Cooperative Peacekeeping in Africa Nov 27 2019 This book examines peacekeeping in Africa, exploring how the various actors are forming an African security regime complex. The changing dynamics of peacekeeping in today's world have encouraged a more cooperative approach between international and regional actors. At the centre of this book is the analysis of how an African security regime complex could emerge in the area of cooperative peacekeeping. The African regime complex on peacekeeping includes a number of organizations at the regional and sub-regional African level, as well as global institutions such as the UN, interregional partners like the EU and individual lead nations. This book is the first in providing a systematic overview of peacekeeping doctrines, capacities and deployments of these key actors and single lead states. Theoretically, the book links up with regime complexity scholarship but connects it with dependency theory. Here inter-institutional relations are conceptualised as acts of resource exchange. The book explores how primarily international organizations are partnering by exchanging resources. Empirically, the study analyses the phenomenon of regime complexity in three prominent African crises covering Eastern Africa (Somalia), Central African (Central African Republic) and Western Africa (Mali). This book will be of much interest to students of peacekeeping, international organisations, African politics, security studies and IR in general.

The Caucasus Emirate Mujahedin Aug 05 2020 Russia's North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which

includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement's propagation of the "jihadi method" and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.

How Long Will South Africa Survive? Jun 22 2019 In 1977, RW Johnson's best-selling *How Long Will South Africa Survive?* provided a controversial and highly original analysis of the survival prospects of the apartheid regime. Now, after more than twenty years of ANC rule, he believes the situation has become so critical that the question must be posed again. He moves from an analysis of Jacob Zuma's rule to the increasingly dire state of the South African economy, concluding that the country is heading towards a likely International Monetary Fund bail-out which will in turn lead to a regime change of some kind.

Tragic Orphans Dec 09 2020 In 1938, noting that the bulk of the Indian population formed a "landless proletariat" and despairing of the ability of the factionalized Indian community to unite in pursuit of common objectives, activist K.A. Neelakanda Ayer forecast that the fate of Indians in Malaya would be to become "Tragic orphans - of whom India has forgotten and Malaya looks down upon with contempt". Ayer's words continue to resonate; as a minority group in a nation dominated politically by colonially derived narratives of "race" and ethnicity and riven by the imperatives of religion, the general trajectory of the economically and politically impotent Indian community has been one of increasing irrelevance. This book explores the history of the modern Indian presence in Malaysia, and traces the vital role played by the Indian community in the construction of contemporary Malaysia. In this comprehensive new study, Carl Vadivella Belle offers fresh insights on the Indian experience spanning the period from the colonial recruitment of Indian labour to the post-Merdeka political, economic and social marginalization of Indians. While recent Indian challenges to the political status quo — a regime described as that of "benign neglect" — promoted Indian hopes of reform, change and uplift, the author concludes that the dictates of political discourse permeated by the ideologies of communalism offer limited prospects for meaningful change.

Computer Games and Technical Communication Jun 14 2021 Taking as its point of departure the fundamental observation that games are both technical and symbolic, this collection investigates the multiple intersections between the study of computer games and the discipline of technical and professional writing. Divided into five parts, *Computer Games and Technical Communication* engages with questions related to workplace communities and gamic simulations; industry documentation; manuals, gameplay, and ethics; training, testing, and number crunching; and the work of games and gamifying work. In that computer games rely on a complex combination of written, verbal, visual, algorithmic, audio, and kinesthetic means to convey information, technical and professional writing scholars are uniquely poised to investigate the intersection between the technical and symbolic aspects of the computer game complex. The contributors to this volume bring to bear the analytic tools of the field to interpret the roles of communication, production, and consumption in this increasingly ubiquitous technical and symbolic medium.

Rediscovering Victorian Women Sensation Writers Sep 25 2019 Scholarly understanding of the Victorian literary field has changed dramatically in the past thirty years, due in large part to the extensive recovery of sensation fiction and a corresponding recognition of that genre's importance in the literary debates, trends, and wider cultural practices of the period. Yet until very recently, work on sensationalism has focused on a narrow range of authors and works, with Wilkie Collins, Mary Elizabeth Braddon, and Ellen Wood retaining the preponderance of critical attention. This collection examines the fiction of ten women sensation writers who were immensely popular in the Victorian period but remain critically neglected today - writers such as Annie Edwardes, M.C. Houston, Annie French, Dora Russell and others. The Victorian sensation novel was categorically associated with women by Victorian reviewers and this collection extends our current understanding of this sub-genre by showing that female sensation writers were often sophisticated in their textual strategies, employing a range of metafictional techniques and narrative innovations. By moving beyond the novelists who have come to represent the genre, this book presents a fuller, more nuanced, understanding of the spectrum of writing that constructed the concept of 'sensationalism' for Victorian readers and critics. The book was originally published as a special issue of *Women's Writing*.

