The Occupiers Jun 19 2021 "In The Occupiers, Michael Gould-Wartofsky--one of the first social scientists on the ground in Zuccotti Park--offers a front-seat view of the action in the streets of New York City and beyond. Painting a vivid picture of everyday life in the square through the use of material gathered in the course of a year of participant observation, Gould-Wartofsky traces the occupation of Zuccotti Park--and some of its counterparts across the United States and around the world--from inception to eviction. He takes up the challenges the occupiers faced, the paradoxes of direct democracy, and the dynamics of direct action and police action and explores the ways in which occupied squares became focal points for an emerging opposition to the politics of austerity, restricted democracy, and the power of corporate America. Much of the discourse on the Occupy phenomenon has treated it as if it lived and died in Zuccotti Park, but Gould-Wartofsky follows the evicted occupiers into exile and charts the evolving strategies of the movement as it seeks to resist, regroup, and reoccupy. Removed from public spaces and news headlines, Occupy has spread out from the financial centers and across an America still struggling to recover in the aftermath of the crisis. Even if the movement fails to achieve radical reform, Gould-Wartofsky maintains, it may well accelerate the pace of change in the United States in the years to come"-- Ebook: Sociology: A Brief Introduction Dec 14 2020 Ebook: Sociology: A Brief Introduction

The role of arginase in endothelial dysfunction Jul 29 2019 In recent years, an increasing number of manuscripts have been published addressing the deleterious role of arginase in endothelial dysfunction. ROS have been shown to play a crucial role in arginase activation, which in turn leads to eNOS dysfunction.

Brazen: Big Banks, Swap Mania And The Fallout Jun 07 2020 For nearly two decades, countless non-profits in the U.S. were forced to pay big banks enormous sums of money to settle or terminate bilateral contracts known as Interest Rate Swaps (IRSs). Officials at non-profits had entered into these costly contracts unaware that each contract has only one winner, and that big banks did not intend to be the losers. The effects of such monetary transfers have been catastrophic. Money-strapped non-profits had to dismiss schoolteachers, shut off water supply to thousands of poor households, and downsize many other essential public services. Local and state governments, public school districts, universities, hospitals and transit authorities from New York to Los Angeles have been among the largest hit. This book presents selected cases and highlights the lack of evidence that decision makers at non-profits had fully understood the terms and complexities of IRSs. The evident unequal bargaining power thus gives rise to the high likelihood of unconscionable contracting. Additionally, for terminating these contracts, big banks collected huge sums of money for services that had not been, and will never be, rendered. Accordingly, questions arise as to whether these termination payments are tantamount to unjust enrichment. Related Link(s)

[Restaging the Past](#) Aug 29 2019 Restaging the Past is the first edited collection devoted to the study of historical pageants in Britain, ranging from their Edwardian origins to the present day. Across Britain in the twentieth century, people succumbed to 'pageant fever'. Thousands dressed up in historical costumes and performed scenes from the history of the places where they lived, and hundreds of thousands more watched them. These pageants were one of the most significant aspects of popular engagement with the past between the 1900s and the 1970s: they took place in large cities, small towns and tiny villages, and engaged a whole range of different organised groups, including Women's Institutes, political parties, schools, churches and youth organisations. Pageants were community events, bringing large numbers of people together in a shared celebration and performance of the past; they also involved many prominent novelists, professional historians and other writers, as well as featuring repeatedly in popular and highbrow literature. Although the pageant tradition has largely died out, it deserves to be acknowledged as a key aspect of community history during a period of great social and political change. Indeed, as this book shows, some traces of 'pageant fever' remain in evidence today.

