Technopoly Apr 17 2021 In this witty, often terrifying work of cultural criticism, the author of *Amusing Ourselves to Death* chronicles our transformation into a Technopoly: a society that no longer merely uses technology as a support system but instead is shaped by it—with radical consequences for the meanings of politics, art, education, intelligence, and truth.

My Secret Brexit Diary Jan 03 2020 In June 2016, the people of the United Kingdom voted to leave the European Union. As the EU's chief negotiator, for four years Michel Barnier had a seat at the table as the two sides thrashed out what 'Brexit' would really mean. The result would change Britain and Europe forever. During the 1600 days of complex and often acrimonious negotiations, Michel Barnier kept a secret diary. He recorded his private hopes and fears, and gave a blow-by-blow account as the negotiations oscillated between consensus and disagreement, transparency and lies. From Brussels to London, from Dublin to Nicosia, Michel Barnier's secret diary lifts the lid on what really happened behind the scenes of one of the most high-stakes negotiations in modern history. The result is a unique testimony from the ultimate insider on the hidden world of Brexit and those who made it happen.

Good Trouble Feb 02 2020 Back at dinner, somebody said that the goose thinks it's a dog.

No, it doesn't. It doesn't think it's a dog. The goose doesn't think. The goose just is. And what the goose is is goose. But goose is not goose, Robert thinks. Even the goose isn't goose.

Why I Am Not Going to Buy a Computer Dec 02 2019 A brief meditation on the role of technology in his own life and how it has changed the landscape of the United States from "America's greatest philosopher on sustainable life and living" (Chicago Tribune). "A number of people, by now, have told me that I could greatly improve things by buying a computer. My answer is that I am not going to do it. I have several reasons, and they are good ones." Wendell Berry first challenged the idea that our advanced technological age is a good thing when he penned "Why I Am Not Going to Buy a Computer" in the late 1980s for Harper's Magazine, galvanizing a critical reaction eclipsing any the magazine had seen before. He followed by responding with "Feminism, the Body, and the Machine." Both essays are collected in one short volume for the first time.

Responsive Teaching Mar 17 2021 This essential guide helps teachers refine their approach to fundamental challenges in the classroom. Based on research from cognitive science and formative assessment, it ensures teachers can offer all students the support and challenge they need - and can do so sustainably. Written by an experienced teacher and teacher educator, the

book balances evidence-informed principles and practical suggestions. It contains: A detailed exploration of six core problems that all teachers face in planning lessons, assessing learning and responding to students Effective practical strategies to address each of these problems across a range of subjects Useful examples of each strategy in practice and accounts from teachers already using these approaches Checklists to apply each principle successfully and advice tailored to teachers with specific responsibilities. This innovative book is a valuable resource for new and experienced teachers alike who wish to become more responsive teachers. It offers the evidence, practical strategies and supportive advice needed to make sustainable, worthwhile changes.

The Soft Revolution Feb 25 2022

To Teach Mar 05 2020 "This graphic novel brings to life William Ayers's bestselling memoir *To teach : the journey of a teacher*, third edition. From Ayers's early days teaching kindergarten, readers follow this renowned educational theorist on his 'voyage of discovery and surprise.'"--Cover, p. [4].

Legal Education as a Subversive Activity Jul 21 2021 In an age when everyone aspires to teach critical thinking skills in the classroom, what does it mean to be a subversive law teacher? Who or what might a subversive law teacher seek to subvert - the authority of the law, the university, their own authority as teachers, perhaps? Are law students ripe for subversion, agents of, or impediments to, subversion? Do they learn to ask critical questions? Responding to the provocation in the classic book *Teaching as a Subversive Activity*, by Postman and Weingartner, the idea that teaching could, or even should, be subversive still holds true today, and its premise is particularly relevant in the context of legal education. We therefore draw on this classic book to discuss, in the present volume, the consideration of research into legal education as lifetime learning, as creating meaning, as transformative and as developing world-changing thinking within the legal context. The volume offers research into classroom experiences and theoretical and historical interrogations of what it means to teach law subversively. Primarily aimed at legal

educators and doctoral students in law planning careers as academics, its insights speak directly to tensions in higher education more broadly.

