**Satisfaction** Oct 01 2022 The ultimate guide to customer satisfaction, from the people who understand it better than anyone For nearly forty years, J. D. Power and Associates has been synonymous with measuring customer satisfaction and helping businesses understand what customers really want. Now two of the company's senior executives, Chris Denove and James D. Power IV, unlock the vault on decades of closely guarded research data?and insights previously available only to the firm's clients. This is the first book that really explains how great companies like Lexus, UPS, JetBlue, and Enterprise Rent-A-Car get it right, delivering consistently high customer satisfaction and translating it into profitable growth. It will teach you, for instance, how to: -Understand the financial link between satisfaction and profits -Turn customers who are simply ?satisfied? into vocal advocates - Empower frontline employees to do the right thing - Use problem resolution as an opportunity to make new fans Satisfaction offers advice for companies large or small, for product manufacturers, service providers, and retailers alike. It delivers not just a stockpile of customer research, but a road map to developing specific policies and processes. It also tells fascinating stories of companies that don't just talk the talk, but walk the walk every day—and of other companies that ignored the voice of the customer, with dire consequences.

**Dignity for the Voiceless** Oct 09 2020 Willem Assies died in 2010 at the age of 55. The various stages of his career as a political anthropologist of Latin American illustrate how astute a researcher he was. He had a keen eye for the contradictions he observed during his fieldwork but also enjoyed theoretical debate. A distrust of power led him not only to attempt to understand "people without voice" but to work alongside them so they could discover and find their own voice. Willem Assies explored the messy, often untidy daily lives of people, with their inconsistencies, irrationalities, and passions, but also with their hopes, sense of beauty, solidarity, and quest for dignity. This collection brings together some of Willem Assies's best, most fascinating, and still highly relevant writings.

*The World Is Stupid-You Can't Fix It!* Jan 24 2022 Why is the country in a state of disarray? Why do our systems not work? In *The World is Stupid-You Can't Fix It!* author Claude Roessiger examines the major issues plaguing the United States today and proposes solutions to some of the ills. From the origins of man's society to windmills and boorish manners, Roessiger discusses a wide range of public policy issues-social democracy; drug, alcohol, and sexual policies; education; economics; technology; government spending; and government size. His inquiry ranges far, cuts incisively, and gives no quarter. In *The World is Stupid-You Can't Fix It!* he delves into a range of questions: - Does the populace understand that a major portion of public spending is waste? Is anyone truly incensed? - Was the Spirit of '76 no more than a flash in the pan? - Can men preserve liberty? - Was man made for liberty? Roessiger admits that the questions are difficult to ask and the answers even more difficult to discern. But they are important to discuss because for free people to remain free, they must be capable of rational argumentation and dialogue.

**When Things Become Property** Mar 02 2020 Governments have conferred ownership titles to many citizens throughout the world in an effort to turn things into property. Almost all elements of nature have become the target of property laws, from the classic preoccupation with land to more ephemeral material, such as air and genetic resources. *When Things Become Property* interrogates the mixed outcomes of conferring ownership by examining postsocialist land and forest reforms in Albania, Romania and Vietnam, and finds that property reforms are no longer, if they ever were, miracle tools available to governments for refashioning economies, politics or environments.

**The Owner-Builder Book** Mar 26 2022 This easy to understand, step-by-step guide is clear enough for even a novice to understand, Even if you hire a contractor to build you home, this book will greatly help you understand the process. From shopping for a piece of land to getting a loan to dealing with a contractor, the Smiths' advice covers everything about building a home. The authors advise on getting organized and tackling the hardest parts of the process step by step. Included are valuable lists, charts, ideas and questionnaires. Also, how to shop around for bargains and minimize costs room by room.

Animated Realism Aug 07 2020 With the development and accessibility of animation tools and techniques, filmmakers are blurring the boundaries between documentary filmmaking and animation. The intimacy, imperfection and charm of the animated form is providing live-action and animation directors with unique ways to tell stories, humanize events and convey information not easily adapted for live-action media. "Animated Realism" presents animation techniques as they apply to the documentary genre with an inspirational behind-the-scenes look at award-winning animated documentaries. Animators and documentary filmmakers alike will learn how to develop a visual style with animation, translate a graphic novel into a documentary and use 3D animation as a storytelling tool, all in the context of creating animated documentaries. With insight and inspiration, "Animated Realism" includes interviews from industry luminaries like John Canemaker, Oscar Winning Director of "The Moon and the Son", Yoni Goodman, Animation Director of Oscar Nominated *Waltz with Bashir* and Chris Landreth, Oscar Winning creator of *Ryan*. Packed with beautiful, instructive illustrations and previously unpublished material (including storyboards, photos and hand-drawn sketches) and interspersed with interviews - this is an exceptional source of inspiration and knowledge for animators, students and fans alike. With a companion website featuring animated shorts from leading animated documentaries, animators, students and documentary filmmakers will be able to analyze and apply Oscar-winning animation techniques to their own films. Learn from the best...Judith Kriger interviews some of the most innovative and inspirational animators, including John Canemaker, Oscar Winning Director of "The Moon and the Son", Yoni Goodman, Animation Director of Oscar Nominated *Waltz with Bashir* and Chris Landreth, Oscar Winning Director of *Ryan*.