Fractured Families Jun 26 2022 Most convicts arriving in New South Wales didn't expect to make their fortunes. Some went on to great success, but countless convicts and free migrants struggled with limited prospects, discrimination and misfortune. Many desperate people turned to The Benevolent Society, Australia's first charity founded in 1813, for assistance and sustenance. In this rich and revealing book, Tanya Evans collaborates with family historians to present the everyday lives of these people. We see many families who have fallen on hard times because of drink, unwanted pregnancy, violence, unemployment or plain bad luck, seeking help and often shunted from asylums or institutions. In the careful tracing of families, we see the way in which disadvantage can be passed down from one generation to the next. The extensive archives of The Benevolent Society allow us to reclaim these unknown lives and understand our history better, not to mention the often random nature of betterment and progress.

Portfolio Representations Mar 31 2020 This book provides a practical and sophisticated insight into each financial asset type, and how the different risks and exposures they involve should be most accurately combined and represented in a portfolio. The financial issues facing the world since the late 2000s have provided the asset management community with a brutal reminder of the importance of having genuine knowledge of portfolio structures and the risks embedded within them. More so than ever, fund managers need a clear and consistent way of separating value from exposure in their portfolios, allowing a complete 'look-through' to the real risks contained in derivatives and pooled/structured products. Equally, as fund managers are driven to find risk-adjusted rather than just raw returns, it is imperative that risk measures and the understanding derived from them are applied to the entirety of a portfolio, as opposed to just particular asset classes or sections. This book, written by hugely experienced investment expert Jem Tugwell, provides a practical and comprehensive solution. Written in plain English and carefully structured to be easy to use, this is the definitive guide to accurately and quickly representing value in financial portfolios of every complexity. Taking the reader through each asset type in turn, with detailed workings and explanations, it is the most lucid and helpful professional guide yet written on the subject - and something no one working in this area can afford to be without.

Neoliberalism and Post-Soviet Transition Nov 19 2021 This collection emphasizes a cross-disciplinary approach to the problem of scale, with essays ranging in subject matter from literature to film, architecture, the plastic arts, philosophy, and scientific and political writing. Its contributors consider a variety of issues provoked by the sudden and pressing shifts in scale brought on by globalization and the era of the Anthropocene, including: the difficulties of defining the concept of scale; the challenges that shifts in scale pose to knowledge formation; the role of scale in mediating individual subjectivity and agency; the barriers to understanding objects existing in scalar realms different from our own; the role of scale in mediating the relationship between humans and the environment; and the nature of power, authority, and democracy at different social scales.

Women's Rights Movement Sep 17 2021 In the face of injustice, people band together to work for change, and through their influence, what was once unthinkable becomes common. This title traces the history of the women's rights movement in the United States, including the key players, watershed moments, and legislative

battles that have driven social change. Iconic images and informative sidebars accompany compelling text that follows the movement from the work of early suffragists through feminists' work to end discrimination in the mid-twentieth century and up to the continuing challenges that still face the country today. Features include a glossary, selected bibliography, Web sites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core Standards and correlated to state standards. Monetary Policy in India Feb 08 2021 This book presents research that applies contemporary monetary theory and state-of-the-art econometric methods to the analysis of the monetary and financial aspects of the Indian economy and the impact of monetary policy on economic performance. Indian monetary policy has attracted significant attention from Indian and international macroeconomists over the last several years. Interest in how monetary policy influences economic performance and how monetary policy is conducted in India is growing. The prospects for further financial sector reform and ongoing inflation in India have sparked new interest in the role of money and monetary policy in India among economists, policy makers and students alike. The book should also interest economists outside India because it studies monetary economics in a major emerging market economy and makes advances in the analysis of how financial market imperfections and structural constraints influence the effects of monetary policy.

