Mastering the Financial Dimension of Your Psychotherapy Practice Aug 08 2020 Written by two therapists with extensive business experience, *Mastering the Financial Dimension of Your Psychotherapy Practice* addresses the clinical and financial challenges of establishing and maintaining a successful private practice. This book contains updated content on investing strategies, changes in the insurance marketplace, and trends in the marketing of a psychotherapy practice. The first of five sections explores the life cycle of the modern therapy practice, offering best business and investing practices for each phase. In the second and third sections, the authors consider the emotional dimension in the development of a private practice. The fourth section offers a basic course in financial planning, including an investigation into five common financial mistakes therapists make and various solutions to each situation. The fifth section is designed to offer a road map of actions to take in establishing a financial plan. Concluding the book is an inspirational discussion of how the therapist in private practice can create a career with meaning, fulfillment, personal satisfaction, and solid financial rewards.

Maple V: Mathematics and its Applications Jun 17 2021 The Maple Summer Workshop and Symposium, MSWS '94, reflects the growing community of Maple users around the world. This volume contains the contributed papers. A careful inspection of author affiliations will reveal that they come from North America, Europe, and Australia. In fact, fifteen come from the United States, two from Canada, one from Australia, and nine come from Europe. Of European papers, two are from Germany, two are from the Netherlands, two are from Spain, and one each is from Switzerland, Denmark, and the United Kingdom. More important than the geographical diversity is the intellectual range of the contributions. We begin to see in this collection of works papers in which Maple is used in an increasingly flexible way. For example, there is an application in computer science that uses Maple as a tool to create a new utility. There is an application in abstract algebra where Maple has been used to create new functionalities for computing in a rational function field. There are applications to geometrical optics, digital signal processing, and experimental design.

Knowledge Discovery, Transfer, and Management in the Information Age Jul 31 2022 With the advent of electronic databases, information technologies, and the Internet, organizations now more than ever have easy access to all the knowledge they need to conduct their affairs. Identifying the useful information in all that data, however, can pose a challenge. *Knowledge Discovery, Transfer, and Management in the Information Age* brings together the latest empirical research in knowledge management practices and information retrieval strategies to assist organizations in effectively and efficiently utilizing the data at their disposal. Academics, managers, researchers, and professionals within the field of knowledge management will make use of this book to increase their understanding of best practices in the manipulation of information resources.

New Perspectives on Older Language Learners Mar 15 2021 Young-old learners are an underresearched group in foreign/second language research. The present mixed-methods study aims to provide a more differentiated view of this group in the context of lifelong learning and, more specifically, learning English as a foreign language. The author draws from concepts in gerontology, psychology, adult education, and foreign/second language research to investigate the L2-self-concepts of young-old language learners at Volkshochschulen in Germany.

Breaking Boundaries Sep 01 2022 Based on providing visual representation of all functions and key pieces of content, What You See Is What You Get (WYSIWYG) is the current interface design paradigm primarily used in personal computing machines. As we move into a world where computing power continues to increase, and we choose to decrease the physical size of our machines so that they will fit into our pockets, WYSIWYG will break. This research agenda explores a paradigm shift, asking whether users of computing machines can effectively complete tasks without this reliance on visual representation of all functions and information. The two experiments described in this dissertation seek to answer these questions: 1) do visual cues of information and function continue to be required by users in order to complete tasks using mobile devices? 2) are users moving beyond a reliance on recall and recognition memory in human-computer interaction? Furthermore, if these experiments are successful in showing that users no longer need to rely on visual cues in ways similar to the WYSIWYG interactions, can we then describe human-mobile interaction within a memory framework beyond standard recall and recognition? We built two distinct task-based protocols in which participants were asked to work through multi-step tasks, enacting functions and locating pieces of information that we described as being located outside of the physical space of the screen. These functions and pieces of information were not visually represented on the screen. Rather, the participants were primed to understand that the functions and information existed in this non-visual form and could be enacted through particular interaction techniques that referenced the particular, specific space outside of the screen where these items "lived." In the two experiments, participants worked through tasks, either in a WYSIWYG or in a YUMYS paradigm. We took a series of behavioral measurements, including time on task, total number of interactions between the user and the machine in order to complete the task, and successful, correct completion of the tasks. The outcome of this research agenda indicate that the YUMYS interface paradigm will provide a better design framework for mobile designers that will allow mobile users to perceive a decreased workload and increased success as they complete tasks within a YUMYS interface.

