Canine Play Behavior May 15 2021 Is it possible that what looks like play is something else entirely? German author Mechthild Käufer presents findings from scores of researchers worldwide who study why dogs play, the benefits they get from play and how to recognize the “ rules ” of play that dogs follow to keep their play behaviors fun and safe. There are dozens of color photographs included to help illustrate the actions of dogs at play.

[Inside of a Dog](#) Jul 29 2022 As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpnickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, Inside of a Dog will allow dog owners to look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

[What It's Like to Be a Dog](#) Sep 18 2021 What does your dog really think about you? To find out, Gregory Berns became the first neuroscientist to persuade dogs to lie in an MRI machine wide awake. Now we know more about our best friends than ever before – how varying capacities for self-control and different value systems set them apart as individuals, and how deeply they understand the words we speak to them. Berns' discoveries have profound implications for how we communicate with and treat these beloved animals. But he didn't stop there. Berns also delves into the inner lives of sea lions, bats, dolphins, and even the extinct Tasmanian tiger. His revolutionary explorations are essential reading for animal lovers of all stripes.

Cat Sense May 03 2020 Cats have been popular household pets for thousands of years, and their numbers only continue to rise. Today there are three cats for every dog on the planet, and yet cats remain more mysterious, even to their most adoring owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection for us, they still don't quite “ get us ” the way dogs do, and perhaps they never will. But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company. In Cat Sense, renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before, using cutting-edge scientific research to dispel the myths and explain the true nature of our feline friends. Tracing the cat's evolution from lone predator to domesticated companion, Bradshaw shows that although cats and humans have been living together for at least eight thousand years, cats remain independent, predatory, and wary of contact with their own kind, qualities that often clash with our modern lifestyles. Cats still have three out of four paws firmly planted in the wild, and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10,000 years ago. Cats are astonishingly flexible, and given the right environment they can adapt to a life of domesticity with their owners—but to continue do so, they will increasingly need our help. If we're to live in harmony with our cats, Bradshaw explains, we first need to understand their inherited quirks: understanding their body language, keeping their environments—however small—sufficiently interesting, and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats. A must-read for any cat lover, Cat Sense offers humane, penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our pets' lives—and ours.

How Dogs Think Nov 01 2022 Our understanding of how dogs think is littered with common misconceptions about the extent of their intellect and how they make sense of the world around them. How Dogs Think unravels the mystery of what a dog can understand and how much dogs can learn. World-renowned dog expert Stanley Coren explores the thought processes of dogs, describes how dogs solve problems, explains the depths and limits of their thinking and examines the kind of concepts which dogs can and cannot deal with. Along with practical advice for people who want to improve their dog's learning ability and working intelligence, How Dogs Think will answer such questions as: Do dogs have a notion of time? To what extent do dogs understand what you say? How sharp are their senses? What do they see and hear? Do dogs have a sense of music, humour, empathy, guilt or love? Do they learn by observation the way that people do? How much can they remember? Do dogs have ESP or the ability to predict earthquakes, and is it true that they can detect cancer or the onset of an epileptic fit in their owners? Drawing on all the latest scientific research, How Dogs Think will enable dog owners everywhere to understand more about what goes on in the mind of their best friend.

What's My Dog Thinking? Sep 30 2022 Learn to recognise what's on your dog's mind. What does it really mean when they roll over and show you their tummy? And why do they sometimes chase their own tails? Drawing on the latest research in dog psychology, this ebook reveals the secret meanings behind more than 80 canine behaviours, including the seven types of dog greeting and why some dogs just won't play fetch! The meaning(s) and root of each behaviour are explained, with visuals picking out the subtle body language so you can learn to interpret what your dog is thinking. Practical tips follow, for how to respond to what your dog is telling you, guiding their behaviour through positive reinforcement techniques, if needed. Advanced Dogwatching features help you explore key behaviours in greater depth, such as the "prey drive" instinct that can set your dog off chasing. And strategic Survival Guides give you the top 5 best tips for successfully navigating everyday situations, such as playing in the park or visiting the vet. With What's My Dog Thinking you can put yourself in their paws and keep your canine

companion happy, stimulated, well-behaved - and adorable!