Grand Theft History Aug 17 2021 The explosive truth about America's Revolution—a bloody civil war that was won largely in the South—that modern liberals have kept buried until now. At the darkest hour of the American Revolution, in 1780, when there was little reason to hope, the British went down South and overplayed their hand. By burning the bibles of backwoodsmen and threatening their honor, the British ignited a firestorm in the most spectacular, unusual, and decisive battle of the war. Ordinary folk from throughout the Southern colonies spontaneously banded together and rode for hundreds of miles to attack and destroy British forces at King's Mountain. The killing didn't stop at King's Mountain, but the war did. Never heard of the massacre that saved the American Revolution? No idea that liberty was actually won in the South? Red state values of God, guns and guts are being dismantled by leftists airbrushing our past in order to "transform" our future. *Grand Theft History* features shocking new evidence that exposes the latest battlefield in the culture wars—American history.

US-China Strategic Competition Jun 02 2020 This book examines the nature and consequences of strategic competition between the US and China, which affects the global security landscape and the emerging security architecture across the broader Asia-Pacific region. The author illustrates the evolution of Sino-US security interactions from the anti-Soviet alliance, to temporary marginalization, to eventual strategic competition and examines cases that could potentially escalate into greater conflicts. The analysis offers tantalizing glimpses into both the dangers and promising opportunities presented by this strategic fork in the road, making it of great interest to researchers and scholars in the fields of international relations and security studies.

Innovations for Sustainable Building Design and Refurbishment in Scotland Oct 31 2022 This book presents innovations for sustainable building design and refurbishment developed and tested through feasibility studies undertaken by researchers at Scottish universities in collaboration with small to medium size enterprises in Scotland during the 'CIC Start Online' project that ran from September 2009 to February 2013. The project was led by Glasgow Caledonian University in collaboration with Edinburgh Napier University, Glasgow School of Art, Heriot-Watt University, the Robert Gordon University, University of Edinburgh and the University of Strathclyde Glasgow. The book includes chapters on Context and Policies, Planning, Building Design, Technologies, Construction, Refurbishment and Performance. The contents of each chapter are based on 63 completed studies that were initiated by businesses operating in the construction sector or providing services to the sector, indicating the scope of research required to assist the industry to develop more sustainable products and processes. The book informs the reader about the range of innovations that were tested and highlight potential future research areas. Readers can find in-depth information by accessing the project website www.cicstart.org, where full reports on most studies and the video recordings of interactive online seminars that presented the outcomes of the studies are available. Along with the new knowledge on how innovations for sustainable building design and refurbishment can be applied in practice, the book demonstrates how joint projects of several universities can be successfully managed and how an immediate knowledge transfer can be organized by using web tools to reach over 2,200 current members nationally and internationally (in UK and 53 other countries).

The Portrayal and Punishment of Terrorists in Western Media Dec 29 2019 This book explores how terrorists have been portrayed in the Western media, and the wider ideological and social functions of those representations. Developing a theory of scapegoating related to narrative closure, as well as an integrated, genealogical method of intervisuality, the book proposes a new way of thinking about how political images achieve power and influence the public. By connecting modern portrayals of terrorists (post-9/11) with historical and fictional images of villains from Western cultural history, the book argues that the portrayal and punishment of terrorists in the Western media implicitly perpetuates neo-Orientalist attitudes. It also explains that by repeating these narrative patterns through a ritual of scapegoating, Western media coverage of terrorists partakes in a social process that uses punishment, dehumanization and colonialist ideas to purge the iconic 'villain', so as to build national unity and sustain hegemonic power following crisis.

New Dynamics in US-China Relations Jul 04 2020 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies, as well as to play the leading role in maintaining peace and stability in the region. However, Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region, these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia-Pacific alongside the strategies employed in the management of this relationship. In turn, it illuminates the sources of conflict and cooperation in US-China relations, looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic forces, and Taiwan. Finally, it explores the role of regional states in shaping US-China relations, and in doing so covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar, and Cambodia. With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security and how Asian states view their relations with the US and China respectively. *New Dynamics in US-China Relations* will be of huge interest to students and scholars of Asian politics, US politics, international relation and security studies, as well as practitioners involved in framing and implementing foreign, security and economic policy pertaining to the Asia Pacific.

Lebanon after the Syrian Withdrawal Jul 16 2021 Lebanon experienced serious instability and ethno-national conflict following the Syrian withdrawal in 2005, compounded by the Arab Spring, which led to regional

instability and civil war in Iraq and Syria. Why did consociational democracy fail? Was failure inevitable? What impact could external powers play in creating an environment where consociationalism might be successfully implemented? This book addresses these key questions and provides a comprehensive analysis of how internal and external elite relations influence the chances of a successful regulation of ethno-national conflict through power-sharing. Exploring the roles played by Syria, Qatar, Iran, Saudi Arabia, the United States and France, it argues that external actors in the Lebanese conflict largely determined whether power-sharing was successfully established and shows that the consociational democratic model cannot provide long-term conflict regulation in their absence. The author argues that relationships between internal and external actors determine the prospects for successful conflict regulation and pinpoints the crucial role of the external forces in the creation of power-sharing agreements in Lebanon concluding that future success is dependent on the maintenance of positive, exogenous pressures. This book will be of key interest to students and scholars studying politics, international relations, and Middle East studies.

