Urban Transport Systems Nov 08 2020 Better urban transport systems are needed to achieve a healthier environment and as a result, a wide range of research has originated from many different countries. These studies highlight the importance of innovative systems, new approaches and original ideas, which need to be thoroughly tested and critically evaluated before they can be implemented in practice. To address the need to solve important pollution problems the papers included in this book focus on the relationship with urban transport. There is also a growing need for integration with telecommunications systems and IT applications in order to improve safety, security and efficiency. The variety of topics covered in this volume reflects the complex interaction of the urban transport systems with their environment and the need to establish integrated strategies. The aim is to arrive at optimal socio-economic solutions while reducing the negative environmental impacts of current transportation systems.

The Moscow Factor Dec 10 2020 In 2014, Russia illegally annexed Crimea, bolstered a separatist conflict in the Donbas region, and attacked Ukraine with its regular army and special forces. In each instance of Russian aggression, the U.S. response has often been criticized as inadequate, insufficient, or hesitant. The Moscow Factor: U.S. Policy toward Sovereign Ukraine and the Kremlin is a unique study that examines four key Ukraine-related policy decisions across two Republican and two Democratic U.S. administrations. Eugene M. Fishel asks whether, how, and under what circumstances Washington has considered Ukraine's status as a sovereign nation in its decision-making regarding relations with Moscow. This study situates the stance of the United States toward Ukraine in the broader context of international relations. It fills an important lacuna in existing scholarship and policy discourse by focusing on the complex trilateral—rather than simply bilateral—dynamics between the United States, Ukraine, and Russia from 1991 to 2016. This book brings together for the first time documentary evidence and declassified materials dealing with policy deliberation, retrospective articles authored by former policymakers, and formal memoirs by erstwhile senior officials. The study is also supplemented by open-ended interviews with

former and returning officials.

Moller's Essentials of Pediatric Cardiology May 27 2022 Highly useful guide for all members of a multidisciplinary team managing children suffering from heart disease Built on the success of previous editions and brought to you by a stellar author team, Moller's Essentials of Pediatric Cardiology, 4th Edition provides a unique, concise, and extremely practical overview of heart disease in children. From history-taking, physical examination, ECG, and chest X-ray—the basics that enable clinicians to uncover possible problems and eliminate areas of false concern—this work goes on to examine the range of more complex topics in the diagnosis and treatment/management of childhood cardiovascular disease. Every chapter is fully updated with the very latest clinical guidelines and management options from the AHA, ACC, and ESC. Recent updates also include an enhanced section on imaging, including recent advances in cardiac MRI and fetal echocardiography, new techniques in genetic testing for heart disease in special populations, and much more emphasis on the importance of echocardiography in understanding the pathophysiology of congenital cardiac malformations. This work also includes an expanded section on cardiac conditions in the neonate, specifically on prenatal diagnosis and management, and neonatal screening for congenital heart disease. Moller's Essentials of Pediatric Cardiology, 4th Edition also provides: Tools to diagnose cardiac conditions in children and environmental and genetic conditions associated with heart disease in children Anomalies with a left-to-right shunt in children, conditions obstructing blood flow in children, and congenital heart disease with a right-to-left shunt in children Unusual forms of congenital heart disease in children, unique cardiac conditions in newborn infants, and the cardiac conditions acquired during childhood Abnormalities of heart rate and conduction in children and congestive heart failure in infants and children Moller's Essentials of Pediatric Cardiology, 4th Edition is a succinct and accessible yet highly detailed and informative resource for treating children suffering from heart disease. It is an invaluable reference for anyone working on a multidisciplinary team treating patients with these attributes.

Immunisation against infectious diseases Jun 27 2022 This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Dak To and the Border Battles of Vietnam, 1967-1968 Dec 22 2021 In 1967, the North Vietnamese launched a series of offensives in the Central Highlands along the border with South Vietnam—a strategic move intended to draw U.S. and South Vietnamese forces away from major cities before the Tet Offensive. A series of bloody engagements known as "the border battles" followed, with the principle action taking place at Dak To. Drawing on the writings of key figures, veterans' memoirs and the author's records from two tours in Vietnam, this book merges official history with the recollections of those who were there, revealing previously unpublished details of these decisive battles.