How Stella Learned to Talk Aug 25 2019 'A wonderful book.' - Temple Grandin, author of *Animals in Translation* Understand what your canine best friend is thinking with this New York Times bestselling handbook. An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to 'talk' from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella 'spoke' her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their best four-legged friend. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* is the indispensable dog book for you and your puppy pal.

Think Like a Dog Oct 20 2021 They're loyal, loving, and big-hearted—dogs are our best friends for a good reason. Yet they have much more to offer than just love and friendship. Let CEO Scott MacDonald and rescue dog Sadie show you how to have a more rewarding life and a more successful career in *Think Like a Dog*. With whimsy and insight, Scott and Sadie offer important lessons in loyalty, persistence, leaving your mark, and always being a great sniffer. Scott reveals what Sadie and other dogs teach us about successful work habits and organizational strategies for outstanding business success. Want a better, happier, and more satisfying life? Want to be successful? Start by understanding a dog's perspective and applying the lessons learned!

My Dog: The Paradox Nov 28 2019 The newest collection of the popular web comic, *The Oatmeal*.

Pets on the Couch Jun 03 2020 "A celebrated veterinary behaviorist describes the practice of One Medicine, which hinges on the belief that humans and other animals have minds that work the same way, experience similar emotions and share the same neurochemistry,"--NovelList.

What Is My Dog Thinking? Dec 22 2021 Happy, angry, playful, distressed? There are probably times when you wish you knew what your dog was thinking. From tail wagging to growling, from play-bowing to lip licking, this fascinating book explains why your dog behaves the way he does. *What is my Dog Thinking?* covers six major aspects of dog behaviour: *Social behaviour *Life in a hierarchy *Food and fitness

*Reproduction *Staying safe *Dogs and people

Survival of the Friendliest Aug 30 2022 ' Brilliant, eye-opening, and absolutely inspiring – and a riveting read. ' Cass Sunstein, author of *How Change Happens* and co-author of *Nudge* What is the secret to humanity ' s evolutionary success? Could it be our strength, our intellect... or something much nicer? From the authors of New York Times bestseller *The Genius of Dogs* comes a powerful new idea about how ' friendliness ' is the key factor in the flourishing of our species. Hare and Woods present an elegant new theory called self-domestication, looking at examples of co-operation and empathy and what this can tell us about the evolutionary success of *Homo sapiens*...

Animals Make Us Human Jul 25 2019 Drawing on the latest scientific research and her own work with animals, the author discusses the emotional needs of animals and how to fulfill them, challenging common myths about animal emotions, mental stimulation, and emotional well-being.

Just a Dog Mar 01 2020 How can we make sense of acts of cruelty towards animals?

Beyond Words: What Wolves and Dogs Think and Feel (A Young Reader's Adaptation) Jul 17 2021 Eye-opening, wise, and filled with triumphant and heartbreaking stories about the wolf population at Yellowstone (as well as some personal anecdotes about dogs), Carl Safina's *Beyond Words: What Wolves and Dogs Think and Feel* accessibly explores the mysteries of animal thought and behavior for young readers. Weaving decades of field research with exciting new discoveries about the brain, and complete with astonishing photos, *Beyond Words* offers an extraordinary look at what makes these animals different from us, but more importantly, what makes them similar, namely, their feelings of joy, grief, anger, and love. These similarities between human and nonhuman consciousness and empathy allow the reader to reexamine how we interact with animals as well as how we see our own place in the world.

I Had a Black Dog Sep 26 2019 'I Had a Black Dog' says with wit, insight, economy and complete understanding what other books take 300 pages to say. Brilliant and indispensable.' - Stephen Fry 'Finally, a book about depression that isn't a prescriptive self-help manual. Johnston's deftly expresses how lonely and isolating depression can be for sufferers. Poignant and humorous in equal measure.' Sunday Times There are many different breeds of Black Dog affecting millions of people from all walks of life. The Black Dog is an equal opportunity mongrel. It was Winston Churchill who popularized the phrase Black Dog to describe the bouts of depression he experienced for much of his life. Matthew Johnstone, a sufferer himself, has written and illustrated this moving and uplifting insight into what it is like to have a Black Dog as a companion and how he learned to tame it and bring it to heel.