An IUCN situation analysis of terrestrial and freshwater fauna in West and Central Africa Nov 07 2020 This situation analysis was undertaken to inform responses to several resolutions made at the 5th World Conservation Congress in 2012 about the plight of large vertebrates in West and Central Africa. It draws on a wide range of information to provide information on the status of these species, important sites, pressures, legislation, the effectiveness of protected areas, and both community-based incentives for conservation and institutional responses. The overriding conclusion is of substantial wildlife declines and inadequate responses to either long-standing pressures or rapidly escalating threats that have emerged in recent years.

Southeast Asian Affairs 2014 Sep 05 2020 "Southeast Asian Affairs is the only one of its kind: a comprehensive annual review devoted to the international relations, politics, and economies of the region and its nation-states. The collected volumes of Southeast Asian Affairs have become a compendium documenting the dynamic evolution of regional and national developments in Southeast Asia from the end of the 'second' Vietnam War to the alarms and struggles of today. Over the years, the editors have drawn on the talents and expertise not only of ISEAS' own professional research staff and visiting fellows, but have also reached out to tap leading scholars and analysts elsewhere in Southeast and East Asia, Australia and New Zealand, North America, and Europe. A full list of contributors over forty years reads like a kind of whos' who in Southeast Asian Studies. Regardless of specific events and outcomes in political, economic, and social developments in Southeast Asia's future, we can expect future editions of Southeast Asian Affairs to continue to provide the expert analysis that has marked the publication since its founding. It has become an important contributor to the knowledge base of contemporary Southeast Asia." - Donald E. Weatherbee, Russell Distinguished Professor Emeritus, University of South Carolina

Rethinking Democracy Promotion in International Relations Jul 24 2019 This book traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies. Democracy promotion is widely considered to constitute a hypocritical and failed 'grand international narrative' of the 1990s and has allegedly been replaced by other, more pressing and academically more captivating concerns, such as conflict management, statebuilding and climate change. This book challenges this position and argues that the core notions of democracy promotion, such as empowerment, inclusion and responsiveness, are a key concern of contemporary international policymakers. Drawing on the work of Michel Foucault, Hannah Arendt as well as John Dewey, it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management, statebuilding and climate change. The central development, the book observes, is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social. The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and complex, which accounts for democracy's current but neglected centrality. This book will be of much interest to students of democracy, intervention, statebuilding, global governance and IR in general.

Vision and Visual Perception Feb 20 2022 Vision is about insight, and visual perception is about cognition - and they form the foundation of how we see the world. Duco A. Schreuder, a physicist and psychologist, explores the finer details of each in this groundbreaking book that explores human consciousness and perception. Sharing virtually everything he's learned over a varied career spanning more than sixty years, he examines a wide array of topics, including how we understand what we visually process, how we store and retrieve information, the role that neurons play in how what we see, and much more. While Schreuder isn't afraid to

disagree with other leading thinkers, he relies on science and focuses on the facts behind it so you can understand lighting, visual perception, engineering design, and applied and experimental physics. Looking is about insight, whereas seeing is about knowledge, and you need to know how each one works to truly understand how humanity views the world. Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline, you'll be well served by taking a closer look at *Vision and Visual Perception*.

Asexuality and Sexual Normativity Aug 24 2019 The last decade has seen the emergence of an increasingly high profile and politically active asexual community, united around a common identity as 'people who do not experience sexual attraction'. This unique volume collects a diverse range of interdisciplinary empirical and theoretical work which addresses this emergence, raising important and timely questions about asexuality and its broader implications for sexual culture. One of the most pressing and contentious issues within academic and public debates about asexuality is what relationship, if any, it has to sexual dysfunction. As well as collecting cutting edge scholarship in the emerging field of asexuality studies, rendering it indispensable to any sexualities course across the range of disciplines, this anthology also addresses this urgent debate, offering a variety of perspectives on how and why some have pathologised asexuality. This includes a range of chapters addressing the broader issues of sexual normativity within which these contemporary debates about asexuality are taking place. This book was originally published as a special issue of *Psychology and Sexuality*.