Community Care in Hong Kong Jun 23 2019 Different global healthcare challenges bring threats to the healthcare system. Like other developed countries, Hong Kong is also focusing on how to manage the ageing population, how to meet the rising public expectations, and how to finance the ever increasing medical costs. Strengthening community care services may provide a way out for settling these concerns. Written by a team of renowned scholars and leading practitioners, this book aims at evaluating how different parties can assist in building up local community capacity to achieve sustainable health and wellness. The book is divided into three sections. The first section discusses the different roles and practices of specialised community care that contribute to the relative success of the healthcare system in Hong Kong. The second section makes use of various research practices to extrapolate future healthcare needs and practices in Hong Kong. And the last one addresses the values of health care which underlie the healthcare culture, structure and practice in Hong Kong over time. Apart from pointing out the limitation of the current system, this book will also discuss the future directions of the healthcare system in order to cope with the challenges in a changing society. Senator Albert Gore, Sr. Apr 01 2020 Best remembered as the father of Vice President Al Gore, Albert Gore, Sr., worked tirelessly in politics himself, a Democratic congressman and senator from 1939 to 1971 and a representative of southern liberalism and American reformism. In the first comprehensive biography of Gore, Kyle Longley has produced an incisive portrait of a significant American political leader and an arresting narrative of the shaping of a southern and American political tradition. His research includes archival sources from across the country as well as interviews with Gore's colleagues, friends, and family. Longley describes how the native of Possum Hollow, Tennessee, became known during his political career as a maverick, a man who, according to one journalist, would "rock almost anybody's boat." For his actions, Gore often paid a heavy price, personally and professionally. Overshadowed by others in Congress such as Lyndon Johnson, J. William Fulbright, Richard Russell, and Barry Goldwater, Gore nonetheless played a major role on the important issues of taxes, the Interstate Highway system, civil rights, nuclear power and arms control, and the Vietnam War. Longley situates Gore as part of a generation of politicians who matured on the messages of William Jennings Bryan, Woodrow Wilson, and Franklin Roosevelt. In the South, Gore belonged to a staunch group of liberals who battled traditional conservative forces, often within their own party. He and others such as Estes Kefauver, Frank Porter Graham, and Ralph Yarborough set the stage for subsequent generations, including that of Jimmy Carter and Jim Sasser, and later Bill Clinton, Al Gore, Jr., and John Edwards. From his career shines one encapsulating moment in 1952: squared off on the floor of the Senate against Strom Thurmond, who wanted Gore to sign the "Southern Manifesto" declaring southern resistance to desegregation, Gore responded simply, classically, "Hell no."

Out of the Mainstream: Helping the children of parents with a mental illness Aug 06 2020 Out of the Mainstream identifies those aspects of mental illness which can compromise parenting and affect children's development, as well as the efforts of professionals to intervene effectively. With chapters from professionals working primarily with children or adults, in different agencies and in specialist teams or in the community, the book illustrates the ways in which the needs of mentally ill parents and their children can be understood. The book outlines different theoretical approaches which may be in use alongside each other, including: A systems theory approach to work with families and with agencies; The psychoanalytic understanding of mental illness and its impact on family relationships and organisations; An educational approach to supporting staff, children and parents; A psychiatric or bio-medical model of work Out of the Mainstream considers how the diverse groups of agencies, specialist teams and groups in the community can work together, even when many barriers may hinder the effective co-working between individuals and these various groups. It will be an invaluable resource for psychologists, psychiatrists, social workers, health visitors, mental health nurses, teachers and voluntary sector agency staff.

Killing Bugs for Business and Beauty Oct 27 2019 Killing Bugs for Business and Beauty examines the beginning of Canada's aerial war against forest insects and how a tiny handful of officials came to lead the world with a made-in-Canada solution to the problem. Shedding light on a largely forgotten chapter in Canadian environmental history, Mark Kuhlberg explores the theme of nature and its agency. The book highlights the shared impulses that often drove both the harvesters and the preservers of trees, and the acute dangers inherent in allowing emotional appeals instead of logic to drive environmental policy-making. It addresses both inter-governmental and intra-governmental relations, as well as pressure politics and lobbying. Including fascinating tales from Cape Breton Island, Muskoka, and Stanley Park, Killing Bugs for Business and Beauty clearly demonstrates how class, region, and commercial interest intersected to determine the location and timing of aerial bombings. At the core of this book about killing bugs is a story, infused with innovation and heroism, of the various conflicts that complicate how we worship wilderness.