The Curious Incident of the Dog in the Night-time Mar 13 2021 Winner of the Whitbread Book of the Year 'Outstanding...a stunningly good read' Observer 'Mark Haddon's portrayal of an emotionally dissociated mind is a superb achievement... Wise and bleakly funny' Ian McEwan *The Curious Incident of the Dog in the Night-Time* is a murder mystery novel like no other. The detective, and narrator, is Christopher Boone. Christopher is fifteen and has Asperger's Syndrome. He knows a very great deal about maths and very little about human beings. He loves lists, patterns and the truth. He hates the colours yellow and brown and being touched. He has never gone further than the end of the road on his own, but when he finds a neighbour's dog murdered he sets out on a terrifying journey which will turn his whole world upside down.

Do Animals Think? Oct 08 2020 Does your dog know when you've had a bad day? Can your cat tell that the coffee pot you left on might start a fire? Could a chimpanzee be trained to program your computer? In this provocative book, noted animal expert Clive Wynne debunks some commonly held notions about our furry friends. It may be romantic to ascribe human qualities to critters, he argues, but it's not very realistic. While animals are by no means dumb, they don't think the same way we do. Contrary to what many popular television shows would have us believe, animals have neither the "theory-of-mind" capabilities that humans have (that is, they are not conscious of what others are thinking) nor the capacity for higher-level reasoning. So, in Wynne's view, when Fido greets your arrival by nudging your leg, he's more apt to be asking for dinner than commiserating with your job stress. That's not to say that animals don't possess remarkable abilities--and *Do Animals Think?* explores countless examples: there's the honeybee, which not only remembers where it found food but communicates this information to its hive-mates through an elaborate dance. And how about the sonar-guided bat, which locates flying insects in the dark of night and devours lunch on the wing? Engagingly written, *Do Animals Think?* takes aim at the work of such renowned animal rights advocates as Peter Singer and Jane Goodall for falsely humanizing animals. Far from impoverishing our view of the animal kingdom, however, it underscores how the world is richer for having such a diversity of minds--be they of the animal or human variety.

Think Like Your Dog and Enjoy the Rewards Jan 11 2021

We Think the World of You Jan 29 2020 David Remfray has long been fascinated by the relationships that develop between dogs and their owners. In this charming new book, his delicate portraits in watercolour and gouache reveal the mutual understanding and sympathy of these partnerships. Many of his portraits are accompanied by sketches from the artist's many notebooks alongside brief accounts by his sitters of how dog and owner came to find each other. Remfray's lively watercolors and sketches illustrate such celebrities as Ethan Hawke (and Nina),

Susan Sarandon (and Penny and Rigby) and Alan Cumming (and Honey). Some of the sitters were fellow residents at the iconic Bohemian outpost, the Chelsea Hotel.

Think Dog Feb 21 2022 In the 1980s and 1990s John Fisher revolutionised dog training, first in England, then in the US. With his self-deprecating manner and 'Oh! So British' sense of humour, he taught us to 'Think Dog'. In this seminal pet psychology book, he examines the mind of the dog with examples taken from his practical experience, explaining to owners how the world appears from a dog's point of view. The first section of the book traces the ancestry and inherent behaviour of dogs, from their origins as pack animals related to the wolf or the jackal. The second part examines what most people describe as problem behaviour, which is just normal canine behaviour exhibited in the wrong place. The book concludes with an A-Z of common problems, their causes and cures.

