Social Studies, Literacy, and Social Justice in the Common Core Classroom Mar 01 2020 Inspired by the author's research and work with preservice and beginning teachers, this book presents a unique framework to help educators (grades 3-8) embed their efforts to teach social studies for social justice within the context of literacy. It is a resource for using primary and other sources to offer students new ways of thinking about history while meeting Language Arts Common Core Standards demands for information text and critical thinking. Grounded in the daily realities of today's public schools, the framework offers a way of planning that takes into account teaching factors that include pressures for content coverage, preparing students for high-stakes tests, and the low importance placed by many districts on including social studies in the curriculum. Each chapter explains how teachers can restructure, reshape, and work with mandated curriculum materials to teach from a critical perspective. The book also discusses how to meet Common Core Standards by teaching language arts and social studies as complementary subjects. Book Features: Sample lessons. Text boxes indicating connections to Common Core Standards. Reflection exercises that help further extend concepts and understandings into classroom practice. Ruchi Agarwal-Rangnath is an adjunct professor in Elementary Education at San Francisco State University, and vice president of the National Association of Multicultural Education, California Chapter (NAME-CA). As an educational consultant she works with schools to develop and enrich their mission of teaching toward equity and social justice. "If you are a teacher, or preparing to become a teacher, this is a book you will want to keep so that you can refer back to it again and again. If you are a teacher educator, this is a book that will help you connect demands on teachers today with a compelling vision of academically rich, student-centered, social justice teaching. In either case, you are in for a treat." —From the Foreword by Christine Sleeter, professor emeritus, California State University Monterey Bay "This is an important contribution for pre-service teachers and those in districts who are willing to think deeply about how to build content knowledge in an integrated fashion by combining social studies and language arts. Much more attention to social studies from the perspective of social justice is needed!" —Donna Ogle, professor emeritus, National-Louis University

Teaching Core Practices in Teacher Education Nov 08 2020 In Teaching Core Practices in Teacher Education, Pam Grossman and her colleagues advocate an approach to practice-based teacher education that identifies "core practices" of teaching and supports novice teachers in learning how to enact them competently. Examples of core practices include facilitating whole-class discussion, eliciting student thinking, and maintaining classroom norms. The contributors argue that teacher education needs to do more to help teachers master these professional skills, rather than simply emphasizing content knowledge. Teaching Core Practices in Teacher Education outlines a series of pedagogies that teacher educators can use to help preservice students develop these teaching skills. Pedagogies include representations of practice (ways to show what this skill looks like and break it down into its component parts) and approximations of practice (the ways preservice teachers can try these skills out as they learn). Vignettes throughout the book illustrate how core practices can be incorporated into the teacher education curriculum. The book draws on the work of a consortium of teacher educators from thirteen universities devoted to describing and enacting pedagogies to help novice teachers develop these core practices in support of ambitious and equitable instruction. Their aim is to support teacher educator learning across institutions, content domains, and grade levels. The book also addresses efforts to support teacher learning outside formal teacher education programs. Contributors Chandra L. Alston Andrea Bien Janet Carlson Ashley Cartun Katie A. The Core: Teaching Your Child the Foundations of Classical Education Feb 21 2022 In the past, correct spelling, the multiplication tables, the names of the state capitals and the American presidents were basics that all children were taught in school. Today, many children graduate without this essential knowledge. Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study. Leigh Bortins, a leading figure in the homeschooling community,

is having none of it. She believes that there are core areas of knowledge that are essential to master. Without knowing the multiplication tables, children can't advance to algebra. Without mastery of grammar, students will have difficulty expressing themselves. Without these essential building blocks of knowledge, students may remember information but they will never possess a broad and deep understanding of how the world works. In *The Core*, Bortins gives parents the tools and methodology to implement a rigorous, thorough, and broad curriculum based on the classical model, including: - Rote memorization to cement knowledge - Systematic learning of geography, historical facts, and timelines - Reading the great books and seminal historical documents instead of adaptations and abridged editions - Rigorous training in math and the natural sciences
