Hundreds of my fellow Crohnies put their trust in me and allowed me to speak for them when they had no voice. I thank you for entrusting me with some of your hardest and challenging times. Some of you may be reading this book, on the toilet, during a flare; others may be reading it because you just found out your child was diagnosed, or some may be trying to get information to help family or friends diagnosed with the same condition. I blogged, weekly, about Crohn's and I was also writing this book at the same time. So, for the people who don't

enjoy reading long chapters, I thought, "Let's turn my blog into a book." Ladies and gentlemen, I present to you, "Crohn's Disease, the other C WORD." \*\*\*\*\* Whoever you are, stay strong, stay confident as fuck, and remember...you have a friend in Providence, Rhode Island. *The End of the Beginning* Apr 12 2021 For the first time since a 5th century Greek physician gave the name “cancer” (karkinos, in Greek) to a deadly disease first described in Egyptian Papyri, the medical world is near a breakthrough that could allow even the most conservative doctors and pragmatic patients to use the other “c word” – cure – in the same sentence as cancer. A remarkable series of events has brought us to this point, thanks in large part to a new ability to more efficiently harness the extraordinary power of the human immune system. The End of the Beginning is a remarkable history of cancer treatment and the evolution of our understanding of its dynamic interplay with the immune

system. Through Michael Kinch's personal experience as a cancer researcher and the head of the oncology program at a leading biotechnology company, we witness the incredible accumulation of breakthrough science and its rapid translation into life-saving technologies that have begun to dramatically increase the quality and quantity of life for cancer patients. In clear and accessible prose, Kinch details the remarkable history of people, science, technology and disease and presents thrilling next-generation technologies that hold the promise to eliminate cancer for some, and perhaps ultimately, for all.

**Cancer Is A C Word** Apr 24 2022 Teaching tough and scary topics to children, especially to the very young, is not easy. At the same time, the book also focuses on the positive aspects by demonstrating that there are other C words linked to Cancer that have an uplifting effect, such as Caring, Community, Cuddling, and Companionship. With beautifully illustrated full-colour pages that will appeal to children, Cancer is a C Word is an informative picture book for children that answers some tough questions, while conveying an overall comforting and positive message.

**On the High Wire** May 14 2021 The purpose of the work/life balance series is to highlight particular challenges that higher education faculty face as they participate in the demands of the academy and try to prevent those demands from invading their personal lives. On The High Wire looks at a specific subset of university faculty, education faculty with school-aged children, and the specific

professional/personal balance these faculty need to find. The title *On the High Wire* suggests the precarious nature of the “walk” for education faculty who are parents of school-aged children. We know that our identities are central to how we experience the world and how the world reacts to us. This reality is clearly visible in this book. These multiple identities and roles come into conflict at multiple points and in different ways. This book explores these identities and roles through autoethnographic accounts written by varied education faculty in order to make these tensions visible for the field to address.

**The C-Word** Feb 08 2021 The incredibly moving, darkly humorous account of one woman's fight against breast cancer. Now a BBC Drama starring Sheridan Smith. 'Carrie Bradshaw fell in Dior, I fell in Debenhams. It was May 2008, and it was spectacular. Uncomfortable heels + slippy floor + head turned by a cocktail dress = thwack. Arms stretched overhead, teeth cracking on floor tiles, chest and knees breaking the fall. It was theatrical, exaggerated, a perfect 6.0. And it was Significant Moment #1 in discovering that I had grade-three breast cancer.' The last thing Lisa Lynch had expected to put on her 'things to do before you're 30' list was beating breast cancer, but then's the breaks. So with her life on hold, and her mind close to capacity with unspoken fears, questions and emotions, she turned to her Mac and started blogging about the frustrating, life-altering, sheer pain-in-the-arse inconvenience of getting breast cancer at the age of 28. *The C-Word* is an unflinchingly honest and darkly humorous account of Lisa's battle with *The Bullshit*, as she came to call it. From the good days when she could almost pretend it wasn't happening, to the bad days, when she couldn't bear to wake up, Lisa's story is emotional, heartbreaking and often hilarious. *The C-Word* will make you laugh and cry, and ultimately reaffirm your faith in life.

