Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious settlers in a foreign land. The Company will pay the cost of the lady's dowry and travel. Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana's future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male

settlers they know nothing about. With fear in their hearts, the girls begin their journey - but what awaits them on the other side of the world is nothing like what they've been promised... *Insect conservation and Australia's Inland Waters* Dec 03 2019 The first broad overview of conservation needs of Australia's largely endemic freshwater insects, drawing on examples and information from many parts of the world to illustrate and develop needs and practical prospects for conservation in inland water environments. The wide variety of those environments in Australia and their diverse insect inhabitants - many of them highly localised and ecologically specialised and vulnerable - and threats to them is illustrated. Case histories demonstrate the different aspects of practical conservation management that may be possible in different contexts, and numerous references facilitate understanding by non-specialist readers and non-entomologist conservation managers and practitioners.

**The Abandoned Child Within** Jun 01 2022 Lack of self-worth is an affliction that has become of increasing concern in all industrialized societies. It is the main symptom of what psychiatry calls narcissistic disturbance, a phenomenon far more widespread than it was when Freud and Jung developed their concepts of depth psychology. The lack of commonly held values has contributed to it, but is not its cause. In this in-depth examination, Kathrin Asper, a noted psychotherapist and president of the Swiss Society for Analytical Psychology, addresses the real cause: lack of self-worth as a direct consequence of physical or emotional abandonment during childhood. The wounded inner child lives on in the adult, expressing himself in such symptoms as fear of abandonment, lack of feeling, grandiosity and depression, insufficient awareness of one's own life, disproportionate rage, and unclear needs. However, those suffering from a lack of self-worth tend to forget the early-life incidents that hurt their inner self: the child within suffers, but is mute. To heal the early wounds, we have to get in touch with the inner child and make her talk. In *The Abandoned Child Within*, Dr. Asper shows how this is accomplished. Using concrete case histories from her own practice, paintings by patients, dreams, fairy tales, and myths, she vividly describes the consequences of abandonment, and ways to unleash the creative powers of the unconscious, which can initiate a healing transformation.

[The Complete Guide to Business Risk Management](#) Feb 26 2022 Risk management and contingency planning has really come to the fore since the first edition of this book was originally published. Computer failure, fire, fraud, robbery, accident, environmental damage, new regulations - business is constantly under threat. But how do you determine which are the most important dangers for your business? What can you do to lessen the chances of their happening - and minimize the impact if they do happen? In this comprehensive volume Kit Sadgrove shows how you can identify - and control - the relevant threats and ensure that your company will survive. He begins by asking 'What is risk?', 'How do we assess it?' and 'How can it be managed?' He goes on to examine in detail the key danger areas including finance, product quality, health and safety, security and the environment. With case studies, self-assessment exercises and checklists, each chapter looks systematically at what is involved and enables you to draw up action plans that could, for example, provide a defence in law or reduce your insurance premium. The new edition reflects the changes in the global environment, the new risks that have emerged and the effect of macroeconomic factors on business profitability and success. The author has also included a set of case studies to illustrate his ideas in practice.
