Poetry, Method and Education Research Sep 25 2019 Poetry can be both political and pedagogical. It is utilised in a variety of ways in research to enhance, critique, analyse, and express different voices. *Poetry, Method and Education Research* brings together international scholars to explore issues as diverse as neoliberalism, culture, decolonising education, health, and teacher identities. A key strength of the book is its attention to poetry as a research method, including discussions of "how to" engage with poetry in research, as well as including a range of research poems. Poetry is thus framed as both a method and performance. Authors in this book address a wide variety of questions from different perspectives including how to use poetry to think about complex issues in education, where poetry belongs in a research project, how to write

poetry to generate and analyse "data", and how poetry can represent these findings. This book is an essential resource for students and researchers in education programmes, and those who teach in graduate research methods courses.

Creating Resilient Futures May 02 2020 This open access edited volume critically examines a coherence building opportunity between Climate Change Adaptation, the Sustainable Development Goals and Disaster Risk Reduction agendas through presenting best practice approaches, and supporting Irish and international case studies. The Covid-19 pandemic has highlighted existing global inequalities and demonstrated the scope and scale of cascading socio-ecological impacts. The impacts of climate change on our global communities will likely dwarf the disruption brought on by the pandemic, and moreover, these impacts will be more diffuse and pervasive over a longer timeframe. This edited volume considers opportunities to address global challenges in the context of developing resilience as an integrated development continuum instead of through independent and siloed agendas.