Education and Ecstasy Dec 26 2021

"Education and Ecstasy" was originally written as a call for reform in America's school systems. Published in the 60s, and then revised in the 80s, this book reveals the deep-rooted structural problems in American schools--problems which still plague the system. (Education/Teaching) Curriculum Windows Jul 29 2019 Curriculum Windows: What Curriculum Theorists of the 1960s Can Teach Us about Schools and Society Today is an effort by students of curriculum studies, along with their professor, to interpret and understand curriculum texts and theorists of the 1960s in contemporary terms. The authors explore how key books/authors from the curriculum field of the 1960s illuminate new possibilities forward for us as scholars/educators today: How might the theories, practices, and ideas wrapped up in curriculum texts of the 1960s still resonate with us, allow us to see backward in time and forward in time - all at the same time? How might these figurative windows of insight, thought, ideas, fantasy, and fancy make us think differently about curriculum, teaching, learning, students, education, leadership, and schools? Further, how might they help us see more clearly, even perhaps put us on a path to correct the mistakes and missteps of intervening decades and of today? The chapter authors and editor revisit and interpret several of the most important works of the 1960s by Louise Berman, Jerome Bruner, WEB DuBois, Elliot Eisner, John Goodlad, James Herndon, John Holt, Philip Jackson, Herb Kohl, Robert Mager, A.S. Neill, Philip Phenix, Neil Postman, Joseph Schwab, Hilda Taba, and Sidney Walton. The book's Foreword is by renowned curriculum theorist William H. Schubert.

Teaching as a Subversive Activity Oct 04 2022

Compassionate Music Teaching Aug 10 2020 *Compassionate Music Teaching* provides a framework for music teaching in the 21st century by outlining qualities, skills, and approaches to meet the needs of a unique and increasingly diverse generation of students. The text focuses on how six qualities of compassion

(trust, empathy, patience, inclusion, community, and authentic connection) have made an impact in human lives, and how these qualities might relate to the practices of caring and committed music teachers. This book bridges the worlds of research and practice, discussing cutting-edge topics while also offering practical strategies that can be used immediately in music studios and classrooms. Each chapter is addressed from multiple perspectives, including: research in music, education, psychology, sociology, and related fields; insights from various students and teachers across the United States; and an in-depth study of five music teachers who represent a broad range of genres, student ages, and pedagogical approaches. The book is dedicated to exploring those conditions that help students not only to learn, but also to grow, thrive, and freely express—and become compassionate musicians, teachers, performers, and people as well.

The Last Man Alive Jan 15 2021 The adventures of a group who survived a poisonous cloud that turned everyone else into stone.

The End of Education Sep 30 2019 In this comprehensive response to the education crisis, the author of *Teaching as a Subversive Activity* returns to the subject that established his reputation as one of our most insightful social critics. Postman presents useful models with which schools can restore a sense of purpose, tolerance, and a respect for learning.

Seasteading Aug 29 2019 Two-thirds of our globe is Planet Ocean, not Planet Earth. Imagine a vast new source of sustainable and renewable energy that would also bring more equitable economies. A previously untapped source of farming that could produce significant new sources of nutrition. Future societies where people could choose the communities they want to live in, free from the restrictions of conventional citizenship. This bold vision of our near future as imagined in *Seasteading* attracted the powerful support of Silicon Valley's Peter Thiel—and it may be drawing close to reality. Our planet is suffering from serious environmental problems: coastal flooding due to severe storms caused in part by atmospheric pollution and diminishing natural resources among them. But the seas can be home to a new breed of pioneers, seasteaders, who are willing

to homestead the Blue Frontier. Oil platforms and cruise ships already inhabit the waters; now it's time to take the next step to full-fledged ocean civilizations. Joe Quirk and Patri Friedman show us how cities built on floating platforms in the ocean will work, and they profile some of the visionaries who are implementing basic concepts of seasteading today. An entrepreneur's dream, these floating cities will become laboratories for innovation and creativity. Seasteading may be visionary, but it already has begun proving the adage that yesterday's science fiction is tomorrow's science fact. Welcome to seavilization.

Television and the Teaching of English Jun 07 2020

Wrecks Oct 12 2020 Can someone honestly love a person whom they have deceived for thirty years? This is the central question behind *Wrecks*, Neil LaBute's latest foray into the dark side of human nature. Meet Edward Carr: loving father, successful businessman, grieving widower. In this concise powerhouse of a play, LaBute limns the boundaries of love, exploring the limits of what society will accept versus what the heart will desire. This collection also features rarely staged short plays, including "Liars' Club," "Coax," and the never-before-seen "Falling in Like."

Writing, Redefined Nov 12 2020 "Writing, Redefined asks educators to reflect critically on the kinds of writing - and the kinds of writers - traditionally valued in school spaces and offers a compelling argument for broadening our ideas around composition in order to honor the stories, the voices, and the lived experiences of all students"--

Teaching Shakespeare May 07 2020 An improved, larger-format edition of the Cambridge School Shakespeare plays, extensively rewritten, expanded and produced in an attractive new design.