*Trends in Forestry Law in Europe and Africa* Jun 24 2019 Recent years have witnessed a significant acceleration in the revision of forest laws around the world. Forest law increasingly recognizes the multiple interests involved in or affected by forest management, with greater attention given to the environmental and social roles of forest resources and to their sustainable management and use. In addition, renewed emphasis is being placed on the involvement of a wider range of public and private actors. Issues in which forest laws have been reoriented include local forest and private management, the environmental functions of forests, forest management planning and forest utilization contracts.

**Smart Things** Jul 26 2019 The world of smart shoes, appliances, and phones is already here, but the practice of user experience (UX) design for ubiquitous computing is still relatively new. Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction, device design and service design -- which are all the key components of ubiquitous computing UX -- and practicing designers need a way to tackle practical challenges of design. Theory is not enough for them -- luckily the industry is now mature enough to have tried and tested best practices and case studies from the field. *Smart Things* presents a problem-solving approach to addressing designers' needs and concentrates on process, rather than technological detail, to keep from being quickly outdated. It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment. Divided into two sections, frameworks and techniques, the book discusses broad design methods and case studies that reflect key aspects of these approaches. The book then presents a set of techniques highly valuable to a practicing designer. It is intentionally not a comprehensive tutorial of user-centered design'as that is covered in many other books'but it is a handful of techniques useful when designing ubiquitous computing user experiences. In short, *Smart Things* gives its readers both the "why" of this kind of design and the "how," in well-defined chunks. Tackles design of products in the post-Web world where computers no longer have to be monolithic, expensive general-purpose devices Features broad frameworks and processes, practical advice to help approach specifics, and techniques for the unique design challenges Presents case studies that describe, in detail, how others have solved problems, managed trade-offs, and met successes

*Homeowner's Complete Guide to the Chainsaw* Jul 30 2022 With color step-by-step color photos throughout, 12 of the most common household chainsaw operations--such as cutting firewood, taking down small trees and grooming hedges--are tackled with expert advice and an emphasis on safety, in a book that also includes a buyer's guide to chainsaw types and an appendix that identifies and explains the parts of a chainsaw. Original.

Incomes from the Forest Aug 31 2022 Documentation and comparison methods to assess options for forest-based livelihoods and their outcomes. The contributions are based on the premise that livelihood and conservation goals can be best achieved by improving information flow about changes in the environment, and the impacts of forest use. The authors report on the strengths and weaknesses of methods that have been tried in the field.

**Horrible Science: Body Owner's Handbook** May 28 2022 Discover a range of fearsome and fantastic features you didn't even know you had in the *Body Owner's Handbook*. Learn how your auto-repair function works and where your top-of-the-range sensory equipment is in the guide that no body can do without. Redesigned in a bold, funky new look for the next generation of *Horrible Science* fans.

*Eaten Alive at a Chainsaw Massacre* Jan 12 2021 The sound of chainsaws revving on "haunted" Halloween trails has evoked untold screams since Tobe Hooper's 1974 *The Texas Chainsaw Massacre* hit the cinemas. Since that first take-no-prisoners horror movie, Hooper's reputation as a master of horror has been secured by his adaptations of Stephen King (*Salem's Lot*, 1978, and *The Mangler*, 1995), his blockbuster breakthrough *Poltergeist* (1982) and a variety of cult hits, from the underrated *Lifeforce* (1985) to the remake of *Invaders from Mars* (1986). This reference work is divided into five parts. Part I provides a history and overview of Tobe Hooper's career. Part II offers entries (with synopses, complete credits, critical reception and commentaries) on every feature film by year of release. Part III provides chronological information on Hooper's television movies and miniseries. Part IV offers entries on his episodes from horror television series. Part V is a critical essay and conclusion which places Hooper in horror film history and compares his work to all-time greats such as Romero, Craven and Carpenter.

*Latin American Peasants* Nov 09 2020 The essays in this collection examine agrarian transformation in Latin America and the role in this of peasants, with particular reference to Bolivia, Peru, Chile, Brazil and Central America. Among the issues covered are the impact of globalization and neo-liberal economic policies.