Canine Confidential Feb 09 2021 For all the love and attention we give dogs, much of what they do remains mysterious. Just think about different behaviors you see at a dog park: We have a good understanding of what it means when dogs wag their tails—but what about when they sniff and roll on a stinky spot? Why do they play tug-of-war with one dog, while showing their bellies to another? Why are some dogs shy, while others are bold? What goes on in dogs' heads and hearts—and how much can we know and understand? Canine Confidential has the answers. Written by award-winning scientist—and lifelong dog lover—Marc Bekoff, it not only brilliantly opens up the world of dog behavior, but also helps us understand how we can make our dogs' lives the best they can possibly be. Rooted in the most up-to-date science on cognition and emotion—fields that have exploded in recent years—Canine Confidential is a wonderfully accessible treasure trove of new information and myth-busting. Peeing, we learn, isn't always marking; grass-eating isn't always an attempt to trigger vomiting; it's okay to hug a dog—on their terms; and so much more. There's still much we don't know, but at the core of the book is the certainty that dogs do have deep emotional lives, and that as their companions we must try to make those lives as rich and fulfilling as possible. It's also clear that we must look at dogs as unique individuals and refrain from talking about "the dog." Bekoff also considers the practical importance of knowing details about dog behavior. He advocates strongly for positive training—there's no need to dominate or shame dogs or to make them live in fear—and the detailed information contained in Canine Confidential has a good deal of significance for dog trainers and teachers. He also suggests that trainers should watch and study dogs in various contexts outside of those in which they are dealing with clients, canine and human, with specific needs. There's nothing in the world as heartwarming as being greeted by your dog at the end of the workday. Read Canine Confidential, and you'll be on the road to making your shared lives as happy, healthy, and rewarding as they can possibly be.

Dog Is Love Oct 27 2019 A pioneering canine behaviorist draws on cutting-edge research to show that a single, simple trait—the capacity to love—is what makes dogs such perfect companions for humans, and to explain how we can better reciprocate their affection.

How to Teach Physics to Your Dog Apr 01 2020 Original publication and copyright date: 2009.

The Science Behind a Happy Dog Jul 05 2020 How can you be sure that your dog is happy? What can owners do to ensure their dog has the best chance at a long, happy life? Experts in animal behavior, Emma Grigg and Tammy Donaldson, set out to explore our current understanding of canine well-being in this engaging and authoritative guide to dog training. Making use of the latest in animal behaviour research and studies, The Science Behind a Happy Dog covers both scientific approaches to dog raising and practical solutions to common behavioral problems in a clear and accessible style. The science behind canine cognition and body language shows how we can use the clues that our dogs give us to maximize their well-being. This enlightening guide addresses all aspects of a dog's life, including nutrition, socialisation, exercise, reducing stress when visiting the vet, and canine mental health. It is the ultimate training book aimed at teaching owners how to raise a well-behaved, well-adjusted, and happy dog. [Subject: Pet Care, Dog Training, Animal Behavior]

How Dogs Think Apr 25 2022 Bestselling author, psychologist, and world-renowned expert on dog behavior and training Dr. Stanley Coren presents the most informative, in-depth, fascinating book yet on dogs. Bestselling author, psychologist, and world-renowned expert on dog behavior and training Dr. Stanley Coren presents the most informative, in-depth, fascinating book yet on dogs. Acclaimed for its solid scientific research and entertaining, eminently readable style, How Dogs Think gives you the insight that you need to understand the silly, quirky, and apparently irrational behaviors that dogs demonstrate, as well as those stunning flashes of brilliance and creativity that they also can display. It lets you see through a dog's eyes, hear through his ears, and even sense the world through his nose, as Coren presents a fascinating picture of the way dogs interpret their world and their human companions, and of how they solve problems, learn, and take in new information. How Dogs Think also answers questions about our canine companions that have puzzled many: Can dogs count? Do they have an appreciation of art or music? Can a dog learn how to do something just by watching another dog or even a person do it? Do dogs dream? What is the nature of dog personality? Which behaviors are prewired into your dog, and which can you actually change? And, can dogs actually sense future earthquakes or detect cancer? With sound behavioral science and numerous funny, informative anecdotes, experiments, and firsthand observations, How Dogs Think shatters many common myths and misconceptions about our four-legged friends and reveals a wealth of surprises about their mental abilities and potential. It will make you love and appreciate all dogs—including your own—in wonderful new ways.

