10 quizzes will be given randomly during the lectures [internet meme subset sum problem wikipedia](#) Aug 03 2020 web the subset sum problem ssp is a decision problem in computer science in its most general formulation there is a multiset of integers and a target sum and the question is to decide whether any subset of the integers sum to precisely the problem is known to be np moreover some restricted variants of it are np complete too for example the [a causal test of the strength of weak ties science](#) May 12 2021 web 15 09 2022 d kempe j kleinberg É tardos maximizing the spread of influence through a social network in proceedings of the ninth acm sigkdd international conference on knowledge discovery and data mining 2003 pp 137 146 stanford large network dataset collection Aug 27 2022 web stanford large network dataset collection social networks online social networks edges represent interactions between people networks with ground truth communities ground truth network communities in social and information networks communication networks email communication networks with edges representing communication citation bellman ford algorithm wikipedia May 24 2022 web the bellman ford algorithm is an algorithm that computes shortest paths from a single source vertex to all of the other vertices in a weighted digraph it is slower than dijkstra s algorithm for the same problem but more versatile as it is capable of handling graphs in which some of the edge weights are negative numbers the algorithm was first proposed ford fulkerson algorithm wikipedia Oct 17 2021 web the ford fulkerson method or ford fulkerson algorithm ffa is a greedy algorithm that computes the maximum flow in a flow network it is sometimes called a method instead of an algorithm as the approach to finding augmenting paths in a residual graph is not fully specified or it is specified in several implementations with different running times [10 best books for data structure and algorithms for beginners](#) Jul 14 2021 web 13 03 2020 6 algorithm design by kleinberg tardos this is actually the second best book in algorithms after thomas cormen s introduction to algorithms it s not really an introduction to algorithms [usaco](#) Jan 08 2021 web you can find many good general purpose algorithms books out there some of the more popular ones include introduction to algorithms by cormen leiserson rivest and stein algorithm design by kleinberg and tardos the algorithm design manual by skiena and algorithms by sedgewick and wayne closest pair of points problem wikipedia Nov 18 2021 web the closest pair of points problem or closest pair problem is a problem of computational geometry given points in metric space find a pair of points with the smallest distance between them the closest pair problem for points in the euclidean plane was among the first geometric problems that were treated at the origins of the systematic study of the bipartite graph wikipedia Mar 30 2020 web in the mathematical field of graph theory a bipartite graph or bigraph is a graph whose vertices can be divided into two disjoint and independent sets and that is every edge connects a vertex in to one in vertex sets and are usually called the parts of the graph equivalently a bipartite graph is a graph that does not contain any odd length cycles [mème internet wikipédia](#) Feb 09 2021 web un mème internet I 2 est un élément ou un phénomène repris et décliné en masse sur internet il

prend souvent la forme d'une photo légendée ou d'un gif animé le terme est une francisation de l'anglais internet meme il se prononce m e m en français et m i : m en anglais 3 d après l'oxford english dictionary un meme au sens général est un

stable marriage problem wikipedia Mar 10 2021 web in mathematics economics and computer science the stable marriage problem also stable matching problem or smp is the problem of finding a stable matching between two equally sized sets of elements given an ordering of preferences for each element a matching is a bijection from the elements of one set to the elements of the other set a matching is

mooc Sep 16 2021 web Éva tardos acm depth first search wikipedia Oct 05 2020 web depth first search dfs is an algorithm for traversing or searching tree or graph data structures the algorithm starts at the root node selecting some arbitrary node as the root node in the case of a graph and explores as far as possible along each branch before backtracking extra memory usually a stack is needed to keep track of the nodes