The Wounded Leader Apr 05 2020 "These are the questions at the heart of the stories in *The Wounded Leader*. In these stories leaders struggle to make sense of their wounding experiences. We meet a principal who felt undermined by a contentious staff, another whose early mistakes ignited rumors and discontent, a leader who felt shunned when she took a position at a failing school, and a

superintendent at odds with the school board."-- Jacket.

The End of Education May 31 2022 In this comprehensive response to the education crisis, the author of *Teaching as a Subversive Activity* returns to the subject that established his reputation as one of our most insightful social critics. Postman presents useful models with which schools can restore a sense of purpose, tolerance, and a respect for learning.

Amusing Ourselves to Death Jul 01 2022

Examines the effects of television culture on how we conduct our public affairs and how "entertainment values" corrupt the way we think.

Conscientious Objections Oct 24 2021 In a series of feisty and ultimately hopeful essays, one of America's sharpest social critics casts a shrewd eye over contemporary culture to reveal the worst -- and the best -- of our habits of discourse, tendencies in education, and obsessions with technological novelty. Readers will find themselves rethinking many of their bedrock assumptions: Should education transmit culture or defend us against it? Is technological innovation progress or a peculiarly American addiction? When everyone watches the same television programs -- and television producers don't discriminate between the audiences for *Sesame Street* and *Dynasty* -- is childhood anything more than a sentimental concept? Writing in the traditions of Orwell and H.L. Mencken, Neil Postman sends shock waves of wit and critical intelligence through the cultural wasteland.

Teaching as a Subversive Activity Nov 05 2022

Something Incredibly Wonderful Happens Nov 24 2021 How do we reclaim our innate enchantment with the world? And how can we turn our natural curiosity into a deep, abiding love for knowledge? Frank Oppenheimer, the younger brother of the physicist J. Robert Oppenheimer, was captivated by these questions, and used his own intellectual inquisitiveness to found the Exploratorium, a powerfully influential museum of human awareness in San Francisco, that encourages play, creativity, and discovery—all in the name of understanding. In this elegant biography, K. C. Cole investigates the man behind the museum

with sharp insight and deep sympathy. The Oppenheimers were a family with great wealth and education, and Frank, like his older brother, pursued a career in physics. But while Robert was unceasingly ambitious, and eventually came to be known for his work on the atomic bomb, Frank's path as a scientist was much less conventional. His brief fling with the Communist Party cost him his position at the University of Minnesota, and he subsequently spent a decade ranching in Colorado before returning to teaching. Once back in the lab, however, Frank found himself moved to create something to make the world meaningful after the bombing of Hiroshima and Nagasaki. He was inspired by European science museums, and he developed a dream of teaching Americans about science through participatory museums. Thus was born the magical world of the Exploratorium, forever revolutionizing not only the way we experience museums, but also science education for years to come. Cole has brought this charismatic and dynamic figure to life with vibrant prose and rich insight into Oppenheimer as both a scientist and an individual.

Happiness and Education May 19 2021 Table of contents

Why are There Differences in the Gospels?

Sep 10 2020 Why are there differences in the stories of the gospels? Licona turns to Greek classicist Plutarch for an answer, assessing differences that appeared when Plutarch told the same story more than once in his lives. He suggests the differences in the gospels often resulted from their authors employing the same compositional devices used by Plutarch.

Acts of Resistance Mar 29 2022 In 1969, Neil Postman and Charles Weingartner published *Teaching as a Subversive Activity*. Subversive teaching today, however, looks very different than it did in 1969. Teachers today must deliver their instruction in an era of formidable challenges related to curriculum, educational policy, and cultural and political ideology. Students learn in an environment that includes active shooter drills and increasingly violent public policy that assaults immigrants, people of Color, women, and the LGBTQIA+ community. A robust public education is needed now more than ever, though the resources to provide it dwindle daily. *Acts of Resistance: Subversive*

Teaching in the English Language Arts (ELA) Classroom showcases examples of subversive pedagogy to instruct and inspire teachers and to contextualize subversive ELA pedagogy in the contemporary educational moment. Chapter authors--in-service teachers and teacher educators alike--draw from case studies, narrative inquiry, and other qualitative methodologies to explain how they have variously taken up subversive pedagogy in the ELA classroom. Because teachers and other stakeholders resist oppressive structures—including disciplinary confinements—when they teach from subversive viewpoints, each chapter describes a disciplinary “act of resistance” that illuminates possibilities for countering uncritical, “traditional” handling of ELA experiences. Perfect for courses such as: ELA Methods | Literacy Methods | Social Justice | Critical Literacy | Writing | Literature | Disciplinary Literacy | Curriculum Theory | Pedagogy | ELA Professional Development (Inservice Teachers)

