Disability in South Asia Jun 17 2021 Disability in South Asia: Knowledge & Experience presents a comprehensive approach to various aspects of disability in South Asia. A critical work on disability studies, this book explores the full complexity of disability in its multi-layered, interactional dynamics. The book imparts understanding of the social, political and cultural construction of disability as opposed to the traditional perception of disability in terms of medical condition, biological trait, rehabilitation and special education. It focuses on foregrounding disability across various areas including education, law and sociology, critically exploring the interaction of gender and disability, and challenging the separation between theory and practice as well as academia and activism. The book shows how the inclusion of a disability perspective enriches scholarship by contributing to the understanding of social marginalization, oppression and the perception of difference. It highlights the lived experiences of people with disabilities to help readers develop a nuanced comprehension of disability.

Bailey & Love's Short Practice of Surgery Nov 10 2020 Bailey & Love's Short Practice of Surgery remains one of the world's pre-eminent medical textbooks, beloved by generations of surgeons, with lifetime sales in excess of one million copies. Now in its 25th edition, the content has been thoroughly revised and updated while retaining its traditional strengths. Under the stewardship of the eminent editorial team, comprising two editors with experience gained over previous editions and a third editor new to this edition, and in response to reader feedback, the content has been sub-divided into parts to ensure a logical sequence and grouping of related chapters throughout while the text features enthusiastically received in the last edition have been retained. The new edition opens with sections devoted to the underlying principles of surgical practice, investigation and diagnosis, and pre-operative care. These are followed by chapters covering all aspects of surgical trauma. The remainder of the book considers each of the surgical specialties in turn, from elective orthopaedics through skin, head and neck, breast and endocrine, cardiothoracic and vascular, to abdominal and genitourinary. Key features: Authoritative: emphasises the importance of effective clinical examination and soundly based surgical principles, while taking into account the latest developments in surgical practice. Updated: incorporates new chapters on a wide variety of topics including metabolic response to injury, shock and blood transfusion, and surgery in the tropics. Easy to navigate: related chapters brought together into clearly differentiated sections for the first time. Readable: preserves the clear, direct writing style, uncluttered by technical jargon, that has proved so popular in previous editions. User-friendly: numerous photographs and explanatory line diagrams, learning objectives, summary boxes, biographical footnotes, memorable anecdotes and full-colour presentation supplement and enhance the text throughout. Bailey and Love has a wide appeal to all those studying surgery, from undergraduate

medical students to those in preparation for their postgraduate surgical examinations. In addition, its high standing and reputation for unambiguous advice also make it the first point of reference for many practising surgeons. The changes that have been introduced to the 25th edition will only serve to strengthen support for the text among all these groups.