Patronage Driven Democracy Jul 21 2021 This work builds on the research for my PhD in the Department of Politics and Public Policy, the Flinders University of South Australia. Many people and institutions have contributed to complete my study. I cannot mention all of them here, but I have to mention a few. Associate Professor Janet McIntyre, the principal supervisor and academic adviser during my research higher degree study. She encouraged me to better understanding human value-rationality, contexts and pragmatism in the issues of power and democracy. Dr Craig Matheson has expanded my understanding of rational irrationality in voting that shaped my work at the early stage. Prof Dr Yogi Sugito (the former Rector of Universitas Brawijaya) and Prof Dr Darsono Wisadirana (Dean of Faculty of Social and Political Sciences, Universitas Brawijaya) who strongly encouraged me to study abroad. Prof Ihar Subagio PhD and his staffs at the International Office of Universitas Brawijaya had given me administrative and financial supports. My colleagues at the Political Science Department, Universitas Brawijaya, particularly to Dr Sholih Muadi, Wawan E. Kuswandoro, M.Si, and M. Faishal Aminuddin, M.Si who voluntarily assisted me with logistic and data supports during the fieldwork. Also, to Dwi Budi Santosa PhD for his permit to use local budget (APBD) data collected in the project of East Java Public Expenditure Analysis.

Books in this area provide a unique contribution to understanding the resurgence of religiously motivated violence and hate speech.

Pronunciation and Phonetics Dec 26 2021 This engaging, succinct text is an introduction to both phonetics and phonology as applied to the teaching of pronunciation to English language learners. Section 1 selectively covers the main areas of phonetics and phonology, without going into any area in more depth than the average English language teacher requires or that the average English language teacher trainee can handle. Section 2 focuses on practical issues related to learners and how they learn languages, and what represents good practice in terms of classroom activities for pronunciation—including aspects such as targets, motivation and priorities. The chapters end with activities to help the reader understand concepts. Section 3 provides innovative sample activities which put into practice the theoretical points covered in the first two sections, answers to the various exercises, recommended further reading (both print and non-print), a glossary of technical phonetic terms, and a bibliography of works on pronunciation teaching. The text is accompanied by a Companion Website with audio recordings of model pronunciations and audio material relating to the activities.

Pediatric and Congenital Cardiac Care Sep 22 2021 There are growing questions regarding the safety, quality, risk management, and costs of PCC teams, their training and preparedness, and their implications on the welfare of patients and families. This innovative book, authored by an international authorship, will highlight the best practices in improving survival while paving a roadmap for the expected changes in the next 10 years as healthcare undergoes major transformation and reform. An invited group of experts in the field will participate in this project to provide the timeliest and informative approaches to how to deal with this global health challenge. The book will be indispensable to all who treat pediatric cardiac disease and will provide important information about managing the risk of patients with pediatric and congenital cardiac disease in the three domains of: the analysis of outcomes, the improvement of quality, and the safety of patients.

SYSTEMATIC REVIEWS ON APPROACHES & METHODS IN LANGUAGE TEACHING AND LEARNING Sep 30 2019 The practice of language teaching and learning inside the classroom is, in fact, under the circumstance of both philosophical assumption and ideological framework. Teaching programs and curricular sets are written on the basis of particular assumptions about the nature and the value of knowledge. These assumptions mainly determine the actual decisions in listing what items to be taught and learned along with how those items are delivered. Approaches in language teaching have always been developed, in one hand, under the consideration of linguistic/psychological theories of learning and educational objectives along with the expected demands of classroom teaching and learning in the other hand.

Metals and Neurodegeneration: Restoring the Balance Jun 27 2019 Biometals such as copper, zinc and iron have key biological functions, however, aberrant metabolism can lead to detrimental effects on cell function and survival. These biometals have important roles in the brain, driving cellular respiration, antioxidant activity, intracellular signaling and many additional structural and enzymatic functions. There is now considerable evidence that abnormal biometal homeostasis is a key feature of many neurodegenerative diseases and may have an important role in the onset and progression of disorders such as Alzheimer's, Parkinson's, prion and motor neuron diseases. Recent studies also support biometal roles in a number of less common neurodegenerative disorders. The role of biometals in a growing list of brain disorders is supported by evidence from a wide range of sources including molecular genetics, biochemical