The Disappearance of Childhood Aug 22 2021

From the vogue for nubile models to the explosion in the juvenile crime rate, this modern classic of social history and media traces the precipitous decline of childhood in America today—and the corresponding threat to the notion of adulthood. Deftly marshaling a vast array of historical and demographic research, Neil Postman, author of *Technopoly*, suggests that childhood is a relatively recent invention, which came into being as the new medium of print imposed divisions between children and adults. But now these divisions are eroding under the barrage of television, which turns the adult secrets of sex and violence into popular entertainment and pitches both news and advertising at the intellectual level of ten-year-olds. Informative, alarming, and aphoristic, *The Disappearance of Childhood* is a triumph of history and prophecy.

A School of Our Own Jun 27 2019 The remarkable true story of the high school junior who started his own school—and earned acclaim nationwide—“will make you laugh, cry and cheer” (John Merrow, author of *The Influence of Teachers*). Samuel Levin, a teenager who had already achieved international fame for creating Project Sprout—the first farm-to-school lunch

program in the United States—was frustrated with his own education, and saw disaffection among his peers. In response, he lobbied for and created a new school based on a few simple ideas about what kids need from their high school experience. The school succeeded beyond anyone’s wildest expectations and went on to be featured on NPR and in *Newsweek* and the *Washington Post*. Since its beginnings in 2010, the Independent Project serves as a national model for inspiring student engagement. In creating his school, Samuel collaborated with Susan Engel, the noted developmental psychologist, educator, and author—and Samuel’s mother. *A School of Our Own* is their account of their life-changing year in education, a book that combines poignant stories, educational theory, and practical how-to advice for building new, more engaging educational environments for our children.

The Subversive Copy Editor Jun 19 2021 Each year writers and editors submit over three thousand grammar and style questions to the Q&A page at *The Chicago Manual of Style Online*. Some are arcane, some simply hilarious—and one editor, Carol Fisher Saller, reads every single one of them. All too often she notes a classic author-editor standoff, wherein both parties refuse to compromise on the “rights” and “wrongs” of prose styling: “This author is giving me a fit.” “I wish that I could just DEMAND the use of the serial comma at all times.” “My author wants his preface to come at the end of the book. This just seems ridiculous to me. I mean, it’s not a post-face.” In *The Subversive Copy Editor*, Saller casts aside this adversarial view and suggests new strategies for keeping the peace. Emphasizing habits of carefulness, transparency, and flexibility, she shows copy editors how to build an environment of trust and cooperation. One chapter takes on the difficult author; another speaks to writers themselves. Throughout, the focus is on serving the reader, even if it means breaking “rules” along the way. Saller’s own foibles and misadventures provide ample material: “I mess up all the time,” she confesses. “It’s how I know things.” Writers, Saller acknowledges, are only half the challenge, as copy editors can also make trouble for themselves. (Does any other book have an index entry that says “terrorists. See

copy editors"?) The book includes helpful sections on e-mail etiquette, work-flow management, prioritizing, and organizing computer files. One chapter even addresses the special concerns of freelance editors. Saller's emphasis on negotiation and flexibility will surprise many copy editors who have absorbed, along with the dos and don'ts of their stylebooks, an attitude that their way is the right way. In encouraging copy editors to banish their ignorance and disorganization, insecurities and compulsions, the Chicago Q&A presents itself as a kind of alter ego to the comparatively staid Manual of Style. In *The Subversive Copy Editor*, Saller continues her mission with audacity and good humor.

Crazy Talk, Stupid Talk Jan 27 2022 A guide to recognizing and correcting or eradicating confused, inappropriate, and inarticulate speech and unreasonable or maliciously intended speech

Timeless Learning Dec 14 2020 Reinvent public schools with proven, innovative practices Our homes, communities, and the world itself need the natural assets our children bring with them as learners, and which they often lose over time on the assembly line that pervades most of the public education system today. We see no actions as more important in school than developing, supporting, and reinforcing children's sense of agency, the value of their voices, and their potential to influence their own communities. In *Timeless Learning*, an award-winning team of leaders, Chief Technology Officer Ira Socol, Superintendent Pam Moran, and Lab Schools Principal Chad Ratliff demonstrate how you can implement innovative practices that have shown remarkable success. The authors use progressive design principles to inform pathways to disrupt traditions of education today and show you how to make innovations real that will have a timeless and meaningful impact on students, keeping alive the natural curiosity and passion for learning with which children enter school. Discover the power of project-based and student-designed learning Find out what "maker learning" entails Launch connected and interactive digital learning Benefit from the authors' "opening up learning" space and time Using examples from their own successful district as well as others

around the country, the authors create a deep map of the processes necessary to move from schools in which content-driven, adult-determined teaching has been the traditional norm to new learning spaces and communities in which context-driven, child-determined learning is the progressive norm.

