**The Story of S. May 28 2022** What if.....? After the death of JFK, Jr., the press was flooded with mesmerizing pictures of him, not to mention some rather lurid tabloid articles. The author found herself drawn into repeated, obsessive fantasies of what knowing him or having a romance with him might have been like. Ultimately, she found herself writing down one of her fantasies as a novel. She changed the names to make clear that this is entirely a work of fiction, her own fantasies, not actually about the real people who inspired her writing. She wove in her own life experiences: her son's Asperger's Syndrome, home birth, and information from a suicide prevention course. She also could not resist drawing in some pet political issues, for instance regarding abortion, pesticide spraying, and drug legalization. The result is an eminently readable romance and psychological study, which should enthrall any woman of a certain age who fantasizes about younger celebrities or anyone who is interested in Asperger's Syndrome.

The Cryptographers' Track (CT-RSA) is a research conference within the RSA Conference. CT-RSA began in 2001, and has become one of the major established venues for presenting cryptographic research papers to a wide variety of audiences. CT-RSA 2008 was held in San Francisco, California from April 8 to April 11. The proceedings of CT-RSA 2008 contain 26 papers selected from 95 submissions pertaining to all aspects of cryptography. Each submission was reviewed by at least three reviewers, which was made possible by the hard work of 27 Program Committee members and many external

reviewers listed on the following pages. The papers were selected following a detailed online discussion among the Program Committee members. The program included an invited talk by Sha? Goldwasser. The current proceedings include a short abstract of her talk. I would like to express my deep gratitude to the Program Committee members, who volunteered their expertise and hard work over several months, as well as to the external reviewers. Special thanks to Shai Halevi for providing and maintaining the Web review system used for paper submission, reviewing, and final-version preparation.
