Across the Pond Feb 09 2021 The greatest journey isn't from England to the States, it's the one that two men take on the way to find each other. Sebastian Brown is on a mission to rescue the Arizona Raptors and a vow he made to a friend in college. Either that or he's on vacation. He's not entirely sure that he's made up his mind yet. Either way, traveling from England, to the arid desert of Arizona isn't exactly a picnic, particularly with the doubts and worries he takes with him. He's turned even the worst of companies around, but faced with the challenge of improving the reputation of a hockey team that everyone seems to hate, he knows his work is cut out for him. Focus is key, but that is easier said than done when Seb is sent into a tailspin by the intriguing Alejandro. Seb's entire marketing plan hinges on making Alex a poster boy for equality and fair play. But with Alex's utter dedication to the game, and his dark secretive eyes, the gorgeous Alex is stubborn, opinionated, doesn't want any part of being the team focus, and worst of all, doesn't appear to like Seb at all. It takes everything that Seb has to keep his hands off of Alex, but things get out of hand and Seb's life might never be the same again. Alejandro Garcia has had to work hard to get where he's at. Born to Mexican immigrants, his siblings and himself have never had it easy in this new country their parents dreamed of calling home. A native son of Arizona, Alex has always been the odd man out on the ice but he's not going to let a stupid thing like his heritage get in the way of his dreams. He's now a Raptor and he plans to put all that training and collegiate hockey experience to good use. Working hard comes naturally to him. It's something his parents have instilled in him from the time he was a toddler. Being one of a handful of Latino hockey players makes him strive for success with even more determination. His first pro season has had some ups but a lot more downs, but Alex is one stubborn young man and failure is not an option. As the Raptors struggle to rebuild not only their team but their core values, Alex finds himself drawn to one of the owner's friends, a tall, lanky Brit with the face of an angel and an accent and attitude that bewitches and befuddles him. Sebastian is everything he thought he would never be attracted to but he can't push the sexy, older, fun-loving man out of his thoughts. If ever there were a man he would not be able to take home to his parents - not that he can bring a man home since he is deeply closeted - it's Sebastian, but desire knows no socioeconomic, age, or international borders. The heart wants what the heart wants and Alejandro's wants Sebastian.

Developing a Protocol for Observational Comparative Effectiveness Research: A User's Guide May 12 2021 This User's Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to (1) identify key considerations and best practices for research design; (2) build a protocol based on these standards and best practices; and (3) judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design, including: developing study objectives, defining and refining study questions, addressing the heterogeneity of treatment effect, characterizing exposure, selecting a comparator, defining and measuring outcomes, and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. Ancient Worlds Jun 01 2020 'This vivid and engaging book brings to life some of the most important moments in ancient history, moments that have shaped not only the politics and culture of bygone eras, but the institutions, thoughts and fantasies of our time.' Yuval Noah Harari (Sapiens) 'A bold and imaginative page-turner that challenges ideas about the world of antiquity.' Peter Frankopan (The Silk Roads) 'As panoramic as it is learned, this is ancient history for our globalised world.' Tom Holland (Dynasty, Rubicon) _____ Acclaimed historian and TV presenter Michael Scott guides us through an epic story spanning ten centuries to create a bold new reading of the classical era for our globalised world. Scott challenges our traditionally western-focused perception of the past, connecting Greco-Roman civilisation to the great rulers and empires that swept across Central Asia to India and China - resulting in a truly global vision of ancient history. With stunning range and richness Ancient Worlds illustrates how the great powers and characters of antiquity shared ambitions and crises, ways of thinking and forms of governing: connections that only grew stronger over the centuries as political systems evolved, mighty armies clashed, universal religions were born and our modern world was foreshadowed. Scott focuses on three epochal 'moments' across the ancient globe, and their profound wider significance: from 509-8 BCE (birth of Athenian democracy and Rome's republic, also the age of Confucius's teachings in China); to 218 BCE (when Hannibal of Carthage challenged Rome and China saw its first emperor); to 312 CE, when Constantine sought to impose Christianity on the Roman world even as Buddhism was pervading China via the vast trading routes we now know as the 'Silk Roads.' A major work of global history, Michael Scott's enthralling journey challenges the way we think about our past, re-draws the map of the classical age to reveal its hidden connections, and shows us how ancient history has lessons for our own times.