Teaching as a Conserving Activity Aug 02 2022 A co-author of the influential *Teaching as a Subversive Activity*, Postman reassesses and reworks some of his "revolutionary" theories of ten years ago in a continuing effort to take the fear out of the classroom situation

—————•————— Jul 09 2020
—————

How to Watch TV News Feb 13 2021 A scathing and prescient look at television news—now updated for the new tech-savvy generation Television news : genuine information or entertainment fodder? Fifteen years ago, Neil Postman, a pioneer in media education and author of the bestselling *Amusing Ourselves to Death*, and Steve Powers, an award-winning broadcast journalist, concluded that anyone who relies exclusively on their television for accurate world news is making a big mistake. A cash cow laden with money from advertisers, so-called news shows glut viewers with celebrity coverage at the cost of things they really should know. Today, this message is still appallingly true but the problems have multiplied—along with the power of the Internet and the abundance of cable channels. A must-read for anyone concerned with the way media is manipulating our worldview, this newly revised edition addresses the evolving technology and devolving quality of America's television news programming.

The Whole Movement of Life is Learning Sep 22 2021

Teaching As a Subversive Activity Oct 31 2019 A no-holds-barred assault on outdated teaching methods—with dramatic and practical proposals on how education can be made relevant to today's world. Praise for *Teaching As a Subversive Activity* "A healthy dose of Postman and Weingartner is a good thing: if they make even a dent in the pious . . . American classroom, the book will be worthwhile."—New York Times Book Review "Teaching and knowledge are

subversive in that they necessarily substitute awareness for guesswork, and knowledge for experience. Experience is no use in the world of Apollo 8. It is simply necessary to know. However, it is also necessary to know the effect of Apollo 8 in creating a new Global Theatre in which student and teacher alike are looking for roles. Postman and Weingartner make excellent theatrical producers in the new Global Theatre.”—Marshall McLuhan “It will take courage to read this book . . . but those who are asking honest questions—what’s wrong with the worlds in which we live, how do we build communication bridges cross the Generation Gap, what do they want from us?—these people will squirm in the discovery that the answers are really within themselves.”—Saturday Review “Neil Postman and Charles Weingartner go beyond the now-familiar indictments of American education to propose basic ways of liberating both teachers and students from becoming personnel rather than people . . . the authors have created what may become a primer of ‘the new education’ Their book is intended for anyone, teacher or not, who is concerned with sanity and survival in a world of precipitously rapid change, and it’s worth your reading.”—Playboy “This challenging, liberating book can unlock not only teachers but anyone for whom language and learning are not dead.”—Nat Hentoff

Teaching As a Subversive Activity Sep 03 2022

Building a Bridge to the 18th Century Apr 29 2022 At a time when we are reexamining our values, reeling from the pace of change, witnessing the clash between good instincts and "pragmatism," dealing with the angst of a new millennium, Neil Postman, one of our most distinguished observers of contemporary society, provides for us a source of guidance and inspiration. In *Building a Bridge to the Eighteenth Century* he revisits the Enlightenment, that great flowering of ideas that provided a humane direction for the future -- ideas that formed our nation and that we would do well to embrace anew. He turns our attention to Goethe, Voltaire, Rousseau, Diderot, Kant, Edward Gibbon, Adam Smith, Thomas Paine, Jefferson, and Franklin, and to their then-radical thinking about inductive science, religious and political freedom, popular education, rational commerce, the nation-state, progress, and happiness. Postman calls for a future connected to traditions that provide sane authority and meaningful purpose -- as opposed to an overreliance on technology and an increasing disregard for the lessons of history. And he argues passionately for specific new guidelines in the education of our children, with renewed emphasis on developing the intellect as successfully as we are developing a computer-driven world. Witty, provocative, and brilliantly reasoned, *Building a Bridge to the Eighteenth Century* is Neil Postman's most radical, and most commonsensical, book yet.