**Big Farms Make Big Flu** Jun 14 2021 The first collection to explore infectious disease, agriculture,

economics, and the nature of science together Thanks to breakthroughs in production and food science, agribusiness has been able to devise new ways to grow more food and get it more places more quickly. There is no shortage of news items on hundreds of thousands of hybrid poultry—each animal genetically identical to the next—packed together in megabarns, grown out in a matter of months, then slaughtered, processed and shipped to the other side of the globe. Less well known are the deadly pathogens mutating in, and emerging out of, these specialized agro-environments. In fact, many of the most dangerous new diseases in humans can be traced back to such food systems, among them Campylobacter, Nipah virus, Q fever, hepatitis E, and a variety of novel influenza variants. Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease. But market economics doesn't punish the companies for growing Big Flu—it punishes animals, the environment, consumers, and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve, and spread with little check. “That is,” writes evolutionary biologist Rob Wallace, “it pays to produce a pathogen that could kill a billion people.” In *Big Farms Make Big Flu*, a collection of dispatches by turns harrowing and thought-provoking, Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details, with a precise and radical wit, the latest in the science of agricultural epidemiology, while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel, and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some, such as farming cooperatives, integrated pathogen management, and mixed crop-livestock systems, are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the nature of science together. *Big Farms Make*

Big Flu integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

**War and Conflict Quotations** Mar 31 2020 History is replete with pronouncements on war. Some reflect on man's warlike nature ("We are quick to flare up, we races of men on the earth"—Homer); others deal with the practical strategies of the combatants ("If Hitler invaded hell I would make at least a favorable reference to the devil in the House of Commons"—Winston Churchill); and still others offer advice for avoiding conflict ("The most disadvantageous peace is better than the most just war"—Desiderius Erasmus). More than 2,700 quotations on war and conflict are presented in this reference work. The quotations are arranged by more than 100 broad categories, from action to winning. For each, the quotation is first given, followed by its author, the work in which it appeared (when appropriate), and the date. The book includes numerous cross-references, and keyword-in-context and author indexes are provided for further utility.

**Lewd** Nov 27 2019 Did you ever wonder why you can use any word for poop except for the word sh\*t? You can say excrement, poop, poo, poo-poo, feces, defecation, caca, dung, manure, stool, fecal matter, and human waste. You can even say the word crap. But, the word "sh\*t" is banned by the federal government. You can be fined by the FCC for saying it on broadcast TV or radio. Here's the weird thing; among all these words, it's sh\*t, and sh\*t alone that's illegal. Any other synonym is ok. Why is that? They all mean exactly the same thing. What's so special about this one word? The same is true for the "F" word. You can say sex, copulation, fornication, shag, boff, hump, diddle, score, or bone, and it's legal. You can even say screw. It's not polite, but it's allowed. But, the word f\*ck alone is banned by the US government. And the same thing is true for the word c\*nt. There's a lot of slang words for vagina, and they're all allowed on broadcast media. All, that is, except for the "C" word. Why is that? What is so different about these words that makes them illegal when all their synonyms are ok? Well it turns out that all of these banned, four-letter words all have something in common. Something that makes them different. And, it has nothing to do with being obscene. In fact, there was once a time when these were just common words and not considered dirty at all. Now, finally, this book reveals the secret behind English dirty words and exactly how these particular lewd words became so offensive that they were outlawed by the federal government.

**Becoming a Faith Fighter** Nov 19 2021 You face trial after trial and test after test. Each time you come through to the side of victorious, you wonder how you made it. You wonder how you kept your

sanity and stayed to see the outcome. You fight, often not even knowing you have been placed in the center of a battle. This book flows from my testimony of discovering unknown strength in the midst of one of the greatest storms of my life. Facing the C-Word (I was terrified to say the word 'Cancer'), was one of the scariest battles I had to encounter. Without a strong foundation of faith, willingness to fight, and a good support system, the diagnosis, at that time, felt like a death sentence. *Becoming A Faith Fighter* describes part of the process that helped me to understand that everything is not about me and not to take spiritual battles so personally. I was forced to face my flawed self in the mirror and fight selfishness, fear, and my lack of faith head on. By the end of this book, I hope to help you discover the Faith Fighter that lies within you.

*The "C" Word* Feb 20 2022 This book is me – talking to you. It's not grammatically correct – I fragment a lot. It probably has some errors – I'm not perfect and neither is this book. It certainly is not politically correct and may even offend some people. I tell it like it is, as I have always done. You rarely have to wonder where I stand on something – I have an opinion on almost everything. I have written this in my style – like I'm sitting next to you in the same room telling you my story. I was diagnosed with Stage III cancer in November, 2008. I experienced a short period of remission until my Stage IV – terminal diagnosis in February, 2010. This book covers the period of my initial diagnosis to

where I am now in May, 2010. Cancer is a dirty word! I have accepted that I will probably die from cancer. I have not accepted that my life is over. This book is intended as a gift. A gift from me to the reader. I'm not telling anyone how to do this or that they should handle it the way I am approaching it. It's just my story of how I am dealing with it and attempting to turn devastation into opportunity. Every dollar we bring in with the sale of this book will go towards my dream project – My Sister's Place, Too – a transitional housing program for women and children who have made the decision to leave their abusive situations and start a new life. There is a chapter devoted to this project. You can help me achieve my dream by purchasing this book for yourself or better yet as a thoughtful gift for anyone on the cancer journey.
