Options for Minimizing Fuel-Related Contaminants in Lakes and Reservoirs Dec 27

2019 The primary objective of the report was to provide reservoir managers with technical and economic information regarding the possible methods for controlling the levels of MTBE and BTEX in reservoir water supplies. This report comprehensively evaluates options to give practical data and advice to water managers who wish to consider the benefits of dual use (use to store drinking water supplies and use as recreational attractions) without introducing unacceptable health risks into the water bodies being managed. Panama Jack Jan 20 2022 In 1999, Admiral Thomas Moorer, a former chairman of the Joint Chiefs of Staff, charged that China plotted to take over the Panama Canal and use the area to launch a nuclear attack on the United States. In the U.S. Senate, Trent Lott, the then-Republican Senate Majority Leader, expressed concern that the Chinese could deny U.S. ships passage. Now, a CIA informant in Panama with possible information on the Chinese take-over has been killed and the agency has to again look at the potential Communist threat. It steps up its investigation by sending veteran CIA agent Jack Dallas to find out the truth. A former Navy diver, Dallas has to dive deep into the canal and the Hong Kong company that runs the canal ports. His investigation leads him to a prominent

businessman in Shanghai, bankers in Monaco and Russian mobsters in Miami before finding out the stunning truth and racing to prevent a major catastrophe in the canal.
