**Pet-Specific Care for the  
Veterinary Team** Feb 09 2021  
A practical guide to identifying  
risks in veterinary patients and  
tailoring their care accordingly  
Pet-specific care refers to a  
practice philosophy that seeks  
to proactively provide  
veterinary care to animals  
throughout their lives, aiming  
to keep pets healthy and treat  
them effectively when disease  
occurs. Pet-Specific Care for  
the Veterinary Team offers a  
practical guide for putting the  
principles of pet-specific care  
into action. Using this  
approach, the veterinary team  
will identify risks to an  
individual animal, based on  
their particular circumstances,

7/22

and respond to these risks with  
a program of prevention, early  
detection, and treatment to  
improve health outcomes in  
pets and the satisfaction of  
their owners. The book  
combines information on  
medicine and management,  
presenting specific guidelines  
for appropriate medical  
interventions and material on  
how to improve the financial  
health of a veterinary practice  
in the process. Comprehensive  
in scope, and with expert  
contributors from around the  
world, the book covers pet-  
specific care prospects,

### **Design Tools for Evidence-Based Healthcare Design**

Dec 07 2020 The growing movement towards evidence-based healthcare design has largely emphasised a change of culture and attitudes. It has advocated for new ways of working, but until now, it has not focused on equipping healthcare clients and their

designers with the practical means to exploit the potential benefits from evidence-based architectural design.

Development of indicators and tools that aid designers and users of the built environments in thinking about quality enhances the design process to achieve better outcomes.

Importantly, design tools can support managers and designers through end-user involvement and an increased understanding of what patients and staff expect from their healthcare facilities. They can facilitate the creation of patient-centred environments which improve user satisfaction. Design Tools for Evidence-Based Healthcare

Design: Discusses the tools that are being used to achieve, design quality and excellence within the context of NHS procurement systems such as PFI, Procure21 and others.

Collates information that increases our understanding of these tools, in order to be able to make the best use of them. Clarifies where, during the various stages of a building's life (from inception, design, construction, occupation and re-use), these tools should be used in order to derive the benefits possible from evidence-based design. Provides in one place an authoritative reference publication that will act as a memory, a user guide and manual for these design

tools Illustrated with case studies from throughout the UK and written by a well-known expert in the field, this book will provide essential reading for anyone involved in healthcare design.

**Listening, Learning, Caring & Counselling** Dec 27 2019 At the centre of any caring role is listening attentively to the concerns, stories and needs of others. But to develop the skills of listening, learning, caring and counselling, you need support and training. Listening, Learning, Caring and Counselling (LLCC) is the comprehensive guide, full of ideas and techniques, to fill that role. It is not a book about fundamental counselling skills.

20/22

Instead, Author Dr. Cate Howell focuses on how professionals can assist clients as they work through the issues they commonly present with - such as low mood, relationship issues, loss and grief. A number of different therapies and their related techniques are described and synthesized into the LLCC approach, while case-studies, skills and tips for everyday practice make it a practical and user-friendly resource. LLCC is essential reading for counsellors, support workers, case workers, medical practitioners, health professionals, emergency workers and those in the fields of human resources and life coaching.

ironically, had begun in Nazi Germany thirty years before. This is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. Author Chris Riley looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. He also describes the space suits worn by the crew, with their special life support systems. Launch procedures are described, 'flying' the Saturn V, navigation, course correction 'burns', orbital rendezvous techniques, flying the LEM, moon landing, moon walk, take-off from the moon, and earth re-entry procedure.