Cognitive Case Conceptualization Nov 03 2022 For cognitive therapy to be successful, therapists must identify the key factors that contribute to their clients' problems. Effective cognitive case conceptualization necessarily precedes appropriate targeting and intervention selection. It requires the integration of the results of a comprehensive assessment into a strong conceptual foundation. Solidly grounded in recent research, and focusing particular attention on important new theoretical developments, this book first offers a comprehensive overview of the contemporary cognitive model of therapy. It then lays out detailed, easy-to-follow procedures for assessing within a cognitive framework, developing effective individualized cognitive case conceptualizations, and implementing state-of-the-art interventions based on them. A step-by-step guide for concisely summarizing and representing the salient features of a client's presentation is included. Extensive case histories bring to life the entire process of cognitive therapy--assessment, conceptualization, and intervention--for several clients with a variety of complex clinical problems: panic disorder with agoraphobia, obsessive-compulsive disorder, and chronic or recurrent major depressive disorder. Cognitive Case Conceptualization will become an indispensable desk reference for many experienced clinicians as well as trainees.

Learning to Teach History in the Secondary School Nov 10 2020 In some hands, history can be an inspirational and rewarding subject, yet in others it can seem dry and of little relevance. The aim of this textbook is to enable student teachers to learn to teach history in a way that pupils will find interesting, enjoyable and purposeful. It incorporates a wide range of ideas about the teaching of history with practical suggestions for classroom practice. This is the third edition of a textbook that has established itself as the leading text for student teachers of history. It has been thoroughly updated, with a revised chapter on the use of ICT in history teaching and major new sections in the areas of inclusion, resources, assessment and professional development. It provides an array of references and materials that give a sound theoretical foundation for the teaching of history, including weblinks to further resources. A range of tasks enable students to put their learning into practice in the classroom. The book also provides reference and access to a wide range of recent and relevant research in the field of history education, which will be of use to student teachers pursuing courses that have a Masters Level component. In all, it is an invaluable resource for student and beginning history teachers.

Navigating to Read Feb 23 2022 'Navigating to read - reading to navigate' demonstrates the scaffolded activities developed by teachers across Australia to help learners read and navigate the Web. The research for this book highlighted two distinct, but interrelated reading activities learners need to engage in to use the Web: reading web pages to find their way around a website, and navigating web pages in order to find and read information to achieve some other language learning goal. Chapters include sample materials. The final chapter summarises the outcomes of the study and raises further issues for exploration. Table of contents: Series

Written to appeal to the novice to advanced beginner, a special section in each chapter is directed to the competent to expert programs, managers, educators, and researchers, so that this text truly can serve as the comprehensive reference for anyone in simulation.

EBOOK: Job Interviews: Top Answers to Tough Questions Mar 03 2020 "I would recommend this book for anyone who is anxious about interviews or who wants to improve their interview performance." Phoenix, May 2012 "In a tough market with strong competition for just a handful of roles, you need to be the best on the day. Only careful preparation and ensuring you match everything you say and do to the specific role, employer and even interviewer, will position you as a serious contender for the role. John once again combines a proven, thorough approach with practical tips that will equip you with the skills, examples and confidence required to achieve interview success." Isabel Chadwick, Managing Director, Career Management Consultants Ltd "John's book is a great asset to anyone who fears the interview process. As well as some very practical and useful exercises, designed to help capture powerful information and to get you thinking, he gives a fascinating insight into the psychological processes, making it much easier to understand and put yourself into the shoes of the interviewer. John's style is very accessible, demonstrating his years of experience and translating it into an easy-to-read collection of hints, tips and guidance. I suspect a lot of interviewers will also want to use this book to help them raise their game!" Kerwin Hack, Consultant Director, Fairplace Cedar "This book is an extremely comprehensive guide on how to succeed in job interviews. John takes you 'backstage' into the mind of the interviewers so you can understand what they are thinking and what they really want to know when asking a range of different questions. Getting a job interview into today's difficult employment market is a privilege. This manual will help you to be much better prepared so that your next job interview becomes a positive opportunity to show what you can really offer, not a ordeal to be feared. He covers everything from warm up questions to the tricky issue of salary." Simon Broomer, Managing Director, CareerBalance "John Lees is the career professional's professional; the doyen of career experts. His books and advice have helped countless numbers of people to enjoy better, more fulfilling careers. This book is an essential read for anyone who is about to attend a job interview." Dr Harry Freedman, Career and Business Strategist, Hanover Executive "John gives consistently good, pragmatic advice and provides suggestions to help people make the most of themselves and the opportunities they get. Easy to read, relevant and straightforward, the book offers so much more than standard self-help books - it provides practical steps to get readers started and give them confidence to take ownership of their careers. A great resource to ensure a head start in a competitive market." Denise Nesbitt, Senior Change Delivery Manager, Talent & Development, Lloyds Banking Group "John Lees' writing offers insight and knowledge which allows you to think in new ways and achieve changes you didn't think possible. In these difficult and challenging times, his books help you achieve your next career step." Laura Roberts, Chief Executive, NHS Manchester Why are you on the market right now? If our roles were reversed, what questions would you ask? Sell me this stapler! Tough questions like these can unnerve even the most confident jobseeker, proving that it's not always the best candidate who gets the job, it's the best interviewee. Whether a first-time jobseeker, career-changer, or returning after a break, Job Interviews: Top Answers to Tough Questions is your indispensable toolkit. Now thoroughly revised and updated to reflect today's demanding job market, featuring: 225 of the most common interview questions A 'fast-track' preparation option if your interview is TOMORROW! More sample answers to challenging questions Insights into the employer mindset when vacancies are thin on the ground "This book is invaluable. Follow the guidelines and your chances improve beyond measure. You will be sharp, focused, and not only make the most of your own abilities, but also have a clear understanding of what you need to offer to employers. This moves you from the 'me' agenda to the 'we' agenda." Stuart Walkley, Director, Oakridge Training and Consulting "As a careers adviser, I often find that clients know that preparation is the key to a successful interview but are unsure where to start. John Lees deals with this clearly and comprehensively. This book is based on real evidence gained from employers and this new edition has been comprehensively updated. I would recommend the book for anyone who is anxious about interviews and to people applying for any level of job, regardless of how much interview experience they may have." David Levinson, Careers Adviser, The University of Edinburgh

