Antimicrobial Peptides: Utility Players in Innate Immunity Aug 29 2022 Antimicrobial peptides (AMPs) represent an ancient group of molecules with diverse functions in innate immunity. To date, more than 1000 naturally-occurring AMPs have been identified which

display considerable diversity in their primary sequences, lengths, structures and biological activities. Despite this variability, AMPs are broadly classified according to homologous secondary structures as cathelicidins (linear α -helical peptides), defensins (β -strand peptides connected by disulfide bonds) and bactenecins (loop peptides). Most, but not all, AMPs are cationic with amphipathic faces. These biochemical properties bestow many peptides with potent antimicrobial activity by facilitating interactions with negatively charged microbial cell membrane components, thereby increasing membrane permeability and resulting in microbial death. Other indirect effects on microbial physiology have been reported including inhibition of DNA/RNA synthesis, impaired protein synthesis and folding, disruption of cell wall formation and inhibition of microbial cell metabolism. Thus, with the spread of antibiotic-resistant microbial pathogens, AMPs have emerged as exciting candidates for next generation anti-infective therapies. However, recent studies suggest that AMPs have evolved other mechanisms of pathogen clearance. Immunomodulation is a novel approach to antimicrobial therapy that centres on boosting host immunity rather than direct microbial killing. This is also an attractive means to treat sepsis and other immune-mediated diseases. Whilst several cationic peptides are under investigation as antimicrobial agents, a select few show a remarkable ability to protect against lethal endotoxaemia and clinically-relevant bacterial infections including methicillin-resistant *Staphylococcus aureus* (MRSA). The molecular mechanisms responsible for this protection are only beginning to emerge but include prevention of innate cell activation by targeting key stages of bacterial endotoxin-mediated cell signalling. In this research topic, hosted by *Frontiers in Molecular Innate Immunity*, we aim to highlight key areas of AMP research including peptide diversity, structure-function relationships, antimicrobial activity and mechanisms of immune-modulation. We also aim to stimulate discussion on the emerging therapeutic potential of AMPs including antifungal, antiviral and anticancer applications.

The Judge's Daughter Sep 17 2021 Agnes Makepeace has always been courageous and strong-minded and on the surface, she couldn't be more unlike the chilly, reserved Helen Spencer. Agnes knows there is a mystery to her own background and is determined to discover the truth about her past. She believes the key to unlock the secret is held with husband's employer, Judge Zachary Spencer of Lambert House - a mean-spirited widower and solitary man. Judge Spencer has long neglected his daughter, Helen and notices her even less when he takes a new wife. But he has underestimated both the extent of his daughter's misery and her determination to enact her revenge. Helen's new-found confidence causes her to behave in a way that will have a lasting, and shocking impact on both families and, surprisingly, leads to a lifelong friendship with Agnes. Yet it is only when the broodingly silent house on Skirlaugh Rise ceases to hold its breath and deliver the answers that Agnes has been seeking that she can finally find the peace of mind she has always longed for.

The Puzzle Box Aug 17 2021 An intriguing anthology where reality is transient and the puzzle box holds the key to the meaning of life. Archeology Professor Albert Mallory understands reality. He knows the way the world works. When he steals an ancient puzzle box to pay off gambling debts, he thinks the only mysterious thing about the artifact is how to get it open. But when a stranger appears at Albert's door demanding to see the box, Albert is plunged into mysteries he never dreamt possible. Through the tales of four others who succeeded in opening the puzzle box — a musician named Warlock with a weakness for witches; photographer Autumn Bailey, with a strange link to the past; video store clerk Angela Matteredly with those unworldly eyes; and a comic book illustrator called Sam, on a quest for his life — Albert learns that reality is transient and the way the world works is not found in text books.

Class Actions in Europe Sep 05 2020 Not so long ago, class actions were considered to be a textbook example of American exceptionalism; many of their main features were assumed to be incompatible with the culture of the civil law world. However, the tide is changing; while there are now trends in the USA toward limiting or excluding class actions, notorious cases like Dieselgate are moving more and more European jurisdictions to extend the reach of their judicial collective redress mechanisms. For many new fans of class actions, collective redress has become a Holy Grail of sorts, a miraculous tool that will rejuvenate national systems of civil justice and grant them unprecedented power. Still, while the introduction of various forms of representative action has virtually become a fashion, it is anything but certain that attempting to transplant American-style class action will be successful. European judicial structures and legal culture(s) are fundamentally different, which poses a considerable challenge. This book investigates whether class actions in Europe are indeed a Holy Grail or just another wrong turn in the continuing pursuit of just and effective means of protecting the rights of citizens and businesses. It presents both positive and critical perspectives, supplemented by case studies on the latest collectivization trends in Europe's national civil justice systems. The book also shares the experiences of some non-European jurisdictions that have developed promising hybrid forms of collective redress, such as Canada, Brazil, China, and South Africa. In closing, a selection of topical

international cases that raise interesting issues regarding the effectiveness of class actions in an international context are studied and discussed.

Confusion to Our Enemies May 26 2022 From the Foreword by Professor Tom Devine: Arnold Kemp, one of the greatest of Scottish journalists and editors of the 20th century, died prematurely at the age of 63 in 2002. He edited The Herald with memorable elan and panache between 1981 and 1994 and his prolific writings also regularly graced the pages of the Scotsman, the Guardian and the Observer in a career which spanned more than four decades from the year he began his first job in journalism in 1959 as a sub-editor on the Scotsman, fresh out of Edinburgh University. Kemp left behind him a rich personal but uncatalogued archive of newspaper articles, chapters in books and opinion pieces. These have now been expertly harvested and selected by his daughter, Jackie. Reading them, it is clear that her father was a master of his trade, and that his published work provides a perceptive and illuminating guide to the key historical events of his lifetime in Scotland. This book encompasses the arly rise of nationalism, the traumatic de-industrialisation and then transformation of the economy in the 1980s, the impact of the Thatcher governments on Scotland, the halting progress toward devolution and then the successful establishment of the Scottish Parliament in the last decade of the century. These events and others are all recorded here, not in the arid descriptive prose of the chronicler, but with the eloquence, punch and insight for which Kemp was noted. As a result the recent Scottish past is brought alive in an engaging and highly readable fashion. The immediacy of the reportage, the sense of a writer who, because of his journalistic and editorial eminence knew all the principal actors involved and was close to the unfolding of great events, are all plainly evident to the reader. But Kemp also scorns mediocrity, incompetence, humbug and hypocrisy in the political and cultural life of the nation and several of the excerpts are also fair and balanced judgements, perhaps most notably in the evaluation of the impact of Margaret Thatcher on Scotland. There is a liveliness and breadth in the writing, redolent of Kemp's own personal wide international horizons, his travels in America and Europe, love of conviviality and the craic. The passion for life shines through. This is an important text for anyone wishing to come to a fuller understanding of how Scotland developed from the dark days of the Second World War to the current debates over independence. It is also a hugely enjoyable read which many will savour with interest and delight for its own sake.