Beyond Words Nov 20 2021 THE NEW YORK TIMES BESTSELLER I wanted to know what they were experiencing, and why to us they feel so compelling, and so close. This time I allowed myself to ask them the question that for a scientist was forbidden fruit: Who are you? Weaving decades of field observations with exciting new discoveries about the brain, Carl Safina's landmark book offers an intimate view of animal behavior to challenge the fixed boundary between humans and animals. Travelling to the threatened landscape of Kenya to witness struggling elephant families work out how to survive poaching and drought, then on to Yellowstone National Park to observe wolves sort out the aftermath of one pack's personal tragedy, the book finally plunges into the astonishingly peaceful society of killer whales living in the crystalline waters of the Pacific Northwest. Beyond Words brings forth powerful and illuminating insight into the unique personalities of animals through extraordinary stories of animal joy, grief, jealousy, anger, and love. The similarity between human and nonhuman consciousness, self-awareness and empathy calls us to re-evaluate how we interact with animals. Wise, passionate, and eye-opening at every turn, Beyond Words is ultimately a graceful examination of humanity's place in the world.

TIME How Dogs Think Jun 27 2022 We love our dogs, and they love us back. Right? Read How Dogs Think, the new Special Edition from the editors of TIME, and discover the rich inner lives of canines—and what they really think about their human friends. How Dogs Think explores what goes on in the brains of canines and reveals how we can forge meaningful bonds with our pets. The latest research and scientific evidence is here to answer your questions: How does a pack work? What are the best ways to train a dog? How do dogs help combat veterans recover? How can you care for an aging or neurotic pet? There's even a hall of fame of top dogs, plus a photographic essay on extreme dogs—the biggest, the fastest, the smartest, and more. Everyone who loves dogs will be amazed and intrigued by this revealing look at our best friends.

The Genius of Dogs Mar 25 2022 The perfect gift for dog lovers and readers of Inside of a Dog by Alexandra Horowitz—this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets. Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In their New York Times bestselling book The Genius of Dogs, husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other

research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends. Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique in the animal kingdom. This dog genius revolution is transforming how we live and work with dogs of all breeds, and what it means for you in your daily life with your canine friend.

The Hidden Life of Dogs Sep 06 2020 “ A fascinating glimpse into the canine world, possibly deeper and more accurate than any we have had until now ” (The New York Times Book Review). Long before the Dog Whisperer, anthropologist Elizabeth Marshall Thomas revealed to readers the nature of pack dynamics, leading to a completely new understanding of dogs, their personalities, and their desires. Based on thirty years of living with and observing dogs, *The Hidden Life of Dogs* asks one question: What do dogs want? To find out, we must meet the pack. First there is Misha, a husky Thomas followed on her daily rounds of more than 130 square miles. Then there is Maria, who adored Misha, bore his puppies, and clearly mourned when he moved away; the brave pug Bingo and his little wife, Violet; the dingo Viva; and other colorful characters. In observing them, Thomas learned that what dogs want most of all is other dogs. Informative and captivating, *The Hidden Life of Dogs* will give every canine owner and canine lover great insight into dog behavior. “ A wonderful book . . . Too bad dogs can ’ t read. They ’ d be fascinated. Dog people will be too. ” —USA Today

Run, Spot, Run Apr 13 2021 “ A thoughtful book ” about how to ensure that the animals we love benefit from the relationship as much as we do (Kirkus Reviews). We feel love for our companions, and happiness that we ’ re providing them with a safe, healthy life. But sometimes we also feel guilt. When we see our cats gazing wistfully out the window, or watch a goldfish swim lazy circles in a bowl, we can ’ t help but wonder: Are we doing the right thing, keeping these independent beings locked up, subject to our control? Is keeping pets actually good for the pets themselves? That ’ s the question that animates Jessica Pierce ’ s powerful *Run, Spot, Run*. A bioethicist and a lover of pets herself (including, over the years, dogs, cats, fish, rats, hermit crabs, and more), Pierce explores the ambiguous ethics at the heart of this relationship, and through a mix of personal stories, philosophical reflections, and scientifically informed analyses of animal behavior and natural history, she puts pet-keeping to the test. Is it ethical to keep pets at all? Are some species more suited to the relationship than others? Are there species one should never attempt to own? And are there ways that we can improve our pets ’ lives, so that we can be confident that we are giving them as much as they give us? “ With gentle humor, clear compelling language, and always in search of the physically and emotionally healthiest lives possible for our animal companions, *Run, Spot, Run* moved me all the more because it ’ s written from the inside looking out. Pierce herself lives with three pets and understands the deep urge so many of us feel to connect across species lines. ” —Barbara King, author of *How Animals Grieve*