Change, Strategy and Projects at Work Jan 01 2020 Change, Strategy and Projects at Work provides a working insight into the nature of change, the formulation of strategy and the implementation of change through projects in the workplace. It is a 'how to' book with real practical application, containing the tools, techniques, advice and guidance you need to analyse organisational context, develop a strategic plan and manage a project. To help you in leading change and creating opportunities for yourself and your organisation, the book takes an integrated approach to managing change, developing strategy and project management, and covers: * How strategic objectives are chosen, promoting awareness of the wider organisational context and the strategic planning process * The knowledge, tools, techniques and confidence needed to act as a change agent * The skills, competencies and other attributes needed to improve your employability The book is ideal as a dip-in guide for professional development, a self-study resource or a textbook for formal courses on change, strategy and project management in a work context. It is used to support the Open University's undergraduate course ICTs, Change and Projects at Work (T226).

Adult Literacy in OECD Countries Jan 31 2020 In December 1995, the Organisation for Economic Co-Operation and Development (OECD) and Statistics Canada jointly published the results of the first International Adult Literacy Survey (IALS). For this survey, representative samples of adults aged 16 to 65 were interviewed and tested in their homes in Canada, France, Germany, the Netherlands, Poland, Sweden, Switzerland, and the United States. This report describes how the survey was conducted in each country and presents all available evidence on the extent of bias in each country's data. Potential sources of bias, including sampling error, non-sampling error, and the cultural appropriateness and construct validity of the assessment instruments, are discussed. The chapters are; (1) "Introduction" (Irwin S. Kirsch and T. Scott Murray); (2) "Sample Design" (Nancy Darcovich); (3) "Survey Response and Weighting" (Nancy Darcovich); (4) "Non-Response Bias" (Nancy Darcovich, Marilyn Binkley, Jon Cohen, Mats Myrberg, and Stefan Persson); (5) "Data Collection and Processing" (Nancy Darcovich and T. Scott Murray); (6) "Incentives and the Motivation To Perform Well" (Stan Jones); (7) "The Measurement of Adult Literacy" (Irwin S. Kirsch, Ann Jungeblut, and Peter B. Mosenthal);

(8) "Validity Generalization of the Assessment across Countries" (Don Rock); (9) "An Analysis of Items with Different Parameters across Countries" (Marilyn R. Binkley and Jean R. Pignal); (10) "Scaling and Scale Linking" (Kentaro Yamamoto); (11) "Proficiency Estimation" (Kentaro Yamamoto and Irwin S. Kirsch); (12) "Plausibility of Proficiency Estimates" (Richard Shillington); and (13) "Nested-Factor Models for the Swedish IALS Data" (Bo Palaszewski). Fourteen appendixes contain supplemental information, some survey questionnaires, and additional documentation for various chapters. (Contains 94 tables, 12 figures, and 74 references.) (SLD)

Improving Teaching and Learning in the Humanities Feb 11 2021 Focuses on religious education, history, geography and cross-curricular planning in the primary school. It includes discussion of the purpose of education, and how the humanities fit with this purpose, with particular reference to the 1998 Education Act and 1994 National Curriculum Review. The book deals with the themes of time, place, values, communication, responsibilities and decision-making. These link the chapters, and are fully complemented with case studies. For each concept there are suggestions for practical classroom activities. The reader will find the book invaluable in integrating the subjects across the National Curriculum.

The Twentieth Century Mar 27 2022 Offers activities to students that describe the major themes in world history during the twentieth century, including the struggles of nation-building among the countries that won independence and the growth of global communication.
