Effective Supervision Jul 19 2019 In *Effective Supervision*, Robert J. Marzano, Tony Frontier, and David Livingston show school and district-level administrators how to set the priorities and support the practices that will help all teachers become expert teachers. Their five-part framework is based on what research tells us about how expertise develops. When these five conditions are attended to in a systematic way, teachers do improve their skills: * A well-articulated knowledge base for teaching * Opportunities for teachers to practice specific strategies or behaviors and to receive feedback * Opportunities for teachers to observe and discuss expertise * Clear criteria for success and help constructing professional growth and development plans * Recognition of the different stages of development progressing toward expertise. The focus is on developing a collegial atmosphere in which teachers can freely share effective practices with each other, observe one another's classrooms, and receive focused feedback on their teaching strategies. The constructive dynamics of this approach always keep in sight the aim of enhancing students' well-being and achievement. As the authors note, "The ultimate criterion for expert performance in the classroom is student achievement. Anything else misses the point."

Education for Cataloging and the Organization of Information Dec 16 2021 What does the future hold for cataloging education? Written by some of the best-known authors and most innovative thinkers in the field, including Michael Gorman, Sheila S. Intner, and Jerry D. Saye, this comprehensive collection examines education for students and working librarians in cataloging and bibliographic control, emphasizing history, context, the state of the art at present, and suggested future directions. A liberal dose of visual aids—charts, tables, etc.—makes accessing the information quick and easy. From the editor: “The education of catalogers has swung pendulum-like from on-the-job training to graduate education and back again. The place of cataloging in the library school curriculum has swung from one of near pre-eminence to one of near extinction, and has begun to swing back again. The durability of education for cataloging has swung from 'In getting your degree you will learn everything you need to know in your career,' to 'You will have to engage in continuing education throughout your career, beginning virtually as soon as you have your degree.' Making informed decisions about how (and how much) cataloging education is to be provided is full of pitfalls, some of which the profession has fallen into already. What is needed now is a reconsideration of how education for cataloging and bibliographic control is provided.” *Education for Cataloging and the Organization of Information: Pitfalls and the Pendulum* addresses four main areas: the ways professionals perceive the place, nature, and necessity of cataloging education; the professional, demographic, and academic context within which cataloging education is provided; education regarding special types of materials and special aspects of cataloging; and alternatives to traditional modes of education for cataloging, including: distance education online mentoring Web-based instruction continuing education training for (and via) cooperative projects the role of the “community of catalogers” in the continuing education of those who provide intellectual access to the world of information and much more!

Cert Basic Training Participant Manual Jun 22 2022 CERT (Community Emergency Response Team) is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community-- neighborhood associations, schools, workplaces, places of worship, and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. Moving Image Cataloging Oct 22 2019 Libraries, archives, and museums hold a wide variety of moving images, all of which require the same level of attention to issues of organization and access as their print counterparts. Consequently, the people who create collection level records and metadata for these resources need to be equally conversant in the principles of cataloging. Martha Yee covers both descriptive (AACR2R, AMIM, and FIAF rules) and subject cataloging (with a focus on LCSH). In the process, the reader is encouraged to think critically and to be prepared to make decisions in ambiguous situations where solutions to problems are not always obvious or clearly dictated by specific rules.

Relationship Enhancement Therapy Jul 11 2021 Relationship Enhancement Therapy (RE) is a couples-therapy system conceived of, designed, and first implemented by Bernard Guerney Jr., who integrated the client-centered theory of Carl Rogers, the interpersonal theory of Henry Stack Sullivan, the behavior modification and learning theories of Skinner and Bandura, and the psychodynamic theory of Freud, in formulating RE. In this book Dr. Scuka presents an up-to-date, comprehensive theoretical and practical treatment of RE, in which he gives the reader a guide to implementing the principles of this dynamic theory. The book is written principally with couples therapy in mind, although there is an acknowledged

relevance to family therapy, and the author calls attention the many skills and therapy techniques that would be applicable to family therapy. Though designed to allow a therapist of any level of experience to begin working with the RE model, this book is more than a standard cookbook, as it considers a variety of special RE therapy techniques, discusses the entire clinical intake process, the application of the RE model to the treatment of affairs, use with difficult clients, and family therapy issues such as domestic violence and stepfamilies.