How Your House Works May 16 2021 Understand how to maintain everything in your home—including the kitchen sink *How Your House Works*, Second Edition reinforces the fact that it pays to be an informed consumer. Knowledge of your home's systems helps you control repair and construction costs and makes sure the correct elements are being installed or replaced. *How Your House Works* uncovers the mysteries behind just about every major appliance and building element in your house. Clear, full-color drawings show you exactly how these things should be put together and how they function, including what to check if they don't work. Covering topics such as electrical systems, heating and air conditioning, plumbing, major household appliances, foundation, framing, doors, and windows, this updated Second Edition has considerable additional information, with new chapters related to sustainability in and outside the house, as well as new topics, including clock thermostats, ventless gas heaters, moisture and mold, and passive solar heating. Illustrated guidance on electrical systems, heating and air conditioning, plumbing, major household appliances, foundation, framing, doors, and windows Includes a

wealth of additional information, with new chapters related to sustainability and outside the house Features new topics that include clock thermostats, ventless gas heaters, moisture and mold, LED lamps, motion-activated light switches, and passive solar heating Presented in a richly illustrated with full-color drawings With see-through, cross-section drawings that show you how things are put together and how they function, How Your House Works supplies you with the knowledge that just might save you having to call in a professional.

Strengthening decent rural employment opportunities for youth across different processes in the forest value chain in Uganda Dec 31 2019 This report addresses the subject of decent rural employment for youth in the forestry sector. It is based on case studies carried out across different processes in the value chain within the sector in Uganda, ranging from seedbed development through to plantation management, saw logging and trading. Findings indicate that a considerable number of Uganda's legal and policy frameworks emphasize the participation of youth in the labour market, especially given that young people constitute a large majority of the country's population. However, only a few of these frameworks focus on decent work, whether for young people or the country's workers more generally. The case studies revealed that efforts to provide decent employment were mixed. Larger and more formally oriented forestry enterprises were more likely to focus on decent work provisions for their labourers. Smaller enterprises, while aware of most of their decent work obligations, were unable to implement them due to resource constraints. The case studies also revealed numerous opportunities for youth to participate in the forestry sector. These included tapping into existing government and NGO programmes ranging from tree planting to plantation management. Additional employment opportunities were provided by businesses in the sector and the management of woodlots for poles and fuel. The limiting factors for youth participation in the sector largely arise from the huge investment cost incurred by such participation, particularly access to and utilization of land and financial resources. Other limitations included a lack of relevant training and skills and poor working conditions. These conditions are compounded by few numbers and limited capacity of officers within the Labour Directorate to administer and enforce labour regulations. The report proposes decent work indicators and recommends both policy and implementation strategies to increase youth participation and decent work practices in the sector.

**The Owner's Manual to the Voice** Apr 26 2022 The Owner's Manual to the Voice demystifies the voice, enabling singers and all voice professionals - whether actors, broadcasters, teachers, preachers, lawyers, public speakers- to communicate intelligently with physicians and understand dangers, treatments, vocal hygiene and medical procedures.

The Dynamics of Decentralization in the Forestry Sector in South Sulawesi Aug 19 2021 Having broken away from Luwu District in 2001, the Luwu Utara District Government has faced many problems in its three years of implementing decentralization. The obstacles to implementing decentralization were due mainly to the inconsistency of national laws and regulations, unclear division of responsibility and authority between district, provincial and central governments, an unfair balancing mechanism for reforestation funds between producing and non-producing districts, increased claims of tenure by local communities, low levels of public participation in decision-making processes and a lack of spatial planning at the district level. This study found that at the beginning of decentralization the district government was not very well prepared and lacked adequate human resources and facilities for taking over the management of its forests. As time progressed, the Luwu Utara District Government, especially the Forestry and Estate Crops Office, strove continuously to improve its forest management capacity. However, due to a lack of resources and uncertain division of authority, many aspects of forest management are still not handled properly. By using an inclusive decision-making process for the research process, this study helped the district government and local communities to look at underlying causes of problems in implementing forestry sector decentralization in their areas and to find alternative solutions to these problems. As a result, the district Forestry Office has undertaken many activities in direct response to the outcomes of this research project, such as a social forestry programme for local forest-dependent communities and the adoption of more inclusive processes for ...

*The Social Dynamics of Deforestation in the Philippines* Dec 11 2020 This work offers a detailed case study on the dynamics of forest use, degradation, and loss in Northeast Luzon, Philippines. Following an interdisciplinary approach, the study charts the degradation and loss of forest in this area between 1950 and 1990, as it relates to the social and political context of logging, forest migration, and changes in upland agriculture. Based on ten years of research, the author introduces us to the actions, livelihood options, and motives of all the principal group of actors.

The Owner-Builder Book: Construction Bargain Strategies Jun 28 2022

Vulgar Tongues Sep 27 2019 Slang is the language of pop culture, low culture, street culture, underground movements and secret societies; depending on your point of view, it is a badge of honour, a sign of identity or a dangerous assault on the values of polite society. Over several centuries and across international borders, VULGAR TONGUES is the story of how the English language of Shakespeare's day fragmented and twisted into all kinds of shapes, as people like pickpockets, beggars, sailors, musicians, gangsters, whores, politicians, gypsies, soldiers, gays and lesbians, policemen, rappers, cockneys, biker gangs and circus folk seized the King's or Queen's English by the throat and took it to places it would probably regret in the morning.

*The Owner-Built Log House* Nov 02 2022 A step-by-step guide to building a log house.