2-Oxoglutarate-Dependent Oxygenases Jun 13 2021 Since the discovery of the first examples of 2-oxoglutarate-dependent oxygenase-catalysed reactions in the 1960s, a remarkably broad diversity of alternate reactions and substrates has been revealed, and extensive advances have been achieved in our understanding of the structures and catalytic mechanisms. These enzymes are important agrochemical targets and are being pursued as therapeutic targets for a wide range of diseases including cancer and anemia. This book provides a central source of information that summarizes the key features of the essential group of 2-oxoglutarate-dependent dioxygenases and related enzymes. Given the numerous recent advances and biomedical interest in the field, this book aims to unite the latest research for those already working in the field as well as to provide an introduction for those newly approaching the topic, and for those interested in translating the basic science into medicinal and agricultural benefits. The book begins with four broad chapters that highlight critical aspects, including an overview of possible catalytic reactions, structures and mechanisms. The following seventeen chapters focus on carefully selected topics, each written by leading experts in the area. Readers will find explanations of rapidly evolving research, from the chemistry of isopenicillin N synthase to the oxidation mechanism of 5-methylcytosine in DNA by ten-eleven-translocase oxygenases.

The New Institutionalism in Organizational Analysis Oct 05 2020 Long a fruitful area of scrutiny for students of organizations, the study of institutions is undergoing a renaissance in contemporary social science. This volume offers, for the first time, both often-cited foundation works and the latest writings of scholars associated with the "institutional" approach to organization analysis. In their introduction, the editors discuss points of convergence and disagreement with institutionally oriented research in economics and political science, and locate the "institutional" approach in relation to major developments in contemporary sociological theory. Several chapters consolidate the theoretical advances of the past decade, identify and clarify the paradigm's key ambiguities, and push the theoretical agenda in novel ways by developing sophisticated arguments about the linkage between institutional patterns and forms of social structure. The empirical studies that follow—involving such diverse topics as mental health clinics, art museums, large corporations, civil-service systems, and national politics—illustrate the explanatory power of institutional theory in the analysis of organizational change. Required reading for anyone interested in the sociology of organizations, the volume should appeal to scholars concerned with culture, political institutions, and social change.

Freedom Papers Aug 03 2020 Around 1785, a woman was taken from her home in Senegambia and sent to Saint-Domingue in the Caribbean. Those who enslaved her there named her Rosalie. Her later efforts to escape slavery were the beginning of a family's quest, across five generations and three continents, for lives of dignity and equality. Freedom Papers sets the saga of Rosalie and her descendants against the background of three great antiracist struggles of the nineteenth century: the Haitian Revolution, the French Revolution of 1848, and the Civil War and Reconstruction in the United States. Freed during the Haitian Revolution, Rosalie and her daughter Elisabeth fled to Cuba in 1803. A few years later, Elisabeth departed for New Orleans, where she married a carpenter, Jacques Tinchant. In the 1830's, with tension rising against free persons of color, they left for France. Subsequent generations of Tinchants fought in the Union Army, argued for equal rights at Louisiana's state constitutional convention, and created a transatlantic tobacco network that turned their Creole past into a commercial asset. Yet the fragility of freedom and security became clear when, a century later, Rosalie's great-great-granddaughter Marie-José was arrested by Nazi forces occupying Belgium. Freedom Papers follows the Tinchants as each generation tries to use the power and legitimacy of documents to help secure freedom and respect. The strategies they used to overcome the constraints of slavery, war, and colonialism suggest the contours of the lives of people of color across the Atlantic world during this turbulent epoch.