Making Dogs Happy Dec 10 2020 Is your dog happy? How do you know? Studies have shown that many dog owners incorrectly interpret their dog’s behaviour and emotions. *Making Dogs Happy* will ensure you’re being a good human to your furry companion. Learn what motivates your particular dog and you can train your dog accordingly, making your dog as happy as they make you. Written by world-leading experts in dog behaviour, *Making Dogs Happy* introduces the idea of dogmanship - the ability to interact with and train dogs. Fully photographed, demonstrating key behaviours of dozens of furry charmers, it’s the one handbook no dog lover can go past.

What Dogs Know Aug 18 2021 My dog understands me! At least, many dog owners think so. New scientific studies actually show that dogs understand a lot about us humans. For example, they can figure out what humans can and cannot see. Some dogs can even distinguish large numbers of toys by name, like Rico, the internationally famous Border collie. But do dogs also understand our emotions? Can they grasp cause and effect relationships? What fascinates us humans about dogs? Is it only the proverbial ‘ puppy dog eyes ’ that make dogs look sympathetic? Or is it the fact that these animals have grown very well-attuned to humans and are willing to cooperate with them? In a total of ten chapters, Juliane Bräuer and Juliane Kaminski present the results of the most important scientific studies of the last twenty years on dog cognition.

Doberman Dog Jun 23 2019 This one-stop Dobermans resource will help you to care for, train, & build a successful partnership with your Doberman Pinscher, & makes a great gift for new owners & experienced Doberman Pinscher lovers. Whether you ’ re just getting your first canine friend or have raised puppies before, you ’ ll learn to think like a dog!

Dog Sense Dec 30 2019 Dogs have been mankind’s faithful companions for tens of thousands of years, yet today they are regularly treated as either pack-following wolves or furry humans. The truth is, dogs are neither—and our misunderstanding has put them in serious crisis. What dogs really need is a spokesperson, someone who will assert their specific needs. Renowned anthrozoologist Dr. John Bradshaw has made a career of studying human-animal interactions, and in *Dog Sense* he uses the latest scientific research to show how humans can live in harmony with—not just dominion over—their four-legged friends. From explaining why positive reinforcement is a more effective (and less damaging) way to control dogs’ behavior than punishment to demonstrating the importance of weighing a dog’s unique personality against stereotypes about its breed, Bradshaw offers extraordinary insight into the question of how we really ought to treat our dogs.

Dogs Think that Every Day is Christmas Jun 15 2021 The author precedes his poem about the contentment of a dog’s life with a preface confessing, once again, an incident when he was twelve years old and struck his dog Pete.

How Dogs Love Us Jan 23 2022 A neuroscientist recounts his efforts to overcome administrative and behavioral hurdles to train his dogs to sit still during an MRI scan, an effort that produced evidence about canine empathy and the human-dog bond.

What Is Your Dog Really Thinking? May 27 2022 When you look into those big, gorgeous puppy-dog eyes, it sometimes seems all too obvious what your dog is thinking - namely, I love you. But there’s more to dogs than meets the eye, and after delving deep into pup psychology we can now reveal the real thoughts behind those adorable faces. Find out what’s going on behind those puppy-dog eyes when your pooch is desperately begging for food, why they insist on digging holes in the garden, and what they really think of your cutesy nicknames.

Breaking Bad Habits in Dogs Nov 08 2020 Written by top international dog trainer and behaviourist, Colin Tennant, this highly illustrated work uses digital video photography to demonstrate various behavioural improvement techniques.
