*My Walk with My Sister* Mar 05 2020 Everyone has noticed changes in Brenda. She has become more demanding, caring less about her appearance, and not letting anyone come to her house-alienating friends. Then the call comes from her employer. "Brenda didn't show up for work today." Brenda has always received awards for never missing work. Her family had to break into her home when she didn't answer the door. She was lying on the bed and acted as if nothing is wrong. What they discovered when they open the door was breathtaking. She has been hoarding, and her home was filthy. But that's not the only discovery. Brenda was diagnosed at age fifty-six with a rare brain disorder, Frontotemporal Degeneration (FTD). This disease is so rare that it is hard to diagnose-hard to treat, hard to deal with, and hard to pronounce-even harder to accept. All cases of FTD present differently. Treatment is different for each patient, so no one can tell you what to expect. Her sister becomes her primary caregiver. Along with help from family and friends, they walked the journey of frontotemporal degeneration together. Trial and error became the norm. They learned to love and accept the new Brenda, one who is childlike, loving, and happy. Our hope is that this book will give comfort to families who have a family member or friend with FTD. Please know that your journey is never walked alone. God is ever present and sometimes sends a sign that he loves you and everything is going to be okay.

**Anton** Dec 14 2020 He's known as Father Anton to his teammates--the brooding, sexy captain of the NHL's Chicago Blaze has a reputation for...not having a reputation. Just like his diet and sleep routines, celibacy is part of Anton Petrov's on-ice mojo. Or so they say. Anton stays mum on the subject. If the world thinks he chooses to abstain from sex, so be it. Better that than the truth getting out: there is a woman he burns for, but he can never have her. She's his teammate's wife, after all. Mia Marceau is finally on her own. Now that she and her husband are living apart, she's finding the peace she was desperate for. She spends her days in classes and late nights bartending, making her own way in the world at last. After what she's been through, as long as her husband leaves her alone, she doesn't plan to rock the boat. He still has the power to hurt those dearest to her, and she can't demand a divorce with such a high cost. A chance encounter with Mia has Anton hoping for a shot he never thought he'd get. And while she's drawn to the intense, serious hockey center, Mia's leery about playing with fire. That's all Anton has ever known for Mia, though--a living, burning desire that won't be denied--no matter the cost.

fisheries' heydays and their demise, with all Nova Scotians: the arrival of the Scots and the Irish; effects of national and international events; the Great Depression; recovery and prosperity. A 1967 Centennial history enumerates villagers for a century and a 2005 visual history brings them and their world to life.

Do Glaciers Listen? Aug 10 2020 Do Glaciers Listen? explores the conflicting depictions of glaciers to show how natural and cultural histories are objectively entangled in the Mount Saint Elias ranges. This rugged area, where Alaska, British Columbia, and the Yukon Territory now meet, underwent significant geophysical change in the late eighteenth and nineteenth centuries, which coincided with dramatic social upheaval resulting from European exploration and increased travel and trade among Aboriginal peoples. European visitors brought with them varying conceptions of nature as sublime, as spiritual, or as a resource for human progress. They saw glaciers as inanimate, subject to empirical investigation and measurement. Aboriginal oral histories, conversely, described glaciers as sentient, animate, and quick to respond to human behaviour. In each case, however, the experiences and ideas surrounding glaciers were incorporated into interpretations of social relations. Focusing on these contrasting views

during the late stages of the Little Ice Age (1550-1900), Cruikshank demonstrates how local knowledge is produced, rather than discovered, through colonial encounters, and how it often conjoins social and biophysical processes. She then traces how the divergent views weave through contemporary debates about cultural meanings as well as current discussions about protected areas, parks, and the new World Heritage site. Readers interested in anthropology and Native and northern studies will find this a fascinating read and a rich addition to circumpolar literature.
