommendations). It is a must-read resource for the entire literacy community – researchers, teacher educators, graduate students, administrators, practitioners, and policymakers.

Reading Into Cultural Studies Jul 14 2021 "Reading Into Cultural Studies" revisits a selection of key texts central to the formation of cultural studies as a discipline and as a project. These texts address questions of power, ideology and the possibilities and limits of resistance. Each of the eleven essays in the collection renews an early study in one area of cultural investigation, bringing such seminal texts as "Subculture" by Dick Hebdige, "Loving With a Vengeance" by Tania Modleski and "Bond and Beyond" by Tony Bennett back to the centre of attention. However the essays are not purely celebratory. Each study is critically examined in a number of ways - for its research strategy, its implicit theories of power and ideology, for the empirical evidence it draws on and its conceptual framework. Together, the essays provide an introduction to some of the central debates and issues in cultural studies.

Reading Empirical Research Studies Jun 20 2019 For the most part, those who teach writing and administer writing programs do not conduct research on writing. Perhaps more significantly, they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities. By and large, those responsible for maintaining and improving writing instruction cannot -- without further training -- access work that could help them carry out their responsibilities more effectively. This book is designed as a text in graduate programs that offer instruction in rhetoric and composition. Its primary educational purposes are: * to provide models and critical methods designed to improve the reading of scientific discourse * to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric. Aiming to cultivate new attitudes toward empirical research, this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies. The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities, rather that methods extend the power of humanist researchers trying to solve the problems of their discipline.
