Becoming Taz: Writing from the Southpaw Stance by Jeff Bumpus is a memoir about pursuing a dream - of enduring the struggles, processing the failures, and learning how to assess the triumphs. Bumpus was a professional boxer from 1984 until 1993. During this time he continued working full-time as a saw operator, cutting countertops for mobile homes and RVs. He fought five world champions and several top contenders during his career in the ring before retiring with a record of 31 wins (15 by knockout), 8 defeats, and one draw. The Kashmiri Shawl Jun 07 2020 A nineteenth-century American missionary widow embarks on a daring quest to find her dark-skinned child. India, 1857: Anna Wheeler Roundtree, missionary wife, flees her husband's pious tyranny, leaving the safety of the Protestant Mission in which she's spent most of the past decade. Her timing is bad: the train carrying her to freedom steams into the midst of the brutal Indian Rebellion. She is, however, plucked from danger

by Ashok Montgomery, a wealthy Anglo-Indian tea planter. Together they escape the angry mobs and find the shelter of an isolated mountain cave. There, for the first time, Anna learns the true nature of love. New York City, 1860: Now a successful poet featured in national magazines, Anna Wheeler is astonished to learn that the daughter she bore upon her return was not stillborn, as she was told, but has been kidnapped. When Anna hears the baby described as "dark-skinned," she realizes that Ashok, the man she'd left behind in the tumult of the rebellion, is the true father, not her blond, fair-skinned husband. In her own racially

Then a deranged voice arises from her tormented past, making demands that compel her back to India. Anna must confront the evil that set her running in the first place. Will her daring quest for her child, and for the love of her life, end in triumph or in heartbreak?

Alien Offensive - Book 2

Jun 27 2019 Humankind's first contact with an intelligent extraterrestrial species was not friendly. Because their star, a dying red dwarf, would soon fail to provide life-supporting warmth, a distant alien species

recognized Earth, a planet similar to their world, perfect for their needs. In preparation for the move to Earth, the highly intelligent entities implemented a cleverly devised nanobot attack in an attempt to eradicate all life on Earth. They planned to follow the attack by sending a detachment to terraform the planet and assure all life on Earth was eliminated by the time they arrived. At least that was their plan. Fortunately, they didn't recognize the resolve of the human species to survive. While enlisting the extraordinary talents of a gifted physicist, the first attack was thwarted, but the aliens were not deterred. They had no

choice. It was move or perish. With the immediate threat eliminated, Earth's scientist searched for the origin of the sinister nanobots and learned they came from a planet called Gliese 581-d that was more than twenty light-years away. They began to study the giant, water-covered planet and its weak, red dwarf star. A ten year study via the Hubble Space Telescope showed little change, and then one day, scientist were shocked to see a mammoth flotilla of alien spaceships assemble near the distant planet and set out on a course that would bring them to Earth. But, because Gliese 581-d was so far away, the scientist weren't too

concerned. Even if the alien ships could travel at light-speed, it was decided it would be over two decades before they arrived. Because Einstein predicted nothing other than a photon can travel at light-speed, a theory later proven with the discovery of the Higgs Field, the flotilla wasn't expected to arrive in this century unless they could construct a stable wormhole, something no one believed they could. However, as a precaution, the world leaders decided to keep a close eye on the mammoth flotilla, code named Target One, and begin working on countermeasures should Target One arrive. They assumed they will have

developed more advanced technology, and would be able to repel any future attacks. Should Target One show up in Earth's space earlier than expected, it would be a battle between the might of the greater numbered humans and their determination, against the superior technology of the lesser numbered aliens, and the outcome could not be determined. That was ten years ago, and in episode two, the surveillance continues . . .
