## **Hunters, Fishers and Foragers in Wales** Aug 03

2020 Malcolm Lillie presents a major new holistic appraisal of the evidence for the Mesolithic occupation of Wales. The story begins with a discourse on the Palaeolithic background. In order to set the entire Mesolithic period into its context, subsequent chapters follow a sequence from the palaeoenvironmental background, through a consideration of the use of stone tools, settlement patterning and evidence for subsistence strategies and the range of available resources. Less obvious aspects of hunter-forager and subsequent hunter-

fisher-forager groups include the arenas of symbolism, ritual and spirituality that would have been embedded in everyday life. The author here endeavors to integrate an evaluation of these aspects of Mesolithic society in developing a social narrative of Mesolithic lifeways throughout the text in an effort to bring the past to life in a meaningful and considered way. The term 'hunter-fisher-foragers' implies a particular combination of subsistence activities, but whilst some groups may well have integrated this range of economic activities into their subsistence strategies, others may not have. The situation in coastal areas of Wales, in

relation to subsistence, settlement and even spiritual matters would not necessarily be the same as in upland areas, even when the same groups moved between these zones in the landscape. The volume concludes with a discussion of the theoretical basis for the shift away from the exploitation of wild resources towards the integration of domesticates into subsistence strategies, i.e. the shift from food procurement to food production, and assesses the context of the changes that occurred as human groups re-orientated their socioeconomic, political and ritual beliefs in light of newly available resources, influences from the continent, and ultimately their

social condition at the time of 'transition'.

decision tree learning, as well as different ensemble methods that involve decision trees. It is shown that the knowledge of different components used within decision tree learning needs to be systematized to enable the system to generate and evaluate different variants of machine learning algorithms with the aim of identifying the top-most performers or potentially the best one. A unified view of decision tree learning enables to emulate different decision tree algorithms simply by setting certain parameters. As meta-learning requires running many different processes with the aim of obtaining performance results, a detailed description

of the experimental methodology and evaluation framework is provided. Meta-learning is discussed in great detail in the second half of the book. The exposition starts by presenting a comprehensive review of many meta-learning approaches explored in the past described in literature, including for instance approaches that provide a ranking of algorithms. The approach described can be related to other work that exploits planning whose aim is to construct data mining workflows. The book stimulates interchange of ideas between different, albeit related, approaches.

**Communities in Asia** Mar 22 2022 This open access book presents up-to-date analyses of community-based approaches to sustainable resource management of SEPLS (socio-ecological production landscapes and seascapes) in areas where a harmonious relationship between the natural environment and the people who inhabit it is essential to ensure community and environmental well-being as well as to build resilience in the ecosystems that support this well-being. Understanding SEPLS and the forces of change that can weaken their resilience requires the integration of knowledge across a wide range of

academic disciplines as well as from indigenous knowledge and experience. Moreover, given the wide variation in the socio-ecological makeup of SEPLS around the globe, as well as in their political and economic contexts, individual communities will be at the forefront of developing the measures appropriate for their unique circumstances. This in turn requires robust communication systems and broad participatory approaches. Sustainability science (SuS) research is highly integrated, participatory and solutions driven, and as such is well suited to the study of SEPLS. Through case studies, literature reviews and

The story speaks fiercely to the contemporary moment and for all who share a sense of loneliness through having found themselves isolated by politics, disease, economics -or indeed just sheer accident and bad luck. *From This Wicked Patch of Dust* Aug 15 2021 In the border shantytown of Ysleta, Mexican

immigrants Pilar and Cuahtémoc Martínez strive to teach their four children to forsake the drugs and gangs of their neighborhood. The family's hardscrabble origins are just the beginning of this sweeping new novel from Sergio Troncoso. Spanning four decades, this is a story of a family's struggle to become American and yet not be pulled apart by a maelstrom of cultural forces. As a young adult, daughter Julieta is disenchanted with Catholicism and converts to Islam. Youngest son Ismael, always the bookworm, is accepted to Harvard but feels out of place in the Northeast where he meets and marries a Jewish

woman. The other boys—Marcos and Francisco—toil in their father's old apartment buildings, serving as the cheap labor to fuel the family's rise to the middle class. Over time, Francisco isolates himself in El Paso while Marcos eventually leaves to become a teacher, but then returns, struggling with a deep bitterness about his work and marriage. Through it all, Pilar clings to the idea of her family and tries to hold it together as her husband's health begins to fail. This backdrop is then shaken to its core by the historic events of 2001 in New York City. The aftermath sends shockwaves through this newly American

family. Bitter conflicts erupt between siblings and the physical and cultural spaces between them threaten to tear them apart. Will their shared history and once-common dreams be enough to hold together a family from Ysleta, this wicked patch of dust?

Jul 22 2019 La incertidumbre reina cuando se negocia o se concierta un contrato, por lo que todos los contratos son natural o fisiológicamente incompletos. No contemplan "todos los estados del mundo". Bajo esta premisa, la doctrina económica ha venido subrayando los déficits de eficiencia que genera esta ausencia de completitud y ha evaluado la viabilidad de modelos contractuales abiertos

a una posible negociación o renegociación ex post para adaptar la programación comercial a un mundo cambiante. Desde el punto de vista jurídico, estos acuerdos tan indefinidos o de términos tan abiertos suscitan un problema básico: decidir si estos convenios, pese a su indefinición, pueden o no ser elevados a la categoría de compromisos jurídicamente vinculantes. La derivada, obviamente, cuando se aprecie que existe contrato, es determinar cómo colmar los vacíos negociales y si resulta conveniente hacerlo.
