The Integration and Protection of Immigrants Jul 29 2019 In Scandinavian countries immigration is a sensitive issue and legislators' approach to the questions it has raised has varied over the years. Whatever immigrant and integration policies are adopted in a democratic society, it is clear that the legislation and the authorities have to ensure that the individual rights of the immigrants residing in its territory are respected. With Canada as a point of reference, this book draws attention to weaknesses in the regulation and implementation of integration provisions threatening the immigrants' individual rights in the EU member states of Denmark, Finland and Sweden. The study challenges readers to critically review the meaning of rights and the notion of global caring. It takes a critical look at how vulnerable immigrants fare in a largely immigrant nation with a welfare capitalism legacy, when compared to three European nations which claim to embrace institutional welfare models. This book will be of great interest to scholars and decision-makers interested in Scandinavian or Canadian immigration and integration policies.

Pressing Forward Oct 31 2019 Pressing Forward: Increasing and Expanding Rigor and Relevance in America's High Schools is organized to place secondary education, specifically the goals of preparing young adults to be college and career ready, in contemporary perspective, emphasizing the changing global economy and trends in policy and practice. High school students must be equipped with tools they need during and beyond high school for mapping their futures in a global and flat world that demands workers prepared to take up 21st century careers. Following Thomas Freidman and other writers on the topic, this book takes as its core premise that the world has been irrevocably altered by technology and that technology takes a prominent role in shaping post-secondary education and career opportunities. The challenges facing education and educators in a flattened world can best be addressed by creating opportunities for students who are ready for a world in which they are expected to pursue learning throughout their lifetimes, understand and use technology, engage in active civic lives, function well in ethnically diverse workplace settings, and be willing to take risks. Most of all,

however, these individuals must be very well prepared during high school by taking advanced level mathematics, science and other challenging coursework, while at the same time actively engaging in collaborative, creative endeavors that prepare them to continuously reinvent themselves to stay ahead of automation and outsourcing. The book will be a unique and useful contribution to the education reform and policy literature as it examines secondary education at an historical moment—the convergence of significant education spending and focus on high school reform. Developed from diverse authors' research programs on secondary education, the chapters in this volume highlight both changing and steadfast features of high schools, questioning if attempts to foster change—whether tinkering around the edges or inventing a new way—adequately address shortcomings in equity and excellence found in American high schools.

IBPS Clerk 10 Year-wise Preliminary & Main Exams Solved Papers (2021 - 11) 3rd Edition Jul 21 2021 **Fairness in Access to Higher Education in a Global Perspective** Feb 02 2020 The purpose of this volume is to help jump-start an urgently needed conversation about fairness and justice in access to higher education to counteract the ubiquitous mantras of neoliberal globalization and managerialism. The book seeks to carve out a strong moral and normative basis for opposing mainstream developments that engender increasing inequality and market-dependency in higher education. The book's chapters consider how different national communities channel access to higher education, what their "implicit social contracts" are, and what outcomes are produced by different policies and methods. The book is essential reading for scholars of higher education and students concerned with increasing inequality in a globalizing educational marketplace.