studies and biometal imaging. These studies have spurred a growing interest in understanding the role of biometals in brain function and disease as well as the development of therapeutic approaches that may be able to restore the altered biometal chemistry of the brain. These approaches range from genetic manipulation of biometal transport to chelation of excess metals or delivery of metals where levels are deficient. A number of these approaches are offering promising results in cellular and animal models of neurodegeneration with successful translation to pre-clinical and clinical trials. At a time of aging populations and slow progress in development of neurotherapeutics to treat age-related neurodegenerative diseases, there is now a critical need to further our understanding of biometals in neurodegeneration. This issue covers a broad range of topics related to biometals and their role in neurodegeneration. It is hoped that this will inspire greater discussion and exchange of ideas in this crucial area of research and lead to positive outcomes for sufferers of these neurodegenerative diseases.

**Citizen Science in the Digital Age** Feb 13 2021 James Wynn's timely investigation highlights scientific studies grounded in publicly gathered data and probes the rhetoric these studies employ. Many of these endeavors, such as the widely used SETI@home project, simply draw on the processing power of participants' home computers; others, like the protein-folding game FoldIt, ask users to take a more active role in solving scientific problems. In *Citizen Science in the Digital Age: Rhetoric, Science, and Public Engagement*, Wynn analyzes the discourse that enables these scientific ventures, as well as the difficulties that arise in communication between scientists and lay people and the potential for misuse of publicly gathered data.

**Intellectual Property Issues in Biotechnology** Jan 15 2021 This book integrates a science and business approach to provide an introduction and an insider view of intellectual property issues within the biotech industry, with case studies and examples from developing economy markets. Broad in scope, this book covers key principles in pharmaceutical, industrial, and agricultural biotechnology within four parts. Part 1 details the principles of intellectual property and biotechnology. Part 2 covers plant biotechnology, including biotic and abiotic stress tolerance, GM foods in sustainable agriculture, microbial biodiversity and bioprospecting for improving crop health and productivity, and production and regulatory requirements of biopesticides and biofertilizers. The third part describes recent advances in industrial biotechnology, such as DNA patenting, and commercial viability of the CRISPR/Cas9 system in genome editing. The final part describes intellectual property issues in drug discovery and development of personalized medicine, and vaccines in biodefense. This book is an ideal resource for all postgraduates and researchers working in any branch of biotechnology that requires an overview of the recent developments of intellectual property frameworks in the biotech sector.

**Enter the Alternative School** Oct 04 2022 Enter the Alternative School is an in-depth examination of public school alternatives to traditional educational models in the US. This book analyses how urban education can respond to a system growing increasingly standardised and privatised. As an example, Central Park East Secondary School (CPESS), a public alternative schooling model, successfully served predominantly low-income and minority students. It also changed the New York City public school system while promoting methods that allowed educational institutions to make changes in the lives of their students. Written by a sociologist who was both a student at CPESS and a teacher at a school developed from the CPESS model, the book analyses education from a range of vantage points, assesses outcomes, and invites readers to consider the potential of alternative educational models to address the challenges of reforms that attempt to provide quality education to the low-income and minority students otherwise under served by public schools.

**What You Really Need to Know about Counselling and Psychotherapy Training** Sep 03 2022 Becoming a counsellor or psychotherapist is a transformative and life-changing experience. Some trainees manage this process well, while others struggle to come to terms with the personal impact of their training. In *What You Really Need to Know about Counselling and Psychotherapy Training*, Cathy McQuaid provides an in-depth but accessible guide to the processes of understanding individual motivations for wanting to undertake training and choosing the most appropriate course. Backed by extensive research, the book explains the training process from beginning to end, covering topics including: entry requirements, course curriculum and terms and conditions of training; the training relationship and group process; the challenges of training; the outcomes of counselling and psychotherapy training. McQuaid leads the reader through the process of choosing a course, working with the course leader and with a group of peers and considering potential employment prospects upon completion. Prompting the reader to consider their own personal, professional and educational needs within the framework of training, this is essential reading for anyone thinking of training as a counsellor or psychotherapist and for trainers and training course providers.

