[User's Manual for an Army National Guard \(ARNG\) Armor and Mechanized Infantry Gunnery Training Assessment Database](#) Jun 06 2020 "This user's manual describes a longitudinal database designed to permit the storage, retrieval, and analyses of gunnery-related data generated with Army National Guard (ARNG) armored and mechanized infantry units. The database was developed as part of an assessment of the Simulation in Training for Advanced Readiness (SIMITAR) time-compressed gunnery training strategy, as implemented in a test ARNG armored brigade (Smith, in publication). It contains gunnery performance measures from this test brigade and from six other enhanced "comparison" brigades where the SIMITAR training strategy was not introduced. These measures were collected from 1993-1997 and include first-run and final, live-fire, Table VIII gunnery qualification scores, tank main gun ammunition expenditures, related measures/information needed for assessing the impact of different training strategy interventions, and space set aside for recording the outcomes of training aids, devices, simulators and simulations (TADSS) usage. The databases is configured within a software program known as the Statistical Package for the Social Sciences (SPSS, Version 6.1 for Windows). Its files can be exported in a number of formats, including spreadsheet and database management programs, as well as into a number of other statistical utilities. This user's manual will help ARNG database managers use the SIMITAR database as a convenient repository for gunnery performance and related information and as a resource for future gunner-related strategy impact investigations."--P.i.

Apple 2020 MacBook Air User Guide Mar 04 2020 The Complete Beginner to Expert Guide to Maximizing your 2020 MacBook Air. Are you looking for a comprehensive user manual that will help you SETUP and MASTER your MacBook Air? Are you looking for a manual that will expose you to all the amazing features of your device and 2020 MacOS Catalina 10.15? Then get your hands on this book and have an amazing time using your device. Apple updated the MacBook Air in a major way in mid-March 2020. While it may look like the previous version on the surface, dig a little deeper and you'll see it's the most significant upgrade since the 2018 redesign, offering buyers much more interesting customization options. The third iteration of the 'new' MacBook Air design finally nails every area well enough to make this the best MacBook for most people. The keyboard is the star of the show here. Yep, that's right. Apple ditched the disastrous butterfly keyboard for its Magic Keyboard and all I can say is: thank goodness. Even with all these new features, Apple still managed to keep the starting price at a relatively affordable \$999. The MacBook Air (2020) comes with all the right improvements without sacrificing the best features of the previous version. Apple didn't reinvent the MacBook Air on the outside. But the 2020 model does have some exciting improvements under the hood. There's a 10th-generation processor, and double the base storage. There is a lot to love in Apple's latest MacBook Air. This book is written in simple and clear terms, with a step-by-step approach that will help you to master your MacBook Air with 2020 MacOS Catalina 10.15 within the shortest period of time. Here is a preview of the topics in this guide: -Take a tour of your new MacBook Air-How to Get Started-Use MacBook Air with other Devices-Apps included with your Mac-What's in the menu bar on Mac?-How to search with Spotlight on Mac-Customize the Dock-See and organize your files in the Finder on Mac-Use Launchpad to view and open apps on Mac-How to manage windows -Use apps in Split View -Install and uninstall apps from the internet or disc on Mac-Customize your Mac with System Preferences-Use your internet accounts-Use accessibility features on Mac-Set up users, guests, and groups-Create and work with documents-Dictate your messages and documents -Set a different keyboard dictation shortcut-Back up your files with Time Machine -Create an Apple ID on Mac-Sign in to a new device or browser with two-factor authentication-Use iCloud Drive to store documents on your Mac-Set up Family Sharing on Mac-View and download purchases made by other family members-Use Continuity to work across Apple devices-Use your iPad as a second display for your Mac-Unlock your Mac and approve requests with Apple Watch-Listen to podcasts on Mac-Read books in Books on Mac-Customize your Game Center account-Manage passwords using keychains on Mac-And so much more! Time Nov 04 2022 Why are there morning people and night people? How come time flies when you're having fun and three minutes can sometimes seem an eternity? Would time exist if we didn't measure it and why is there never enough of it? Our modern lives are ruled by minutes and hours. We race from one thing to the next, all of us believing on some level that a mysterious cosmic force called time is ticking on. And it's always in short supply. But is the time we live really like that? Could there in fact be another, alternative version, entwined with the official one? Here Stefan Klein explores the hidden dimensions of time, looking at everything from when the present becomes the past to the tribe that see the future backwards, from when sex is best to why the years seem to speed by as we age. And he reveals how we can learn to live in harmony with the secret clock within us, altering our perceptions to transform our lives. To be enjoyed in the morning or the evening (depending on your body clock), this book will make you think the next time you check your watch and maybe even slow down a little.