Handbook of Juvenile Forensic Psychology and Psychiatry Aug 20 2019 Juvenile justice centers have a long tradition as an unfortunate stop for young offenders who need mental health care. Reports estimate that as many as 70% of the youth in detention centers meet criteria for mental health disorders. As juvenile justice systems once again turn their focus from confinement to rehabilitation, mental health providers have major opportunities to inform and improve both practice and policy. The Handbook of Juvenile Forensic Psychology and Psychiatry explores these opportunities by emphasizing a developmental perspective, multifaceted assessment, and evidence-based practice in working with juvenile offenders. This comprehensive volume provides insights at virtually every intersection of mental health practice and juvenile justice, covering areas as wide-ranging as special populations, sentencing issues, educational and pharmacological interventions, family involvement, ethical issues, staff training concerns, and emerging challenges. Together, its chapters contain guidelines not only for changing the culture of detention but also preventing detention facilities from being the venue of choice in placing troubled youth. Key issues addressed in the Handbook include: Developmental risks for delinquency. Race and sex disparities in juvenile justice processing. Establishing standards of practice in juvenile forensic mental health assessment. Serving dually diagnosed youth in the juvenile justice system. PTSD among court-involved youth. Female juvenile offenders. Juvenile sex offenders. The Handbook of Juvenile Forensic Psychology and Psychiatry is an essential reference for researchers, professors, allied clinicians and professionals, and policy makers across multiple fields, including child and school psychology, child and adolescent psychiatry, developmental psychology, criminology, juvenile justice, forensic psychology, neuropsychology, social work, and education.

SIMSOC: Simulated Society, Participant's Manual May 21 2022 The official guide to SIMSOC, the dynamic group simulation game whose “potential for stimulating the learning process is staggering” (Teaching Sociology), in which players grapple with the challenge of governing society. In SIMSOC, players confront issues like abuse of power, justice, diversity, trust, and leadership as they negotiate their way through labor-management strife, political turmoil, and natural disasters. Success or failure is dependent upon decisions made by players and the creativity of the group—and every game is a teaching tool. To be successful, players must utilize every basic social process from cooperation and reward to threat and punishment. SIMSOC will make participants ask questions about social control, and bring everyday experience and deeper understanding to even the most arcane social and organizational theory. Included in this Fifth Edition of SIMSOC's Participant's Manual are instructions for playing, materials for play, study questions based on participation, and selected readings about simulation games, leadership, and social processes. New to the Fifth Edition are additional size levels to accommodate groups of up to ninety participants with simplified rules and readings by authors from Nicholas Lemann to Robert Putnam.

Maxwell's Guide to Authority Work Sep 13 2021 "Unidentified Flying Objects," not "UFOs" or "Flying Saucers" Authority work is the linchpin of the library catalog. As the author puts it, "Without authority control, the burden is placed on the user to think of all the possible forms a cataloger might have used to give access in the catalog to a given author or subject." If a subject is not sorted by its authorized heading, then the library and its users and staff are left without a system and ultimately the cost of an unsatisfied user. From one of the preeminent experts in the field, this is the step-by-step guide for ensuring that your library and staff are creating and maintaining authority records with the end user in mind. Comprehensive and definitive, Maxwell's Guide to Authority Work is a must-have. In this readable text, authority work is broken down to its most basic components so that you can trace and follow the preparation of a complete authority record. Helpful illustrations identify the key characteristics of good authority records, common acronyms are defined, and cross-references throughout reinforce material. Step-by-step, you'll learn how to: Form and record uniform access points Keep thorough and accurate records Share information in an environment of international databases and cooperative cataloging The authoritative tool for making certain a person, author, corporate body, organization, book, or other media is appropriately classified under its authority name, subject, and form, Maxwell's should be part of any library's toolbox.

Impact Evaluation in Practice, Second Edition Feb 24 2020 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.
