Unlikely Partners Feb 01 2020 With Deng Xiaoping's blessing, Mao's successors scoured the globe for fresh ideas to launch domestic prosperity and global economic power. Yet China's government did not publicize its engagement with Western-style innovations, claiming instead that economic reinvention was the Party's achievement alone. Julian Gewirtz sets forth the truer story.

The Magic of Bamboo Jun 06 2020 Is bamboo a food, a grass, or a wood? One little boy knows that it's all three! Told in both English and Chinese, The Magic of Bamboo is the story of a little boy whose house was surrounded by many bamboo forests and streams. He lived with bamboo all year round. In spring, he ate delicate and delicious bamboo shoots; in summer, he crafted pliant bamboo stalks into baskets and brooms that he used as tools for fishing; in fall, he used mature bamboo to build kites that flew high and far; in winter, pork cooked with bamboo shoots was the celebratory dish for his family's New Year's Eve dinner. Even the special gift he received from his grandfather on New Year's Eve was made of bamboo. Winsomely told and delightfully illustrated, The Magic of Bamboo is a tale that will enchant readers of all ages.

The Way of the Linguist Mar 16 2021 The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book The Way of The Linguist, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

The Chinese Particle Le Sep 09 2020 Ever since the start of Chinese linguistic studies, the description of the Chinese particle LE has remained elusive. The classification has evolved from a listing of sentences and the discussion of contrastive pairs to a more context and discourse-oriented analysis. The development in recent years of inferential models and situation semantics has opened the way for a renewed study of the use of the Chinese particle LE. This book discusses the Chinese data from a 'mental space' perspective and finally reveals the role so-called Chinese 'sentence LE' plays in the construction and maintenance of discourse.

China to Me Jul 20 2021 A candid, rollicking literary travelogue from a pioneering New Yorker writer, an intrepid heroine who documented China in the years before World War II. Deemed scandalous at the time of its publication in 1944, Emily Hahn's now classic memoir of her years in China remains remarkable for her insights into a tumultuous period and her frankness about her personal exploits. A proud feminist and fearless traveler, she set out for China in 1935 and stayed through the early years of the Second Sino-Japanese War, wandering, carousing, living, loving—and writing. Many of the pieces in *China to Me* were first published as the work of a roving reporter in the *New Yorker*. All are shot through with riveting and humanizing detail. During her travels from Nanjing to Shanghai, Chongqing, and Hong Kong, where she lived until the Japanese invasion in 1941, Hahn embarks upon an affair with lauded Chinese poet Shao Xunmei; gets a pet gibbon and names him Mr. Mills; establishes a close bond with the women who would become the subjects of her bestselling book *The Soong Sisters*; battles an acquired addiction to opium; and has a child with Charles Boxer, a married British intelligence officer. In this unflinching glimpse of a vanished world, Hahn examines not so much the thorny complications of political blocs and party conflict, but the ordinary—or extraordinary—people caught up in the swells of history. At heart, *China to Me* is a self-portrait of a fascinating woman ahead of her time.

Hacking Chinese May 18 2021 Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

The Chinese Language Jan 02 2020 "DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone." --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York "Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted." --William S.Y. Wang, professor of linguistics, University of California at Berkeley

Censored Dec 01 2019 A groundbreaking and surprising look at contemporary censorship in China As authoritarian governments around the world develop sophisticated technologies for controlling information, many observers have predicted that these controls would be easily evaded by savvy internet users. In *Censored*, Margaret Roberts demonstrates that even censorship that is easy to circumvent can still be enormously effective. Taking advantage of digital data harvested from the Chinese internet and leaks from China's Propaganda Department, Roberts sheds light on how censorship influences the Chinese public. Drawing parallels between censorship in China and the way information is manipulated in the United States and other democracies, she reveals how internet users are susceptible to control even in the most open societies. *Censored* gives an unprecedented view of how governments encroach on the media consumption of citizens.

Buy Me the Sky Jan 14 2021 "'Fast-paced and punchy ... accomplished' Independent With journalistic acumen and a novelist's flair, Xinran tells the remarkable stories of men and women born in China after 1979 - the recent generations raised under China's single-child policy. At a time when the country continues to transform at the speed of light, these generations of precious 'one and onlies' are burdened with expectation, yet have often been brought up without any sense of responsibility. Within their families, they are revered as 'little emperors' and 'suns', although such cosseting can come at a high price: isolation, confusion and an inability to deal with life's challenges. From the businessman's son unable to pack his own suitcase, to the PhD student who pulled herself out of extreme rural poverty, Xinran shows how these generations embody the hopes and fears of a great nation at a time of unprecedented change. It is a time of fragmentation, heart-breaking and inspiring in equal measure, in which capitalism vies with communism, the city with the countryside and Western opportunity with Eastern tradition. Through the fascinating stories of these only children, we catch a startling glimpse of the emerging face of China."

Meet Me in Venice Aug 09 2020 When Ye Pei dreamed of Venice as a girl, she imagined a magical floating city of canals and gondola rides. And she imagined her mother, successful in her new life and eager to embrace the daughter she had never forgotten. But when Ye Pei arrives in Italy, she learns her mother works on a farm far from the city. Her only connection, a mean-spirited Chinese auntie, puts Ye Pei to work in a small-town café. Rather than giving up and returning to China, a determined Ye Pei takes on a grueling schedule, resolving to save enough money to provide her family with a better future. A groundbreaking work of journalism, Meet Me in Venice provides a personal, intimate account of Chinese individuals in the very act of migration. Suzanne Ma spent years in China and Europe to understand why Chinese people choose to immigrate to nations where they endure hardship, suspicion, manual labor and separation from their loved ones. Today all eyes are on China and its explosive economic growth. With the rise of the Chinese middle class, Chinese communities around the world are growing in size and prosperity, a development many westerners find unsettling and even threatening. Following Ye Pei's undaunted path, this inspiring book is an engrossing read for those eager to understand contemporary China and the enormous impact of Chinese emigrants around the world.

How to Write for Class Oct 03 2022 How to Write for Class: A Student's Guide to Grammar, Punctuation, and Style is a comprehensive guide to the concepts students need to know to write effectively for school. Rather than treat grammar as a series of rules to be memorized, it emphasizes the logic behind the English language as well as the relationship between grammar and meaning. The approach taken in this book is also based on the observation that students often find it challenging to apply rules studied in isolation, or through overly-simplified examples, to the more complex statements they want to include in their own writing. How to Write for Class is designed to help bridge that gap: it makes use of numerous examples from actual papers and walks students through the process of constructing the type of sophisticated but grammatically coherent statements that will raise their academic writing to the next level. Appropriate for advanced middle-school through college writers.

Belt and Road Jun 26 2019 China's Belt and Road strategy is acknowledged to be the most ambitious geopolitical initiative of the age. Covering almost seventy countries by land and sea, it will affect every element of global society, from shipping to agriculture, digital economy to tourism, politics to culture. Most importantly, it symbolizes a new phase in China's ambitions as a superpower: to remake the world economy and crown Beijing as the new center of capitalism and globalization. Bruno Maçães traces this extraordinary initiative's history, highlighting its achievements to date, and its staggering complexity. He asks whether Belt and Road is about more than power projection and profit. Might it herald a new set of universal political values, to rival those of the West? Is it, in fact, the story of the century?
