**Manual de pago por desempeño** Feb 23 2020 Los enfoques de Pago por Desempeño (PPD) se han expandido con rapidez en los países de ingresos bajos y medios en todo el mundo. El número de países ha crecido de 3 en 2006 a 32 en 2013. Los esquemas de PPD están floreciendo y crean una demanda considerable de asistencia técnica a fin de ejecutar estas reformas sanitarias en una forma racional y responsable. Tres pioneros internacionales del PPD se han unido para dar una respuesta a esta demanda internacional. Ellos son: György Fritsche, MD, MSc (Banco Mundial, Washington); Robert Soeters, MD, PhD (SINA Health, La Haya); y Bruno Meessen, MA, PhD (Instituto de Medicina Tropical, Amberes). Su trabajo vuelca sus 40 años de experiencia total en el diseño e implementación de esquemas de PPD en un manual de PPD de vanguardia, dirigido a implementadores y hacedores de políticas. Se unió al equipo Godelieve van Heteren (MD; Erasmus University Rotterdam Global Health Initiative (RGHI)), quien realizó

la co-edición a fin de darle al manual consistencia, contenido y formato. Cedric Ndizeye, MD, MPH (MSH, Ruanda), redactó las partes principales del capítulo sobre desarrollo de competencias, y Caryn Bredenkamp, PhD (Banco Mundial, Washington) contribuyó con el capítulo 5 sobre equidad. Actualmente, existe poco conocimiento entre muchos de los que ejecutan reformas sanitarias sobre cómo implementar proyectos piloto de pago por desempeño y cómo ampliarlos a nivel nacional en forma inteligente. En un contexto de gran demanda de un diseño sólido y experiencia en la implementación, y dada la rápida expansión de los programas de Financiación Basada en Resultados, existe una necesidad urgente de desarrollar competencias para el diseño e implementación de programas de FBR. Hasta el momento, ha habido poco interés en combinar las enseñanzas de esas experiencias en un solo volumen y, más aún, en un formato que sirva como guía a los implementadores. Este manual es una respuesta a las preguntas más urgentes sobre programas de FBR del lado de la oferta, del cual el PPD es parte. Este manual estará disponible en una versión on-line, que será actualizada en forma regular, y una versión impresa en 3 idiomas (inglés, francés y español).

Witty and global in reach, *The News* will ensure you'll never look at reports of a celebrity story or political scandal in quite the same way again. Praise for *Religion for Atheists*: 'Smart and stimulating . . . a sensitive analysis of the deeply human needs that faith meets' *Financial Times* 'A serious and optimistic set of practical ideas that could improve and alter the way we live . . . energetic and on the side of the angels' Jeanette Winterson, *The Times* 'Packed with tantalising goads to thought and playful prompts to action' *Independent* Alain de Botton's bestselling books include *Religion for Atheists*, *How Proust Can Change Your Life*, *The Art of Travel*, and *The Architecture of Happiness*. MOSS is the data analysis component of a Geographic Information System (GIS) originally developed by the Western Energy and Land Use Team (WELUT). Currently, MOSS is being developed under the direction of the U.S. Bureau of Land Management with cooperation from the U.S. Fish and Wildlife Service, the U.S. Bureau of Indian Affairs, the U.S. Geological Survey, the U.S. Forest Service, the Soil Conservation Service, the Minerals Management Service and the U.S. Army Corps of Engineers. *User Localization Strategies in the Face of Technological Breakdown* Dec 03 2020 This book examines Ghana's use of the fingerprint biometric technology in order to further conversations about localization championed by technical communication scholars. Localization, in this case, refers to the extent to which users demonstrate their knowledge of use by subverting and reconfiguring the purpose of technology to solve local problems. Dorpenyo argues that the success of a technology depends on how it meets the users' needs and the creative efforts users put into use situations. In *User Localization Strategies in the Face of Technological Breakdown*, Dorpenyo advocates studying how users of technological systems construct knowledge about the technology and develop local strategies to solve technological breakdowns. By analyzing technical documents and interview transcripts, the author identifies and advances three user localization strategies: linguistic localization, subversive localization, and user-heuristic experience localization, and considers how biometric systems can become a tool of marginalization.

Environmental Information in Instructions for Use of Consumer Products May 08 2021 The European Union

has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy, IPP. Accordingly, consumers should have easy access to understandable, relevant and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on, examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and 'eco-development' of instructions for use.