**Engineering Ethics for a Globalized World** Oct 24 2021 This volume identifies, discusses and addresses the wide array of ethical issues that have emerged for engineers due to the rise of a global economy. To date, there has been no systematic treatment of the particular challenges globalization poses for engineering ethics standards and education. This volume concentrates on precisely this challenge. Scholars and practitioners from diverse national and professional backgrounds discuss the ethical issues emerging from the inherent symbiotic relationship between the engineering profession and globalization. Through their discussions a deeper and more complete understanding of the precise ways in which globalization impacts the formulation and justification of ethical standards in engineering as well as the curriculum and pedagogy of engineering ethics education emerges. The world today is witnessing an unprecedented demand for engineers and other science and technology professionals with advanced degrees due to both the off-shoring of western jobs and the rapid development of non-Western countries. The current flow of technology and professionals is from the West to the rest of the world. Professional practices followed by Western (or Western-trained) engineers are often based on presuppositions which can be in fundamental disagreement with the viewpoints of non-Westerners. A successful engineering solution cannot be simply technically sound, but also must account for cultural, social and religious constraints. For these reasons, existing Western standards cannot simply be exported to other countries. Divided into two parts, Part I of the volume provides an overview of particular dimensions of globalization and the criteria that an adequate engineering ethics framework must satisfy in a globalized world. Part II of the volume considers pedagogical challenges and aims in engineering ethics education that is global in character.

**New Media and the Nation in Malaysia** May 07 2020 In the four decades or so since its invention, the internet has become pivotal to how many societies function, influencing how individual citizens interact with and respond to their governments. Within Southeast Asia, while most governments subscribe to the belief that new media technological advancement improves their nation's socio-economic conditions, they also worry about its cultural and political effects. This book examines how this set of dynamics operates through its study of new media in contemporary Malaysian society. Using the social imaginary framework and adopting a socio-historical approach, the book explains the varied understandings of new media as a continuing process wherein individuals and their societies operate in tandem to create, negotiate and enact the meaning ascribed to concepts and ideas. In doing so, it also highlights the importance of non-users to national technological policies. Through its examination of the ideation and development of Malaysia's Multimedia Super Corridor mega project to-date and reference to the seminal socio-political events of 2007-2012 including the 2008 General Elections, Bersih and Hindraf rallies, this book provides a clear explanation for new media's prominence in the multi-ethnic and majority Islamic society of Malaysia today. It is of interest to academics working in the field of Media and Internet Studies and Southeast Asian Politics.

Sustaining the States Jul 09 2020 State fiscal decisions have a significant impact on the US economy. Taken together, subnational governments employ more than one out of every eight workers and provide the bulk of all basic governmental services consumed by individuals and businesses. Sustaining the States: The Fiscal Viability of American State Governments will give you a basic understanding of trends in, current status of, and future prospects for the fiscal sustainability of state governments. After reading this book, you should have a great appreciation for the reach and multiple contributions of state governments to individuals and communities across the nation. The book examines the broad range and depth of state revenues, responsibilities, and activities. It begins with an assessment of executive budgeting in the states, then presents the experiences of states with strong executive-driven systems and the various rules and institutions that impact state government budget discipline. The book goes on to examine state revenue sources, debt, pensions, and spending, honing in on vital state functions including education, transportation, health services and public safety. It concludes with an assessment of the challenges that will test the fiscal vibrancy of US state governments going forward: vulnerability to future economic downturns, growing dependence on an increasingly austere federal government, the obsolescence of state tax systems and an ever more coercive system of federalism. Edited by experts, with a hand-picked panel of contributors, the book delineates the resources that states generate and use to conduct the business of government. The chapters outline the very real and significant constraints on the ability of the states to fulfill their responsibilities and introduce several challenges that state governments face and are actively addressing as they strive for fiscal sustainability. These features provide a clear, realistic understanding of state operations and financing in the United States, today. The book should also leave you with a sense of optimism for the capacity of state governments to advance forward.
